| Integration                   | INT108         | The Contractor's solution shall use standard messaging formats (e.g. XML, JSON, EDI, etc.) to ensure interoperability.                                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration                   | INT109         | All service endpoints/APIs shall be exposed to the State's Integration Platform and are able to receive and submit messages through the State's Integration Platform.                                                                                                                                                    | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration                   | INT110         | The Contractor's solution shall have the ability to identify errors in transactions and immediately notify the State's Integration Platform and the source system of the specific errors including whether the errors have precluded loading and/or using the data.                                                      | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration                   | INT111         | The Contractor's solution shall be integrated in loosely coupled design patterns with the rest of the enterprise by encapsulating its core functions and interacting with the rest of the enterprise via interfaces to and from the State's Integration Platform which leverage interoperability data standards.         | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                       |                                    |                                  |                                                                                                  |                                                                                                   |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Requirement Section    | Requirement ID | Requirement Language                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Base Requirement<br>Applicable to Core<br>Claims Solution and All<br>Proposed Options | Requirement<br>Option<br>Indicator | Requirement Option<br>Assignment | General Status                                                                                   | Production<br>Status                                                                              | Product<br>Type                                        | Hosting                                                | Security Tested                                                                                                                                                                                                                                                                                                                                                                                                                                      | Additional Information |
| Integration            | INT112         | The Contractor's solution shall support standard web services and specifications (e.g., REST, WSDL, WS-*, SOAP, JSON, XML, EDI).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                                        | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT113         | The Contractor's solution must be capable of receiving, translating, and processing data to and from the variety of secure protocols (e.g., HTTPS, FTPs, SFTP, AS2, AS3). The Contractor shall include in their response a list of protocols supported.                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                                        | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT114         | The Contractor shall participate in the Data Governance process, as defined and administered by the Agency. The Data Governance process will define processes and adjudicate concerns for items including but not limited to: <ul style="list-style-type: none"><li>• Enterprise data lifecycle management processes (including master data management)</li><li>• Data synchronization processes</li><li>• Data formats for data exchanged by/between systems in Agency's Enterprise</li><li>• Management of reference data (i.e. code list versions)</li><li>• Dispute resolution for data management issues</li></ul>                                                 | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                                            | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Integration            | INT115         | The Contractor's solution shall support full and incremental data synchronization between the solution and the State's Integration Platform for data entities as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours                       | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT116         | The Contractor's solution shall ensure that module operational data is available and is supplied to the State's Integration Platform in a format and frequency as defined by the Agency. The State's Integration Platform may require periodic data refreshes at agreed upon intervals.                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours                       | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT117         | The Contractor shall work with the Agency and the Systems Integrator if data quality issues arise and shall assist in remediating those issues.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours                       | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT118         | The Contractor shall participate in the API Governance process, as defined and administered by the Agency. The API Governance process will define processes and adjudicate concerns for items including but not limited to: <ul style="list-style-type: none"><li>• Design and definition of solution endpoint API specifications</li><li>• Revisions to solution endpoint APIs (minor &amp; major)</li><li>• Deprecation of solution APIs</li><li>• Definition of data formats and code lists utilized by an API</li><li>• Dispute resolution for API designs and behavior</li><li>• Publication of solution API specifications to the Agency's API Registry</li></ul> | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                                            | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Integration            | INT119         | The Contractor shall implement interfaces with the State's Integration Platform in accordance with technical specifications approved by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | C - Is an integrated third party product (COTS), requires no configuration or custom development | S3 - This functionality is not currently offered, but will offer for this engagement (1st client) | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT120         | The Contractor's solution shall support query-based service calls (e.g. request & response) for data entities and associated query parameters as required by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                                        | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                            |                                                                                       |                                    |                                  |                                                           |                                                                                                   |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Integration            | INT121         | The Contractor's solution shall support real-time notifications as required by the Agency including but not limited to: changes to solution's data, transaction events, etc.                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT122         | The Contractor's solution shall transmit all dates in a format specified by the Agency (ISO8601).                                                                                                                                                                                                                                                                          | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT123         | The Agency reserves the right to make use of and share with stakeholders at the Agency's discretion, the technical specifications supplied by the Contractor for the solution endpoints exposed to the State's Integration Platform.                                                                                                                                       | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                                            | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Integration            | INT124         | The Contractor shall ensure that all data, transactions and service calls between the Contractor's solution and other modules (including legacy systems) are routed through the State's Integration Platform as required by the Agency.                                                                                                                                    | No                                                                                    |                                    |                                  | F - Requires custom development                           | S3 - This functionality is not currently offered, but will offer for this engagement (1st client) | SaaS - Software as a Service                           | T - Third Party Hosting                                | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| Integration            | INT125         | The Contractor shall route data, transactions and service calls between the Contractor's solution and third-party systems and federal systems (e.g., CMS, IRS, SSA) through the State's Integration Platform as required by the Agency.                                                                                                                                    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT126         | The Contractor's solution shall utilize supporting services, data sources, or data feeds (master indices, reference data, etc.) provided by the State's Integration Platform as required by the Agency.                                                                                                                                                                    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT127         | The Contractor shall generate and supply solution test data (including synthetic or de-identified data). Test data shall approximate production data with sufficient fidelity to ensure reliability and accuracy of test results.                                                                                                                                          | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT128         | The Contractor shall coordinate security configurations and data sensitivity for multiple environments (e.g. integration testing, pre-production) with the State's Integration Platform as required by the Agency.                                                                                                                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT129         | The Contractor's solution shall capture, log, maintain and supply upon request to the Agency metadata for transactions and service calls between the solution and the State's Integration Platform. Metadata shall include but is not limited to, enterprise-supplied transaction IDs, transaction success/failure status, and other information as defined by the Agency. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT130         | The Contractor must maintain any and all hardware and software products required to support the Contractor's solution at their most current major version (patches, fixes, upgrades, and releases for all software, firmware and operating systems) or no more than one version back from the most current major version.                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT35          | The Contractor shall provide an architecture that has clearly defined service endpoints.                                                                                                                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                              |                                                                                       |                                    |                                  |                                                                            |                                                                                 |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Integration            | INT40          | The Contractor shall provide technical, functional and performance documentation required by the IV&V Contractor for the solution in order to support IV&V reporting needs identified in the most current version of MECT.                                                                                   | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement                     | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Integration            | INT52          | The Contractor shall collaborate with all State enterprise contractors and solutions to accurately collect, process, and distribute applicable HIPAA EDI transactions.                                                                                                                                       | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT54          | The Contractor's solution shall require (when appropriate), capture, and maintain the 10-digit NPI.                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT55          | The Contractor's solution, shall accept the NPI in all applicable standard electronic transactions mandated under HIPAA                                                                                                                                                                                      | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT59          | The Contractor shall ensure all hardware, software, and communication components installed for use by State staff are compatible with the State currently supported versions of the Microsoft Operating System, Microsoft Office Suite and Internet Explorer; and current technologies for data interchange. | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT61          | The Contractor's solution shall allow internal and external stakeholders to upload and view electronically submitted documents.                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT62          | The Contractor's solution shall ensure information and event notifications include aggregated and integrated information.                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT63          | The Contractor's solution shall have business process orchestration in an event-driven environment that maximizes process automation.                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT65          | The system shall provide the ability to share and federate data with other data sharing partners.                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT66          | The Contractor's solution shall provide the ability to create/edit, send, receive and process X12, NIEM standardized transactions and NCPDP D.O transactions relative to the Contractor's scope of work.                                                                                                     | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT68          | The Contractor shall collaborate with the Systems Integrator to automatically report system availability to the SI availability solution. The frequency of each module component verification will be defined by the Department.                                                                             | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S2 - This functionality is currently offered, but not in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                              |                                                                                       |                                    |                                  |                                                                            |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Integration            | INT70          | The Contractor shall identify and describe the licenses necessary for the scope of work to support the infrastructure that will provide sufficient bandwidth and redundancy to ensure accessibility, reliability/fault tolerance and acceptable performance.                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT73          | The Contractor shall be responsible for understanding the business processes to automate and orchestrate appropriate workflows, business rules, data flow and metadata within the solution and work collaboratively with the SI.                                                                                                                             | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT77          | The Contractor's solution shall provide a highly automated systematic processing of healthcare claims and eligibility transactions.                                                                                                                                                                                                                          | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT78          | The Contractor shall provide an environment where components can be added or replaced quickly.                                                                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT79          | The Contractor's solution shall allow internal and external users to enter data using electronic forms and receive documents electronically from other systems.                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT81          | The Contractor's solution shall have the capability to receive and display data , messages, and alerts from other systems in real-time.                                                                                                                                                                                                                      | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT87          | The Contractor's solution shall provide context sensitive help (situational clarification and support associated with process specific steps), to support user activities (e.g., provider enrollment and maintenance activities).                                                                                                                            | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT88          | The Contractor shall implement a solution where module components are loosely coupled and can be added or replaced quickly.                                                                                                                                                                                                                                  | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Integration            | INT93          | The Contractor shall provide electronic notification including detailed release notes for Major and Minor version, patches, updates and fixes deployed to the production environment.                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement                     | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Integration            | INT94          | The Contractor shall work collaboratively with module vendors to reconcile ODS data elements with the data elements for each module component.                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces             | INR01          | The Contractor's solution must ensure that all data exchanges including inbound and outbound interfaces shall comply with industry standards (e.g., National Information Exchange Model (NIEM), National Institute of Standards and Technology (NIST), HIPAA-compliance standards, Health level 7 (HL7), Fast Healthcare Interoperability Resources (FHIR)). | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements      |                |                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                       |                                    |                                  |                                                                         |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Interfaces                  | INR02          | The Contractor shall support the exchange of data between the System and the systems with which it interfaces (including external entities) to facilitate business functions that meet the requirements of Department policy, and federal and State rules and regulations.                                                                                                                                    | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR04          | The system shall send and receive real-time discrete transactions between modules and the State's integration platform to reduce the need for bulk data transfers.                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR05          | The Contractor's solution shall provide the ability to view raw daily interface files for up to sixty (60) calendar days. Archive raw daily interface files after sixty (60) calendar days and maintain for up to six (6) months.                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR06          | The Contractor's solution shall provide the ability to view raw monthly and quarterly interface files for up to one year (365) calendar days. Archive raw monthly and quarterly interface files for two years (730) calendar days and maintain for up to two (2) years.                                                                                                                                       | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR08          | The Contractor's solution shall include a process and toolset to maintain interfaces, code, and data models.                                                                                                                                                                                                                                                                                                  | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR11          | The Contractor shall design, develop and maintain interfaces. Each Application Program Interface (API) and components that will interface with the Systems Integration Services Integration Platform will be documented using a mutually agreed upon ICD template. This effort is performed in collaboration with other stakeholders in the State's healthcare programs enterprise.                           | Yes                                                                                   |                                    |                                  | D - Is an integrated third party product (COTS), requires configuration | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR12          | The Contractor shall ensure proprietary interfaces and protocols between modules are not used.                                                                                                                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR33          | The Contractor shall document all interfaces in the Agency's Interface Control Document (ICD) format which will include data layout documentation, data mapping crosswalk, inbound/outbound capability and frequency of all interfaces. The Agency will approve finalized interface designs detailed in the ICDs.                                                                                             | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Interfaces                  | INR34          | The Contractor's solution shall include all integrations/interfaces listed in Attachment F - Requirements Response Matrix in their overall fixed price.                                                                                                                                                                                                                                                       | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution               | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | O - Other                                              | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Key Personnel and Resources | KR01           | The Contractor can use off-shore and near-shore resources. However, offshore or near shore resources cannot develop security controls. The Contractor shall advise the Department when work is being completed by offshore or near shore resources. The Contractor shall ensure that all Contractor practices and procedures, including but not limited to secure coding practices are used by all resources. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement                  | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Key Personnel and Resources | KR02           | The Contractor, and any of its subcontractors, shall work cooperatively with module Contractors and Department staff to ensure the success of the program.                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement                  | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements      |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                       |                                    |                                  |                                                        |                                                        |                                                        |                                                        |                                                        |                        |

| Key Personnel and Resources | KR03           | The Contractor shall help prevent project delays and address them if they occur. This includes assurances that sufficient resources and knowledgeable, experienced staff are available to meet the required project schedule.                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR04           | The Contractor shall provide sufficient personnel to administer and execute required project activities, including approvals, during development, implementation, and operations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR07           | Key personnel described in the proposal shall become named resources on the project and are subject to the following requirements:<br><br>a. Key personnel shall not be transferred or removed without prior approval of the Department.<br><br>b. The Department will approve key personnel assigned to the Contract.<br><br>c. The Department reserves the right to request removal of any Contractor staff or subcontractor staff, if applicable, assigned to the project, and the Contractor shall comply with any such request immediately.<br><br>d. If a vacancy occurs in a key role, the Contractor shall fill the position in compliance with identified SLAs. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR08           | The Contractor must designate a Project Manager to represent and oversee the day-to-day activities of the project. This individual shall serve as the Department's primary point of contact for matters relating to the project and serve as a liaison for certification, collaborating with other contractors, and stakeholders.                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR09           | The Contractor's Project Manager must meet the following qualifications including:<br><br>a. A minimum of seven (7) years' project management experience managing projects of similar size and scope, preferably in Medicaid or the healthcare industry. This experience must include relevant experience within the last three (3) years from the release date of the RFP.<br><br>b. Project Management experience should include each phase of the system development life cycle.<br><br>c. Project management certification through the Project Management Institute (PMI) is preferred.                                                                              | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR11           | The Contractor's Integration Lead must meet the following qualifications including:<br>a. Minimum of five (5) years leading system design and integration projects, including the technical design and implementation of projects similar in size and scope to this project.<br>b. Experience must involve directing multi-discipline technical teams producing integration solutions (e.g., Service Oriented Architecture, network, hardware and software).<br>c. A Bachelor's Degree in Information Systems Engineering, Computer Science, or a related field is preferred.                                                                                            | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR12           | The Contractor must designate a Testing Lead to coordinate all testing activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR13           | The Contractor's Testing Lead must meet the following qualifications including:<br>a. Minimum of three (3) years experience leading testing activities for a project similar in size and scope to this project.<br>b. In-depth understanding of the testing lifecycle and all artifacts required to successfully validate the system.                                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR14           | The Contractor must designate a Contract Manager to be the single point of contact for matters concerning the Contractor's performance under the Contract. This person shall have the authority to make decisions that are binding to the Contract, shall be responsible for timely completion of the project, and shall be responsible for meeting all contractual obligations.                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR15           | The Contractor's Contract Manager must have a minimum of five (5) years' contract management experience managing related services with similar budgets, preferably in Medicaid or the healthcare industry and for a project similar in size and scope to this project.                                                                                                                                                                                                                                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and Resources | KR16           | The Contractor shall submit two (2) references for each of the key personnel being proposed for the project. Each reference should depict relevant and current experience for work completed no more than seven (7) years prior to the date of this RFP.                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements         |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                       |                                    |                                  |                                                        |                                                        |                                                        |                                                        |                                                        |                        |

| Key Personnel and<br>Resources | KR17           | The Contractor must demonstrate that it can commit an adequate level of technical and human resources sufficient to complete the project within the required time frame and to meet the quality requirements outlined in this RFP. Furthermore, the level of technical and human resources which the Contractor agrees to commit to the project at the time of proposal must be maintained throughout the life of the project at a necessary level to complete the scope of work.                                                                                                                                                             | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR18           | The Contractor's staff shall have sufficient experience appropriate for their role.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR19           | The Contractor must supply a Personnel Background Check Attestation (written documentation) of a favorable background check for Contractor personnel who might reasonably be expected to access sensitive and confidential member data contained in any system accessed during the course of the Contract. The Department may request the removal of staff for disqualifying offenses. Contractor must describe their process for performing background checks for non-US citizens or Green Card holders.                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR20           | The Contractor's Project Manager shall be required to perform work at the State's primary project location (e.g., city, state), unless approved by the Department to work remotely.                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR21           | The Contractor's staff shall be available Monday through Friday as early as 7:00 AM and as late as 6:00 PM in the time zone of the participating State.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR22           | For any work performed at a location other than the primary Project site, the Contractor must identify the specific location (city, state, country), describe the type of work to be performed, and the percent of the total hours for that type of work at that location.                                                                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR23           | The Contractor's staff working remotely, must be available to work in the State's primary project location at the Department's' request for functions necessary to support the scope of work (e.g., risk review meetings, root cause analysis sessions, integration planning, release planning, operational readiness reviews, UAT, implementation, and production deployment).                                                                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR25           | The Contractor's key personnel and/or management replacement must meet the minimum qualifications for the position . The Contractor shall provide a detailed resume for a proposed key personnel and/or management replacement. Replacements are subject to Department approval prior to any assignment.                                                                                                                                                                                                                                                                                                                                      | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR26           | The Contractor shall provide the appropriate level of knowledge transfer/training to Contractor staff.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR28           | The Contractor must designate a Certification Lead to coordinate all certification activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR29           | The Contractor's Certification Lead must meet the following qualifications including:<br><br>a. Minimum of three (3) years experience certifying systems against industry standards for projects similar in size and scope to this project.<br><br>b. In-depth understanding of the most current MECT certification lifecycle required to successfully validate the system.                                                                                                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR34           | The Contractor's key personnel positions may not be vacant for more than 10 Business Days without a qualified substitute (temporary replacement). A qualified substitute must be in place no more than 10 Business Days after the separation date of the vacating resource. The definition of a qualified substitute is someone meeting the requirements of the RFP and Contract Section 4. The Contractor may not fill vacant key personnel positions with other existing key personnel without approval by the Department. The Department will also have the authority to approve proposed replacements of key personnel by the Contractor. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Key Personnel and<br>Resources | KR35           | The Contractor must designate an Integration Lead to coordinate with the Systems Integrator, other module vendors, and other stakeholders, manage the design, configuration/build, integration, defect management, and implementation of the Contractor's scope of work.                                                                                                                                                                                                                                                                                                                                                                      | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements             |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                       |                                    |                                        |                                                                                                  |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                  |

The Contractor must identify other key personnel for the Operations, Maintenance and Configuration phase of the project. The Department will review and approve all key personnel.                                                                                                                                                                                                                  | No                                                                                    | Yes                                | Option D - State Specific Requirements | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                                                                  |
| Key Personnel and<br>Resources     | KR41           | For Option A - Financial, The Contractor shall provide key personnel at a minimum that include a Financial Services Project Manager, Financial Services Lead Analyst, during the DDI and Certification Phases of the Program. Key personnel shall not hold more than one key role unless otherwise approved by the Department. The Department will review and approve all key personnel.                                                                                                                                                                                                                                          | No                                                                                    | Yes                                | Option A - Financial                   | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                                                                  |
| Key Personnel and<br>Resources     | KR42           | For Option B - Call Center, The Contractor shall provide key personnel at a minimum that include a Call Center Implementation Project Manager, Call Center Lead Analyst, during the DDI and Certification Phases of the Program. Key personnel shall not hold more than one key role unless otherwise approved by the Department. The Department will review and approve all key personnel.                                                                                                                                                                                                                                       | No                                                                                    | Yes                                | Option B - Call Center                 | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                                                                  |
| Key Personnel and<br>Resources     | KR43           | For Option C - Federal Reporting, The Contractor shall provide key personnel at a minimum that include a Federal Reporting Implementation Project Manager, and three Federal Reporting Lead Analysts for the following areas: 1) Transformed Medicaid Statistical Information System ( TMSIS), 2) CMS-64, CMS-21, CMS-37, 3) All other state and Federal reporting during the DDI and Certification Phases of the Program. Key personnel shall not hold more than one key role unless otherwise approved by the Department. The Department will review and approve all key personnel.                                             | No                                                                                    | Yes                                | Option C - Federal Reporting           | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                                                                  |
| Member and Provider Call<br>Center | MPCC01         | The Contractor shall staff, operate, and maintain a call center for members and providers with staff that are experienced, knowledgeable, and certified (if necessary) on the Agency's policies and claims solution as defined by the Agency                                                                                                                                                                                                                                                                                                                                                                                      | No                                                                                    | Yes                                | Option B - Call Center                 | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                                                                  |
| Member and Provider Call<br>Center | MPCC02         | The Contractor shall provide an Automated Call Distribution (ACD) solution that intelligently prioritizes, sequences, and routes calls, via configurable workflow processes, in an order (e.g., agent availability, skill level, call type) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                             | No                                                                                    | Yes                                | Option B - Call Center                 | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call<br>Center | MPCC03         | The Contractor's solution shall provide the software and services to enable and support interactive communications via SMS, chat, and email between the call center staff, Agency staff, the Agency's designee , and member and provider stakeholders as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                   | No                                                                                    | Yes                                | Option B - Call Center                 | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements          |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                       |                                    |                                  |                                                                                                  |                                                                             |                                 |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                  |

| Requirement Section             | Requirement ID | Requirement Language                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Base Requirement<br>Applicable to Core<br>Claims Solution and All<br>Proposed Options | Requirement<br>Option<br>Indicator | Requirement Option<br>Assignment | General Status                                                                                   | Production<br>Status                                                        | Product<br>Type                 | Hosting                 | Security Tested                                                                                                                                                                                                                                                                                                                                                                                                                                      | Additional Information                                           |
| Member and Provider Call Center | MPCC04         | The Contractor's solution shall provide HIPAA-compliant interactive communication methods (e.g., email, text chat) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC05         | The Contractor's solution shall provide automatic screen presentation of member/provider data (e.g., name, provider or member ID, phone number, email address, preferred language, associated documents, historical call records) when the call is answered as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                        | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC06         | The Contractor's solution shall provide multiple language options (e.g., English, Spanish) and services for the hearing impaired (TTY/TTD) as defined by the agency                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC07         | The Contractor's solution shall provide and maintain industry standard quality monitoring capability (e.g., silent monitoring, assignment of unique tracking numbers, voice and screen/multi-media capturing) to analyze the entire call experience as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC08         | The Contractor's solution shall track, store, monitor, maintain, report and display on a dashboard call center statistics at intervals as defined by the Agency (e.g., real time, weekly, monthly, quarterly, and annually) to include, but not limited to:<br>a) Abandon rate<br>b) Availability and agent utilization<br>c) Average speed of answer (ASA)<br>d) Call duration (e.g., minutes, seconds)<br>e) Call volume<br>f) Customer satisfaction<br>g) Contact time (e.g., minutes, seconds)<br>h) One call resolution rate<br>i) Peak hour statistics<br>j) Identification of historical trends<br>k) Busy signal<br>l) Disconnected calls<br>m) Other areas as defined by the Agency | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC09         | The Contractor's solution shall provide searchable and viewable communication management system that tracks all call center activities and communications, including all correspondence that is generated to and received from providers and members.                                                                                                                                                                                                                                                                                                                                                                                                                                        | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC10         | The Contractor's solution shall provide, maintain and operate a secure interactive voice response system (IVRS) with a Contractor-supplied telephone number(s) (e.g., local, toll-free), as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC11         | The Contractor shall provide an Interactive Voice Response System (IVRS) that allows a caller to select an option to reach a live call center representative during hours of operation with the ability to support call center integration with a configurable menu-driven design, as defined by the Agency, that allows for efficient navigation to the appropriate resource(s). In addition the IVRS shall support configurable scripts for announcements and messages (e.g., regarding hours of operation, emergencies, and system availability) as defined by the Agency.                                                                                                                | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC12         | The Contractor's solution shall provide configurable role-based menus to authorized users that restricts the user's access to information appropriate for the user type as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements          |                |                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                       |                                    |                                  |                                                                                                  |                                                                             |                                 |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                  |

| Member and Provider Call Center | MPCC13         | The Contractor shall create, configure, and maintain Agency approved IVRS voice messages, messages, responses, prompts by the required implementation date.                                                                                                                                                                                                                                                                                 | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC14         | The Contractor's solution shall provide the appropriate and scalable number of in-bound and out-bound access lines to meet caller demand based on monthly statistics as defined by the Agency.                                                                                                                                                                                                                                              | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC15         | The Contractor's solution shall provide the ability to log and track incoming calls with call reason and queue codes (e.g., eligibility, claims, EDI, helpdesk) as defined by the Agency.                                                                                                                                                                                                                                                   | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC16         | The Contractor's solution shall provide the ability to log and track outgoing calls with call reason and queue codes (e.g., eligibility, claims, EDI, helpdesk) as defined by the Agency.                                                                                                                                                                                                                                                   | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC17         | The Contractor's solution shall provide the capability to store, track, prioritize, and maintain a configurable log (e.g., date/time reported, issue, description, follow up completed, resolution, escalation contact and workflow) of member and provider complaints received by the call center through the resolution and closure of the complaint. The Agency will have real-time access to detailed information about all complaints. | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC18         | The Contractor's solution shall capture, store, maintain, and report detailed information, including a unique transaction number, for all inquiries made to the ACD, IVRS and FAXBACK including information requested and conveyed, as defined by the Agency.                                                                                                                                                                               | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC19         | The Contractor's solution shall capture, record, store, and maintain call information (e.g., time and date of call, duration, name and contact information, reason for calling, agent response, status of resolution, resolution description) for operations staff to utilize for research and/or auditing purposes as defined by the Agency.                                                                                               | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC20         | The Contractor's solution shall capture, store, monitor, maintain, report and display all unique transactions (e.g., ACD, IVRS, Faxback) on a dashboard by transaction type with the ability to search and filter (e.g., call type, provider or member ID, name, representative's ID or name, or a combination of these data elements) and view the audit trail of each transaction as defined by the Agency.                               | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC21         | The Contractor's solution shall have the ability to automatically or manually route calls (e.g., internal, external, IVRS/FaxBack, voicemail) between the IVRS and the ACD as defined by the Agency.                                                                                                                                                                                                                                        | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center | MPCC22         | The Contractor's solution shall have the ability to update callers within the queue regarding how long the anticipated wait time is until their call is answered, with a routing option to leave a voicemail as defined by the Agency.                                                                                                                                                                                                      | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements                     |                |                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                       |                                    |                                  |                                                                                                  |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                  |

| Member and Provider Call Center            | MPCC23         | The Contractor shall conduct quality call monitoring on a randomly selected sample of daily calls (a minimum of one half of one percent (0.005%) and no less than one call per agent, per day). The Contractor shall document and retain results of the quality call monitoring and submit the reports to the Agency.                                                                                                        | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center            | MPCC24         | The Contractor shall provide certified language interpretation (for verbal communication) and translation (for written communication) services for all callers and correspondence.                                                                                                                                                                                                                                           | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center            | MPCC25         | The Contractor's solution shall utilize the same call center solution for both provider and member help line.                                                                                                                                                                                                                                                                                                                | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center            | MPCC26         | The Contractor's solution shall provide users the ability to attach or link one or more associated documents (e.g., MS Word, Excel, PDF, image) to one or more unique call records and allow for viewing , printing, emailing, or faxing of documents from within the call or linked call record, as defined by the Agency.                                                                                                  | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center            | MPCC27         | The Contractor's solution shall provide the ability to survey callers to rate performance measures (e.g., quality, timeliness, and other service delivery elements carried out by the Call Center) as defined by the Agency. The Contractor's solution shall capture caller satisfaction scores to determine the average satisfaction percentage score.                                                                      | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Member and Provider Call Center            | MPCC28         | The Contractor shall capture, store, and maintain a multimedia recording of each distinct call center agent interaction with supporting index information (e.g., agent, topic, authorized user id, member id, provider id, date/time) as defined by the Agency. Upon request, provide the Agency with electronic copies of multimedia recordings which shall be archived according to Agency defined retention requirements. | No                                                                                    | Yes                                | Option B - Call Center           | C - Is an integrated third party product (COTS), requires no configuration or custom development | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. | 100% hosted in cloud-based geographically redundant data centers |
| Operations, Maintenance, and Configuration | OMC01          | The Contractor shall cooperate and assist the Department in responding to all law enforcement, federal and State audit and review requests. The Contractor shall provide audit support including, random sample generation, data extracts, hard-copy documents, and provide any requested data or information.                                                                                                               | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement                                           | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                                                                  |
| Operations, Maintenance, and Configuration | OMC02          | The Contractor shall support the disaster recovery activities that will provide timely failover and create relevant documented policies and procedures to implement a recovery.                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                                        | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                                                                  |
| Operations, Maintenance, and Configuration | OMC03          | The Contractor shall conduct an annual test of the Disaster Recovery and Business Continuity Plan and submit the Disaster Recover/Business Continuity Test Report that includes the outcome, corrective action plan, and revisions, if any, to the Department.                                                                                                                                                               | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                                        | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                                                                  |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements                        |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Operations, Maintenance,<br>and Configuration | OMC04          | The Contractor shall provide Operations support, Maintenance, and ongoing Configuration of the provided Solution(s) throughout the life of the Contract. This includes providing Operations support as described in the scope of work as well as providing Maintenance and Enhancements to the provided Solution(s). The Contractor will follow project management and system development processes throughout the life of the Contract.<br><br>The Department defines maintenance for each module as follows:<br><br>1. Making configuration updates as requested by the State. Configuration includes changes to table values, parameters, codes, and business logic, including hardcoded business logic.<br><br>2. Correcting deficiencies (defects) found in the solution(s) based on detailed requirements described in the scope of work and published design specifications.<br><br>3. Correcting deficiencies (defects) found in the solution(s) based on a failure to meet the detailed requirements in completed enhancement, configuration or maintenance requests.<br><br>4. Conducting research requested by the State or required to support the Department. For example:<br><br>a. System behavior and results<br><br>b. New healthcare initiatives<br><br>c. Best practices research across states and industry<br><br>d. Impacts of new State and federal legislation<br><br>5. Performing mass adjustments or mass changes as requested by the | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Operations, Maintenance,<br>and Configuration | OMC05          | The Contractor shall provide a notification web page that displays when the system is unavailable for scheduled maintenance or unscheduled outages.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Operations, Maintenance,<br>and Configuration | OMC06          | The Contractor shall have processes in place to restrict access when inappropriate system access or misuse is detected.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Operations, Maintenance,<br>and Configuration | OMC07          | The Contractor shall test and implement all production ready patches, upgrades, and releases for all software, firmware and operating systems in a timely manner, in coordination with other modules.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Operations, Maintenance,<br>and Configuration | OMC12          | The Contractor shall notify the appropriate user community, as defined by the State, of system events (e.g., major system changes and system outages).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Operations, Maintenance,<br>and Configuration | OMC15          | The module Contractor shall provide help desk services to provide level 0 (customer self-service) level 1(basic support), level 2 (moderate support) that includes as appropriate, escalation to the State and level 3 (technical/integration) support related to the functionality of the module's scope of work. Level 1 help desk is the first point of contact and is responsible for logging the issue and, if possible, assisting the user.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Operations, Maintenance,<br>and Configuration | OMC16          | The Contractor shall provide online help for external and internal users.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Operations, Maintenance,<br>and Configuration | OMC18          | The Contractor shall notify the Department when updated reference materials (e.g., Requirements Matrices, Manuals, System Documentation, System Design Documentation, User Documentation, Business Rules Catalog, and Training Materials) are available for review.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Operations, Maintenance,<br>and Configuration | OMC19          | The Contractor shall provide 24x7 access to the Department for all reference materials (e.g., Requirements Matrices, Manuals, System Documentation, System Design Documentation, User Documentation, Business Rules Catalog, and Training Materials).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements                        |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                       |                                    |                                  |                                                        |                                                        |                                                        |                                                        |                                                        |                        |

| Operations, Maintenance,<br>and Configuration | OMC30          | The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.                                                                                                                                                                                | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Operations, Maintenance,<br>and Configuration | OMC31          | The Contractor will provide 4,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 4,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Operations, Maintenance,<br>and Configuration | OMC32          | The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.                                                                                                                                                                               | No                                                                                    | Yes                                | Option A - Financial             | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Operations, Maintenance,<br>and Configuration | OMC33          | The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. | No                                                                                    | Yes                                | Option A - Financial             | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements                        |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                       |                                    |                                  |                                                        |                                                        |                                                        |                                                        |                                                        |                        |

| Operations, Maintenance,<br>and Configuration | OMC34          | The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.                                                                                                                                                                               | No                                                                                    | Yes                                | Option B - Call Center           | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Operations, Maintenance,<br>and Configuration | OMC35          | The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. | No                                                                                    | Yes                                | Option B - Call Center           | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Operations, Maintenance,<br>and Configuration | OMC36          | The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements                        |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                       |                                    |                                        |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Operations, Maintenance,<br>and Configuration | OMC38          | The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.                                                                                                                                                                               | No                                                                                    | Yes                                | Option D - State Specific Requirements | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Operations, Maintenance,<br>and Configuration | OMC39          | The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. | No                                                                                    | Yes                                | Option D - State Specific Requirements | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Performance                                   | PRFM01         | The Contractor shall develop a method for maintaining performance compliance with Service Level Agreements (SLA).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                        | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Performance                                   | PRFM04         | The Contractor shall meet Service Level Agreements and integrate tools for monitoring system and component performance and create the necessary reports or supply a dashboard to support SLAs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                        | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Performance                                   | PRFM05         | The system shall track performance measures for each SLA requirement using predefined and ad hoc reporting methods                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                        | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment                           | PP01           | The Contractor's solution shall store, on the header and/or each claim line, the claims payment methodology used to adjudicate the respective header and/or claim line.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | No                                                                                    |                                    |                                        | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment                           | PP02           | The Contractor's solution shall provide a configurable hierarchy of pricing and reimbursement methodologies determined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                        | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment                           | PP03           | The Contractor's solution shall accept and process Medicare crossover claims using Medicare coinsurance and deductible amounts on the coordination of benefits segment/s using Agency configurable rules (e.g., claim type, provider type, benefit package, age, Medicare coinsurance, Medicare Deductible, Medicaid allowed, etc. with Medicaid as the payer of last resort).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                        | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                  |                                                                                       |                                    |                                  |                                                           |                                                                                                   |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Pricing and Payment    | PP04           | The Contractor's solution shall ensure all applicable third-party payment information is captured, stored, applied, and reported based on Agency configurable business rules.                                                                                                                                                                    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP05           | The Contractor's solution shall identify claims applicable for drug rebate processing and post appropriate claim edits in accordance with 42 USC 1396r-8 PAYMENT FOR COVERED OUTPATIENT DRUGS (e.g., Medicare crossover, physician administered drugs), store a drug rebate indicator, and transmit the required data to the appropriate system. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP06           | The Contractor's solution shall reimburse providers based on Medicare's Outpatient Prospective Payment System (OPPS), based on Agency configurable business rules (e.g., Ambulatory Surgery Center, Hospital Outpatient, Comprehensive Outpatient Rehabilitation Facility (CORF)).                                                               | No                                                                                    |                                    |                                  | F - Requires custom development                           | S3 - This functionality is not currently offered, but will offer for this engagement (1st client) | SaaS - Software as a Service | T - Third Party Hosting | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| Pricing and Payment    | PP07           | The Contractor's solution shall provide a clinical claims editor (grouper) with the capability to price inpatient hospital services according to DRG methodologies defined by the Agency.                                                                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP08           | The Contractor's solution shall obtain transportation documentation via interface from the Agency's Ambulance Trip Reporting System and store the documentation associated with the claim in order to fully adjudicate ambulance transportation claims.                                                                                          | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP09           | The Contractor's solution shall allow for configurable claim copays and/or cost-share assessments (e.g., benefit plan, age, claim type, service, provider, race, IHS utilization, nursing home residents, household limits by time period, and cost-share coordination) as defined by the Agency.                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP10           | The Contractor's solution pricing process shall establish the allowed amount of the claim prior to member copay and/or cost-share amount.                                                                                                                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP11           | The Contractor's solution shall capture, store, maintain, and report deductibles, copay, and coinsurance paid by member and benefit plan and/or program type.                                                                                                                                                                                    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP12           | The Contractor's solution shall have the ability to capture, store, report, and apply multiple third party payments (e.g., primary, secondary, tertiary) to a single claim in the order indicated on the TPL data source.                                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP13           | The Contractor's solution shall accept member liability (e.g., Spenddown, nursing home, maximum out-of-pocket, cost-share coordination), information from relevant source(s) (e.g., eligibility, financial) and apply configurable business rules to deduct the liability from the appropriate claims.                                           | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                         |                                                                                       |                                    |                                  |                                                                            |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Pricing and Payment    | PP14           | The Contractor's solution shall track copays applied and/or credited for each assessment period.                                                                                                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP15           | The Contractor's solution shall notify the provider of cost sharing deducted from each claim (e.g. EOB, CARCs, RARCs, remittance advice (RAs)).                                                                                                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP16           | The Contractor's solution shall provide the capability to view and maintain cost share information (e.g., maximum out of pocket, cost share) and generate notification as specified by the Agency.                                                                                      | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP17           | The contractor's solution shall track cost sharing applied and/or adjusted/voided/credited for each assessment period and create a new assessment period as defined by the Agency.                                                                                                      | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP18           | The Contractor's solution shall calculate each claim's cost share (e.g., copayments, LTC patient liability) as specified by the Agency.                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP19           | The Contractor's solution shall price claims according to pricing data and reimbursement methodologies applicable on the date(s) of service on the claim.                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP20           | The Contractor's solution shall include configurable alerts to notify the appropriate work unit of any payment changes requiring further review or investigation (e.g. statistical variances or rapid payment changes). The Agency shall define the work unit and notification process. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP21           | The Contractor's solution shall reimburse providers' inpatient claims identified as client transfers based on the Agency's pricing methodology.                                                                                                                                         | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP22           | The Contractor's solution shall reimburse providers short stay inpatient claims based on the Agency's pricing methodology.                                                                                                                                                              | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP23           | The Contractor's solution shall reimburse providers pro-rated eligibility inpatient claims (e.g., overlapping benefit plans, changes in benefit plan) based on the Agency's pricing methodology.                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                          |                                                                                       |                                    |                                  |                                                                            |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Pricing and Payment    | PP24           | The Contractor's Solution shall have the ability to support outlier and interim billing as defined by the Agency.                                                                                                                                                                                                                        | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP25           | The Contractor's solution shall provide the capability for the Agency to utilize multiple criteria to price services at different rates (e.g., geographic region, benefit plan).                                                                                                                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP26           | The Contractor's solution provide the capability to exempt select services or members from cost share based on Federal or State law (e.g., emergency services, preventive services, family planning services, pregnancy related services, generic drugs, immunizations, EPSDT) as defined by the Agency.                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP27           | The Contractor's solution shall provide the ability to create and modify rate types (e.g., rate increases/decreases, payment methodologies, beginning and end dates, date of service) based Agency defined business rules. All changes shall be effective dated and provide the user the capability to perform the changes in real time. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP28           | The Contractor's solution shall provide capability to price medical claims that include physician administered drugs, including compound drugs, as defined by the Agency.                                                                                                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP29           | The Contractor's solution shall have the ability to apply a rate cap to claim line items based on the prior authorized rate, as defined by the Agency.                                                                                                                                                                                   | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP30           | The Contractor's solution shall have the ability to calculate and apply member liability at the header or line level (e.g., FPL, aid category, benefit plan, monthly out of pocket maximum allowance, or other factors) as defined by the Agency.                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP31           | The Contractor's solution shall set a manual pricing indicator flag on a claim that is manually priced by a user. The solution shall capture and store the reason for the manual pricing and identify the user.                                                                                                                          | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP32           | The Contractor's solution shall provide a grouping functionality that supports header and line level grouping methodologies (e.g., APR-DRG, APC ) as defined by the Agency.                                                                                                                                                              | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP33           | The Contractor's solution shall utilize configurable data elements and business rules that support the requirements of 42 CFR 447.                                                                                                                                                                                                       | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                       |                                    |                                  |                                                                            |                                                                                                   |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Pricing and Payment    | PP34           | The Contractor's solution shall retain pricing and reimbursement methodologies and their details (e.g., effective and end date, parameters, indicators, gender, age, units, benefit plan) and the audit history of all changes for the determined retention period as defined by the Agency.                                                                                                                                                                       | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP35           | The Contractor's solution shall price all claims according to benefit plans, provider contracts, and methodologies as directed by the Agency.                                                                                                                                                                                                                                                                                                                      | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP36           | The Contractor's solution shall apply automatic payment adjustments (e.g., incentives and penalties, fixed rates, percentage of approved payments) and apply appropriate incentive pricing as defined by the Agency.                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP37           | The Contractor's solution shall provide the ability to configure payment adjustments (e.g., incentives and penalties, fixed rates, percentage, benefit plan) and schedule or automatically execute in real time the adjustment of claims as defined by the Agency.                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP38           | The Contractor's solution shall have the ability to price global services (e.g., bariatric surgery, surgical services, surgery, pre- and post-op, prenatal) based on a primary procedure code. Additionally, the solution should allow for pricing incremental services related to the primary procedure code (e.g., lab services, pre- or post-op to the primary service) or services and procedures deemed related and concurrent to the primary procedure code. | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP39           | The Contractor's solution shall apply prior authorization constraints when computing payment amounts using Agency defined criteria.                                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP40           | The Contractor's solution shall issue reimbursement to one or more payees, some of which are different than the billing provider, as defined by the Agency.                                                                                                                                                                                                                                                                                                        | No                                                                                    |                                    |                                  | F - Requires custom development                                            | S3 - This functionality is not currently offered, but will offer for this engagement (1st client) | SaaS - Software as a Service | T - Third Party Hosting | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| Pricing and Payment    | PP41           | The Contractor's solution shall provide the ability to configure, record, and maintain the proportion of the payment (e.g., percentage, fixed amount, claim type, provider type, service) to be reimbursed to each payee as defined by the Agency.                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP42           | The Contractor's solution shall perform claims processing for encounter claims, including editing, pricing, reporting, in a manner consistent with the standard fee for service claims (i.e., shadow pricing). The results shall be stored and no reimbursement to the provider will be generated.                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP43           | The Contractor's solution shall, upon receipt of TPL information, automatically adjust claims with dates of service within the TPL effective dates.                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                       |                                    |                                  |                                                           |                                                                                                   |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Pricing and Payment    | PP44           | The Contractor's solution shall create and maintain an annual maximum payout limit for providers and other Agency-designated entities providing specific services, and have the ability to cease payments once the established annual limit has been reached as defined by the Agency.                                                                                                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP45           | The Contractor's solution shall store the adjudicated encounter claim results (including the managed care plan's paid amount and the shadow-priced fee for service rates) applied to each encounter claim.                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP46           | The Contractor's solution shall provide a remittance advice file to the source that includes the adjudication results of each encounter claim, and exclude shadow pricing information.                                                                                                                                                                                                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP47           | The Contractor's solution shall receive, store, and update multiple provider per diem rates based on member level of care and/or the provider's qualifications based on configurable business rules.                                                                                                                                                                                                                           | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP48           | The Contractor's solution shall place claims in suspended status for program or waiver funding limitations, and allow authorized users the ability to release claims for payment upon review.                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP49           | The Contractor's solution shall, upon reaching the threshold amount for program or waiver claims, reimburse on a pro-rated basis until the expenditure allowance is reached. Once the maximum expenditure threshold is met, then pay no further claims.                                                                                                                                                                        | No                                                                                    |                                    |                                  | F - Requires custom development                           | S3 - This functionality is not currently offered, but will offer for this engagement (1st client) | SaaS - Software as a Service | T - Third Party Hosting | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| Pricing and Payment    | PP50           | The Contractor's solution shall receive, maintain, and store all Medicare Part A, B, and D claims payment information as specified by the Agency.                                                                                                                                                                                                                                                                              | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP51           | The Contractor's solution shall capture, store, maintain, update, display, and report all claim processing activity (e.g., adjudication status, suspended claims by status and location, claims origin, adjustments, pre-adjudication validation, payment status ) as defined by the Agency.                                                                                                                                   | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP52           | The Contractor's solution shall adjudicate crossover claims at the detailed line item or header level based on Agency configurable business rules.                                                                                                                                                                                                                                                                             | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP53           | The Contractor's solution shall accurately calculate based on Agency configurable business rules, allowable reimbursement criteria for each service according to date specific rules and limitations applicable to each claim and encounter type, including service, pricing modifiers (multiple), benefit plan, category of service, and provider type/specialty in accordance with program policy established by the Agency. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Requirement Section    | Requirement ID | Requirement Language                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Base Requirement<br>Applicable to Core<br>Claims Solution and All<br>Proposed Options | Requirement<br>Option<br>Indicator | Requirement Option<br>Assignment | General Status                                            | Production<br>Status                                                        | Product<br>Type                                        | Hosting                                                | Security Tested                                                                                                                                                                                                                                                                                                                                                                                                                                      | Additional Information |
| Pricing and Payment    | PP54           | The Contractor's solution shall provide automated processing logic to price out-of-state claims (e.g., local rate, percent of charges, or suspend for manual pricing) based on configurable business rules defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP55           | The Contractor's solution shall allow payment to fee-for-service providers for services rendered to members in pre-enrollment periods or other periods of transition (e.g., presumptive eligibility) based on configurable business rules defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP56           | The Contractor's solution shall produce and maintain state-specific companion and user guides, payer sheets, and/or fee schedule as directed by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Pricing and Payment    | PP57           | The Contractor's solution shall provide pricing methodologies as defined by the Agency and compliant with 42 CFR 447 to include, but not limited to:<br>a) provider contracted rates<br>b) CPT/HCPS/CDT and modifier codes<br>c) fee schedule for the corresponding date<br>d) RBRVS claims<br>e) Manual pricing<br>f) Place of service<br>g) Specialty type<br>h) Pay by report<br>i) Age range<br>j) Category of service<br>k) CDT procedure code fee schedule<br>l) Revenue codes<br>m) APR-DRG (Diagnosis-Related Group)<br>n) APG<br>o) Per Diem at provider specific rates<br>p) Add-on pricing amounts to any pricing structures based on other claim attributes (e.g. service facility, provider type/specialty, place of service etc.)<br>q) Provider specific encounter rate<br>r) Variable percentage of billed charge<br>s) Variable percentage based on provider type (FQHC, RHC, IHSp)<br>t) PMPM with line level detail<br>u) Medicare's Outpatient Prospective Payment System<br>v) Bundled/unbundled pricing<br>w) Global service pricing<br>x) Calculation required for resource-based relative value system fee schedule for radiology, anesthesia, and general medical services<br>y) Tiered pricing into which a variety of services are grouped depending on the treatment type and intensity of care required<br>z) Invoicing pricing (e.g., plus/minus percentage, procedure code)<br>aa) Geographic designation<br>bb) Lab pricing | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP58           | The contractor solution shall identify, accept, adjudicate, and store claims (e. g. medical inpatient, outpatient, crossover) submitted with procedure codes for physician administered drugs and require and capture the corresponding NDC.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. | Pricing and Payment    | PP59           | The Contractor's solution shall capture, store, maintain, and send the data required to invoice manufacturers for the drug rebate including any adjustments or credits to the claim as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP60           | The Contractor's solution shall have automated pricing logic to convert time measurement units into the correct dollar value for payment (e.g., anesthesia)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP61           | The Contractor's solution shall allow for Payees to receive one payment and remittance advice (or ANSI X12 835) for services provided under one or more benefit plans based on configurable business rules.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                       |                                    |                                  |                                                                            |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Pricing and Payment    | PP62           | The Contractor's solution shall provide bidirectional navigation (drill up/drill down) between the remittance advice and the corresponding financial transaction details.                                                                                                                                                                                                                                                                                                                                                                                             | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP63           | The Contractor's solution shall automate the claw back process and Medicare accounts payable process based on configurable business rules.                                                                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP64           | The Contractor's solution shall allow authorized users to manually create accounts payable for HIPP cases, based on configurable business rules.                                                                                                                                                                                                                                                                                                                                                                                                                      | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP65           | The Contractor's solution shall associate all Health Insurance Premium Payment Program (HIPP) accounts payables to the Member even if the Payee is not the Member.                                                                                                                                                                                                                                                                                                                                                                                                    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP66           | The Contractor's solution shall have the ability to generate separate remittance advices for transactions based on which Entity is responsible for payment as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP67           | The Contractor's solution shall have the ability to pay prior-authorized non-emergency transportation payments in part or in total, based on configurable business rules.                                                                                                                                                                                                                                                                                                                                                                                             | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP68           | The Contractor's solution shall manage the payment processes for Medicare programs (e.g., buy-in, claw back, Part D) related to Agency Healthcare Programs as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP69           | The Contractor's solution shall generate a detailed remittance advice in electronic and/or printed report format (e.g., paid claims, denied claims, reason and remark codes, error codes, payments, voids, suspensions and payment adjustments) for each Payee and/or Provider that reflects all financial activity in a payment cycle. The remittance advice will be formatted according to Agency's defined standards and language and include CMS required information (e.g., the NPI of the physician or other professional who ordered or referred the service). | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP70           | The Contractor's solution shall update financial transactions with payment identification details (e.g., check number, warrant number, paid date, amount paid) when the information is returned from external Entity.                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP71           | The Contractor's solution shall allow for Health Insurance Premium Payment Program (HIPP) payments to be created for Members or non-Members (e.g., insurance carrier, employer, policy holders), based on configurable business rules.                                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                   |                                                                                       |                                    |                                  |                                                                            |                                                                                                   |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Requirement Section    | Requirement ID | Requirement Language                                                                                                                                                                                                                                                                              | Base Requirement<br>Applicable to Core<br>Claims Solution and All<br>Proposed Options | Requirement<br>Option<br>Indicator | Requirement Option<br>Assignment | General Status                                                             | Production<br>Status                                                                              | Product<br>Type              | Hosting                 | Security Tested                                                                                                                                                                                                                                                                                                                                                                                                                                      | Additional Information |
| Pricing and Payment    | PP72           | The Contractor's solution shall capture and allow entry of additional detail in a Health Insurance Premium Payment Program (HIPP) case (e.g., policy holder name, date of birth, gender) as defined by the Agency.                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP73           | The Contractor's solution shall receive, and allow for entry or end date of the details (e.g., diagnosis, age, gender, cost, percentage) needed to do a cost effectiveness evaluation for the Health Insurance Premium Payment Program (HIPP) as defined by the Agency.                           | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP74           | The Contractor's solution shall automatically perform the cost-effectiveness calculation using information(e.g. claims history) for a redetermination and update information (e.g., premium amount) on the case for the Health Insurance Premium Payment Program (HIPP) as defined by the Agency. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP75           | The Contractor's solution shall have the ability to automatically create a new HIPP case and allow for users to manually enter one as defined by the Agency.                                                                                                                                      | No                                                                                    |                                    |                                  | F - Requires custom development                                            | S3 - This functionality is not currently offered, but will offer for this engagement (1st client) | SaaS - Software as a Service | T - Third Party Hosting | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| Pricing and Payment    | PP76           | The Contractor's solution shall automatically assign unique case numbers on new Health Insurance Premium Payment Program (HIPP) cases as defined by the Agency.                                                                                                                                   | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP77           | The Contractor's solution shall receive, store, maintain, display, and update detail information related to the member's third-party insurance policy (e.g. number, type, status) as defined by the Agency                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP78           | The Contractor's solution shall have the capability to associate a Group Policy Provider with a current Health Insurance Premium Payment Program (HIPP) case automatically and by user as defined by the Agency.                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP79           | The Contractor's solution shall allow users to trigger a recalculation of the cost-effectiveness for the Health Insurance Premium Payment Program (HIPP) Program as defined by the Agency.                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP80           | The Contractor's solution shall have the ability to automatically recalculate the cost-effectiveness for a HIPP case when a field used in the calculation is changed as defined by the Agency.                                                                                                    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment    | PP82           | The Contractor's solution shall have the ability to automatically check non-emergency transportation transactions against medical claims before reimbursing, based on configurable business rules.                                                                                                | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers                       | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements        |                |                                                                                                                                                                                                                                                                                                                           |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Pricing and Payment           | PP83           | The Contractor's solution shall allow for HIPP cases to have household members who are not enrolled in the HIPP program as defined by the Agency.                                                                                                                                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment           | PP84           | The Contractor's solution shall perform a reconciliation of the federal invoices for Medicare State Phase-Down contributions (also referred to as Claw back) and Medicare Buy-in payments against our member data. Invoices are corrected based on the reconciliation and submitted to Medicare as defined by the Agency. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment           | PP85           | The Contractor's solution shall receive, store, maintain, and display Payee (e.g. HIPP) information (e.g., tax, banking, address, contact, preferred payment method) for each Payee as defined by the Agency.                                                                                                             | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment           | PP86           | The Contractor's solution shall have the ability to pay a non-Member for expenses incurred for a Member (e.g., in state or out of state transportation, HIPP) and associate the payment with the Member's record as defined by the Agency.                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment           | PP87           | The Contractor's solution shall provide notes capability for all financial types (e.g., Health Insurance Premium Program (HIPP), Eligibility). The notes capability must include standard fields (e.g., date, category) and text fields as defined by the Agency.                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment           | PP88           | The Contractor's solution shall process, track and report financial transactions related to Lump Sum payments (e.g., DSH, GME) and alert Agency staff and Payee via their preferred notification method as defined by the Agency.                                                                                         | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment           | PP89           | The Contractor's solution shall capture, store, and maintain current and historical participant criteria (e.g., effective dates, income, family size, etc.) to calculate and apply participant cost-sharing, including premiums and co-pays, for particular benefits based on federal and/or Agency specific criteria.    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Pricing and Payment           | PP90           | The Contractor's solution will generate payments and remittance advice daily (or at an interval defined by the agency).                                                                                                                                                                                                   | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Project Closeout and Turnover | PTO01          | The Contractor shall provide a turnover approach and the services required for the transition of operations, services and module components.                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements        |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                       |                                    |                                  |                                                        |                                                        |                                                        |                                                        |                                                        |                        |

| Project Closeout and Turnover | PTO02          | At least six (6) months prior to the final Contract year (including option years that have been exercised) and at least six (6) months prior to the end of any contract extension(s), the Contractor shall provide the following:<br><br>a. An updated Turnover Plan.<br><br>b. Complete and update system and user documentation.<br><br>c. Statement of the resources that would be required by the Department or another contractor to fully take over solution, technical, and business functions outlined in the Contract(s). This includes quantity and types of resources and volume of tasks to support the scope of work.<br><br>d. Operational tasks and procedures as necessary to support ongoing operations of the solution.<br><br>e. Lessons learned report.<br><br>f. List of incomplete tasks, such as system defects, modifications or enhancements, mass adjustments, reference updates, and configuration requests.<br><br>g. A detailed description of the services that would be required by another Contractor to fully take over system, technical, and business functions outlined in the Contract.<br><br>The Department reserves the right to request this information at any time throughout the Contract. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Closeout and Turnover | PTO03          | The Contractor shall provide a Monthly Turnover Report reflecting transition activities during the turnover period.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Closeout and Turnover | PTO04          | The Contractor shall provide operational procedures that describe how maintenance is performed for the solution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Closeout and Turnover | PTO05          | The Contractor shall cooperate with the successor contractor while providing all required turnover services. This will include meeting with the successor and devising work schedules that are agreeable for both the Department and the successor contractor.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Closeout and Turnover | PTO06          | The Contractor must transfer solution and services documentation and all data requested by the State to the State.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Closeout and Turnover | PTO07          | The Contractor shall deliver a Turnover Results Report that documents completion of each step of the Turnover Plan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management            | PMT01          | The Contractor shall provide licenses as required by the Agency to allow users access to perform all necessary business functions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management            | PMT02          | The Contractor shall support the Department in all program governance activities as necessary.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management            | PMT03          | The Contractor shall be responsible for the capture and dissemination to the Department of agendas, meeting minutes and documentation necessary for successful execution of the project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management            | PMT04          | The Contractor shall participate in necessary meetings with the stakeholders and/or other Contractors.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management            | PMT05          | The Contractor shall provide deliverables or documentation as defined in the Project Work Plan (PWP) and approved by the Department.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                       |                                    |                                  |                                                        |                                                        |                                                        |                                                        |                                                        |                        |

| Project Management     | PMT08          | The Contractor shall support the State and its Contractor(s) in Independent Verification and Validation (IV&V) activities associated with the contract including CMS Certification(s).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT09          | The Contractor shall conduct a monthly status meeting to discuss project tasks and activities (e.g., deliverables, milestones, issues, risks, and SLAs).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT10          | The Contractor shall conduct weekly meetings to discuss issues, risks, progress of current projects, solution changes, resource changes, and other areas specific to the scope of work.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT11          | The Contractor must employ a project management approach that will satisfy the scope of work and incorporate all activities described in the RFP. The Contractor shall adjust the project management approach or project schedules, as necessary, to collaborate with the module vendors in order to incrementally build the enterprise platform.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT12          | The Contractor shall conduct a project initiation kick-off meeting with key stakeholders and the State's project team.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT13          | The Contractor shall implement procedures and tools for tracking project action items, decisions, issues, risks and defects.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT14          | The Contractor shall provide an electronic document repository for project documents and deliverables. The Contractor, Department staff and other contractors with the appropriate security level must have the ability to upload/attach new or revised versions of documents. The repository must perform version control and allow users to view all prior versions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT16          | The Contractor shall provide deliverables that at a minimum meet the following quality standards:<br>a. Provide accurate and comprehensive content, reflecting the specific requirements for the deliverable.<br>b. Ensure appropriate technical level for the audience.<br>c. Utilize correct grammar, spelling, and versioning.<br>d. Ensure diagrams are clear, concise, and value added.<br>e. Follow industry-related standards.<br>f. Appropriately define and reference information.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT17          | The Contractor shall submit a monthly status report. The monthly status report must contain, at a minimum:<br><br>a. A complete set of updated and current output from the Project Work Plan along with a copy of the corresponding Project schedule files in electronic version.<br><br>b. A description of the overall completion status of the Project including schedule variations that report the earned value of the work completed, the planned value of the work completed, and the variance.<br><br>c. Planned tasks and activities for the next month.<br><br>d. The Deliverable status, with percentage of completion and time ahead or behind schedule for particular tasks.<br><br>e. Identification of any staffing issues or changes in the Resource Allocation Matrix.<br><br>f. An updated status on all issues being monitored.<br><br>g. An updated status on all risks being monitored.<br><br>h. Provide metrics necessary to support the State CIO's Legislative Finance Committee (LFC) reporting requirements.<br><br>i. Provide testing status and metrics.<br><br>j. Provide System enhancement hourly pool total hours used and total hours remaining.<br><br>k. An updated status on all SLA being monitored. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                       |                                    |                                  |                                                        |                                                        |                                                        |                                                        |                                                        |                        |

| Project Management     | PMT18          | The Contractor shall develop and maintain a Project Management Plan (PMP): The purpose of the Project Management Plan is to provide a comprehensive baseline of what needs to be achieved by the project, how it is to be achieved, who will be involved, how it will be reported and measured and how information will be communicated with the project. It will serve as a reference for decision and clarifications. All relevant project plans including but not limited to the Communication Plan, Change Management Plan, Staffing Management Plan, Quality Management Plan, Risk Management Plan, Issue Management Plan and the Work Breakdown Structure are incorporated into the Project Management Plan. It is a living document that evolves as the project progresses and is updated with the latest relevant information as required. The Project Management Plan may be broken into separate documents, but all documents will be considered sections of the Project Management Plan.                                                                                                                                                                                                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT21          | The Contractor shall coordinate with the Department and with the module vendors as required by the Department, to support the program-level change management process consistent with the Enterprise Change Management Plan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT25          | The Contractor shall be required to work collaboratively with the Department and the System Integrator to provide schedule information to be included in the Integrated Master Schedule (IMS). Elements necessary for the IMS include; start and end dates of major phases, key project milestones, integration points, cross module dependencies, and sufficient information to support the State CIO's Legislative Finance Committee (LFC) reporting requirements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT27          | The Contractor shall coordinate module deliverable and milestone walkthroughs and participate in other module walkthroughs as required by the Department.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT29          | The Contractor shall submit a monthly System Enhancement Pool report that details tickets invoiced to the hourly pool and must include hours used and hours remaining for the Department's approval.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT31          | The Contractor shall cooperate with the State's PMO and the IV&V contractor to give an accurate, honest reporting of the project status.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT32          | The Contractor shall contribute to the State's and/or the Systems Integration Services collaboration site, technical and non-technical project artifacts for the Contractor's module or module components including requirements, use cases, user stories, storyboards, system design documents, supplemental specifications, test cases, test scripts, test results, user, system and training documentation at the State's direction.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT36          | <p>The Contractor shall develop and maintain a detailed Project Work Plan (PWP) and a Gantt Chart that is aligned with the scope of the work outlined in this RFP, and the resulting contract. The PWP must identify detailed project tasks, realistic person hours for each task, the sequence of tasks and activities including duration necessary to meet deliverable and milestone dates for each phase, estimated baseline start and completion dates, actual start and completion dates, the critical path(s), resources (by name or by resource type if not known), dependencies, permanent tracking number for each task, completion percentages, and phase-level milestones. The dates and hours in the approved PWP form the project baseline. Once established, the baseline will only be modified with approval from the State. Additionally, the PWP must be continually refined and updated as the project progresses and will retain the baseline for comparative reporting.</p> <p>From the approved work plan, the Contractor must calculate the required information necessary to meet the Department's reporting requirements to the Legislative Finance Committee (LFC) which include: the work percent complete, SPI, CPI, earned value, planned value, schedule variance, planned amount paid, actual amount paid, and cost variance.</p> | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |
| Project Management     | PMT37          | The Contractor shall provide toll-free or call-back telephone and WebEx web-based conferencing capabilities (or an alternative solution approved by the Agency) to support contract activities.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements  |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Project Management      | PMT38          | The Contractor shall establish and utilize a deliverable review and acceptance process agreed upon by the Department that incorporates the following:<br><br>a. Review cycles, which will be conducted and scaled to the size and complexity of the deliverables. Security-related deliverables will have a 20-day review by the State after first submission, 10-day review cycle by the State after second submission; 5-day review cycle by the State after the third submission. All other deliverables will have a 10-day review by the State after first submission, 5-day review cycle by the State after second submission; 5-day review cycle by the State after the third submission)<br><br>b. Deliverables will need to reflect coordination with the overall modular program and will follow agreed upon change control processes.<br><br>c. Informal reviews and walkthroughs of draft and final deliverables are encouraged.<br><br>d. Queuing up excessive deliverables for simultaneous review is unacceptable to the Department. | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Requirements Management | RQM01          | During the requirements validation sessions, the Contractor must demonstrate a fully functioning solution that has been initially configured based on the Contractor's understanding of the requirements described in the RFP and publicly available policy documents, manuals, and fee schedules.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Requirements Management | RQM02          | The Contractor shall work with the Department to confirm the Contractor's understanding of the requirements and to clarify and/or elaborate requirements where necessary to achieve desired business outcomes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Requirements Management | RQM03          | The Contractor shall document any gaps between the initially configured solution and the business requirements in the requirements management tool. Gaps must show bi-directional traceability with applicable business requirement(s), design, test cases, test results, MECT criteria and certification artifacts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Requirements Management | RQM04          | The Contractor shall, during requirement validation, provide designated Department staff access to a fully functioning environment to become familiar with the solution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Requirements Management | RQM05          | The Contractor shall utilize project control tools to formally track all requirements and related design, configuration, testing, and certification artifacts. The Contractor's requirements management tool shall ensure approved changes to requirements are linked back the approved change request.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Requirements Management | RQM06          | The Contractor shall develop, maintain and submit a Requirements Traceability Matrix (RTM) to show bi-directional traceability with applicable business requirements and their realization throughout all project phases (e.g., requirements, design, testing and certification (MECT) checklist items). This should include how the requirement is realized (e.g., configuration, custom development, base functionality). All revisions must be reviewed and approved by the State.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Requirements Management | RQM07          | The Contractor's requirements management tool shall have the ability to manage requirements traceability by module(s), MITA business area, MITA business process and MECT checklists.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security                | SEC01          | The System shall provide a physical and electronic environment that uses public key infrastructure to verify all transactions and the identity of all users and denies access to unauthorized users. For example:<br><br>a. Require unique sign-on (ID and password)<br><br>b. Require authentication of the receiving entity prior to a system-initiated session, such as transmitting responses to eligibility inquiries.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                  |                                                                                       |                                    |                                  |                                                           |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Security               | SEC02          | The Contractor shall ensure that any data being transmitted or transported either physically or electronically will be encrypted.                                                                                | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC03          | The Contractor shall ensure that any unneeded hardware, software, and licenses have been decommissioned.                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC04          | The Contractor shall protect all government data from loss or unauthorized disclosure.                                                                                                                           | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC05          | The Contractor's solution shall streamline electronic transactions by incorporating electronic and digital signatures compliant with HIPAA and other State and federal statutes.                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC06          | The Contractor's solution shall provide tools (e.g., alerts or reports), which identifies usage anomalies or users who may have misused the system.                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC07          | The Contractor's solution shall automatically maintain an audit trail of users , including database administrators, who pass through or view a record, regardless of whether data is changed.                    | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC08          | The Contractor's solution shall have security audit trail reporting capabilities (e.g. security, level, locale, IP address, user ID, before and after changes).                                                  | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC09          | The Contractor's solution shall ensure the audit trail that cannot be modified.                                                                                                                                  | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC10          | The Contractor's solution shall contain information determined by the Department and must meet Health Information Technology for Economic and Clinical Health Act (HITECH) auditing standards.                   | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC11          | Risk assessments and security audit reports shall be completed on an annual basis and when additions or changes to functionality impact the security framework, architecture or when a new vulnerability exists. | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Security               | SEC12          | The Contractor's solution shall manage role-based permissions and provide a National Institute of Standards and Technology (NIST) compliant identification, authentication and accounting solution.                                                                                                                                                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC13          | The Contractor's solution shall have multiple layers of external and internal security that provide administrative, physical, and technical mechanisms to protect sensitive or confidential information used in performing the responsibilities and duties defined for the module scope of work.                                                                                                                                                                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC14          | The Contractor's solution shall not include any code of unknown origin.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC15          | The Contractor shall provide an independent third party to perform penetration testing within six (6) months prior to implementation. Penetration testing must also be performed by an independent third party on an annual basis and when additions or changes to functionality impact the security framework, architecture or when a new vulnerability exists. Penetration Test Report results shall be supplied to the Department and any major or critical vulnerabilities mitigated.                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security               | SEC16          | The Contractor shall provide the primary and disaster recovery facility(s) which will ensure security, performance and disaster recovery requirements outlined in the module scope of work.                                                                                                                                                                                                                                                                                                                                                                                                                                  | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC17          | The Contractor shall maintain policies and procedures for security clearance and staffing controls for allowing access to confidential information and/or to restricted areas within the Contractor's solution.                                                                                                                                                                                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC18          | The Contractor shall maintain adequate technical support/staffing to provide 24x7x365 coverage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security               | SEC19          | The Contractor's data encryption solution shall meet Federal Information Processing Standard (FIPS) 140-2 and at a minimum use AES 128 encryption.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC20          | The Contractor shall ensure that all data, regardless of its location, is encrypted at rest.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC22          | The Contractor will provide a completed Security Audit Report with results to the Department by the 30th (thirtieth) of September each year. The Security Audit Report must include either an electronic data processing (EDP) systems audit using SSAE - 18 at a minimum level service organization control (SOC) 2 Type II or a NIST 800-53 rev 4 assessment at a "moderate" system risk control level.<br><br>The Contractor shall provide a mitigation plan for all reported deficiencies. Major and critical deficiencies must be corrected within forty (40) calendar days of the report submission to the Department. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                       |                                    |                                  |                                                                            |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Security               | SEC23          | The Contractor's solution shall provide security features that support increasing the complexity of the authentication and authorization as the sensitivity of the data or functionality increases.                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC24          | All Contractor's module components shall adhere to any applicable Department system security practices, configurations & procedures.                                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC25          | The Contractor's solution shall provide the ability to grant authorization through role-based security (create, delete, modify and view) access to user interfaces, reports, data elements/field level, and menu items.                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC26          | The Contractor's solution shall allow access and role changes to be made in real-time with appropriate authorizations.                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC27          | The Contractor's solution, in order to protect the database from SQL injection attacks, shall access the database from the application through a standard database abstraction layer.                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC28          | The Contractor's solution shall be easy-to-use and provide a user interface that allows authorized users to edit, create, and implement role-based and group-based security at the data element/field level for authorized users based upon individual characteristics or functional security groups.                                                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC30          | The Contractor must limit access to its off-site facilities; including storage facilities. The Department has the right to perform physical security audits of the Contractor's off-site and on-site facilities at the Department's discretion.                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement                     | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security               | SEC31          | The Contractor shall establish security and privacy standards and standard operating procedures. These standards include HIPAA, Federal Information Security Management Act (FISMA), Privacy Act, Federal Tax Information (FTI), and other Federal and State laws, regulations, and policies. The Contractor shall also establish business and technical protocols to ensure that the transmission and storage of information remains secure. | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC38          | The Contractor's solution shall employ malicious code protection mechanisms at IT systems entry and exit points, at workstations, servers, and mobile computing devices on the network to detect and eradicate malicious code.                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC39          | The Contractor's solution shall use foundational technical standards such as X.509 Certificate format and Public Key Cryptography Standard (PKCS).                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC41          | The Contractor shall collaborate with the Systems Integration Services Contractor to integrate the Contractor's solution into the State's integration platform for single sign-on and federated identity management.                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                       |                                    |                                  |                                                                            |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Security               | SEC42          | The Contractor shall have an overall data security process that supports data security auditing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC43          | The Contractor shall provide, configure, support, maintain and manage a federated identity and access management solution that will perform user authentication and authorization through single sign-on for all module components.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | B - Requires configuration of the base solution not to exceed 20 FTE hours | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC44          | The Contractor must be compliant with the security processes outlined in the "Security and Privacy Controls Requirements" document that has been included in the Procurement Library.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC45          | The Contractor shall monitor system activity and prevent and detect intrusion, hacking, unusual activity, or system compromise. The Contractor shall immediately report any incidents of such, regardless of the outcome to the state, activate a Department approved communication strategy, perform mitigation activities, and provide continuous status updates to the Department until the issues are resolved to the Department's satisfaction. Only authorized contractor personnel may override system security alerts and edits.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC46          | The Contractor shall provide and operate solutions that terminate access immediately and/or generate alerts for conditions that violate security rules, unauthorized attempts to access data and system functions, and system activity based on security parameters.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC47          | The Contractor's solution shall ensure that only authorized users have access to systems and data, by requiring the following:<br><br>- Unique authentication credentials identifiable to each user of the system, not allowing for the re-use of credentials;<br><br>- Authenticates the receiving entity prior to a system initiated session, such as transmitting responses to case inquiries;<br><br>- Maintenance of key user information as part of a user profile including user ID, name, employer/state agency,<br><br>- Identity verification information, and an indicator of employee versus contractor;<br><br>- Multi-factor user authentication and the ability to restrict or permit a user's access to system functions, features, and processes based on the user's assigned roles based on business need and user security profile and a unique user ID and password and including a read-only access level;<br><br>- Column and row-level security access, data classification schemes, and/or the designation of data at multiple levels (e.g., case, individual) as restricted or sensitive (e.g., substance abuse treatment data) with the ability to define and implement exclusion controls on a per-user or user-group basis within a multi-level organizational structure, (e.g., external agencies and Appeals units).<br><br>- A method for authentication of all internal and external users and systems and the ability to deny access to all invalid users and systems;<br><br>- Encrypted passwords in storage and in transmission; | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC48          | The Contractor shall provide to the Department, upon request, a listing of all users having access to the Contractor's module components and/or data with details regarding the access granted to each user.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution                  | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. | Security               | SEC49          | The Contractor shall provide and operate solutions for security incident reporting and mitigation mechanisms. The Contractor shall preserve and report specified audit data when security violations are detected and mitigated.                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC50          | The Contractor shall comply with NIST Special Publication 800-111: Guide to Storage Encryption Technologies for End User Devices where required by CMS to protect confidential information stored on end user devices.                                                                                                                                                  | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC51          | The Contractor shall comply with NIST Federal Information Processing Standards (FIPS) Publication 180-4: Secure Hash Standards as required by CMS for use of secure hash algorithms.                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC52          | The Contractor shall comply with NIST Federal Information Processing Standards (FIPS) Publication 186-4: Digital Signature Standard as required by CMS for use of secure algorithms in digital signatures.                                                                                                                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC53          | The Contractor shall comply with the Harmonized Security and Privacy Framework - Exchange Reference Architecture Supplement Version 1.0 and as required by CMS.                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC54          | The Contractor shall comply with the OASIS Web Services Security - Simple Object Access Protocol (SOAP) Message Security Specifications to build secure web services to implement message content integrity and confidentiality.                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC55          | The Contractor shall respond to all risks identified through the periodic security risk assessments with a CMS Information Security Program Plan of Action and Milestones (POA&M) containing clarifying information, a proposed mitigation strategy if necessary, a timeline for implementation, and shall work with the Department to successfully execute the POA&Ms. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security               | SEC56          | The Contractor shall ensure all contractor and subcontractor personnel providing services under this contract are familiar with and comply with the Business Associate Agreement and the privacy and security policies included in the RFP.                                                                                                                             | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security               | SEC57          | The Contractor shall provide logical segregation of the Contractor's solution, components, and network connections with other entities and prevent any unauthorized disclosure of the States' data.                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC58          | The Contractor's solution code shall never run from a system level account with unlimited privileges such as "root" or "administrator".                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC59          | The Contractor shall ensure the confidentiality, privacy, and security of all state data passing through the Contractor and subcontractor networks.                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Requirement Section    | Requirement ID | Requirement Language                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Base Requirement<br>Applicable to Core<br>Claims Solution and All<br>Proposed Options | Requirement<br>Option<br>Indicator | Requirement Option<br>Assignment | General Status                                            | Production<br>Status                                                        | Product<br>Type                                        | Hosting                                                | Security Tested                                                                                                                                                                                                                                                                                                                                                                                                                                      | Additional Information |
| Security               | SEC60          | The Contractor shall establish and implement emergency access procedures for the Department to obtain secure access to module data during an emergency. Emergency access procedures shall be subject to the Department's approval.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC61          | The Contractor's solution must protect data from improper alteration or destruction including authentication mechanisms and to corroborate that the data has not been altered or destroyed in an unauthorized manner.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC62          | The Contractor's solution shall display a security warning banner prior to allowing entry into the system. The solution shall have security warning banners and headers and footers that adhere to Federal, state, and other applicable standards that are prominently displayed introductory screens.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC63          | The Contractor shall utilize cloud-based technology wherever advantageous to maximize the efficient and effective utilization of technology.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC64          | The Contractor shall ensure user account access is reviewed on a quarterly basis at a minimum. User accounts should be appropriately disabled as roles and responsibilities change.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC66          | The Contractor's solution shall meet the minimum password requirements below:<br><br>1. Must not contain the user's account name or parts of the user's full name that exceed two consecutive characters<br><br>2. Minimum password length: 8 characters<br><br>3. Contain characters from 3 of the following 4 categories<br><br>a. English uppercase characters (A through Z)<br><br>b. English lowercase characters (a through z)<br><br>c. Base 10 digits (0 through 9)<br><br>d. Non-alphabetic characters (for example, !, \$, #, %) (these will not work when logging into ReRite from Toshiba printers ... not on the key pad)<br><br>4. History: Cannot reuse a password for 24 password changes, user cannot reset password again for 24 hours<br><br>5. Expiration time frame: 60 day<br><br>6. Lockouts for failed attempts – account locks after 3 failed attempts, will unlock after 15 minutes | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC67          | The Contractor's solution shall track disclosures of ePHI; provide authorized users access to and reports on the disclosures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Security               | SEC68          | The Contractor shall support the State in developing a Privacy Impact Analysis for each module or module component that includes the following information:<br><br>Use of personally identifiable information (PII) or personal health information (PHI) and a description of the types of data that will be collected<br><br>Sources of PII/PHI, populations, and transfer and disclosure mechanisms<br><br>Legal environment (legal authorities and state privacy laws)<br><br>Details about the entities with which the collected information will be shared<br><br>Privacy and security standards for its business partners and other third parties and the agreements that bind these entities<br><br>Incident handling procedures<br><br>Privacy and/or security awareness programs and materials for its workforce | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security               | SEC70          | The Contractor shall provide the ability to de-identify and/or redact data for entities not authorized to receive PII or PHI and utilize de-identification algorithms to allow for re-identification of data if required.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC71          | The Contractor shall provide a process for masking, sanitizing, scrambling, or de-sensitizing sensitive data (e.g., PII/PHI) when extracting data from the production environment for use in non-production environments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC72          | The Contractor shall review and identify monthly, any unneeded hardware, software, and licenses, present recommendations to the State for review and ensure that any unneeded hardware, software, and licenses have been decommissioned upon approval from the State.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Security               | SEC82          | The Contractor's transmission security shall use, at a minimum, TLS 1.2, SHA 2 with a minimum of a 2048 bit key, or a more advanced industry standard transmission security protocol.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Security               | SEC83          | The Contractor will provide the completed reports with the results of the service organization control (SOC) 1 Type II audit annually on date identified by the State. The Contractor shall provide a mitigation plan for all areas of non-compliance. Issues found to be non-compliant shall be corrected within ninety (90) calendar days of the report submission to the Department.                                                                                                                                                                                                                                                                                                                                                                                                                                   | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Subcontractor          | SUB02          | If the Contractor transfers resources required to fulfill the contract to a third party, the third party is considered a sub-contractor and the transfer will be subject to the 40% subcontractor limitation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Subcontractor          | SUB03          | The Contractor shall list all subcontractors, if any, in the proposal.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Subcontractor          | SUB04          | The Contractor shall provide a detailed description of all work to be subcontracted to third parties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Subcontractor          | SUB05          | The Contractor must submit to the Department annually, a Subcontractor Usage Report on the use of subcontractors and certify that all subcontractors are in compliance with the employment practices mandated by federal and State statutes and regulations. The Subcontractor Usage Report must at a minimum contain the total subcontract dollar value, total subcontractor FTE's, total subcontractor hours.                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements             |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Subcontractor                      | SUB06          | The subcontractor will be required to enter into a signed Business Associate Agreement (BAA) as a part of the contract, that is in compliance with the Privacy and Security provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) prior to start of work. The BAA is included in the contract template found in the Procurement Library                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Subcontractor                      | SUB07          | The Contractor shall allow Department personnel direct access to all subcontractor or third-party personnel serving in critical roles on the project and shall not act as an intermediary between the Department and such parties for questions about the proposed solution or operation of the proposed solution. The Department reserves the right to discuss design, configuration, implementation, operation, routine maintenance, and enhancement of the proposed solution(s) directly with any subcontractors or third parties involved in performing work for the Department.                                                                                                                                                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Subcontractor                      | SUB08          | The Department shall have the right to review and approve any subcontracts through the Contractor.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Subcontractor                      | SUB09          | The Contractor may use subcontractors for no more than forty percent (40%) of the scope of work included in the contract. The subcontractor 40% will be determined using the highest proportional value among the following factors: subcontract dollar value relative to the overall contract value, subcontractor FTE's relative to the total contract FTE's, subcontractor hours relative to the total contract hours. If the proposed solution to meet the core functional requirements (e.g., core product) is a commercially licensed COTS or SaaS product (e.g., the State will receive a commercially available license for the product), the specific product that satisfies this condition can be excluded from the 40% subcontractor calculation. In Attachment L - Technology Matrix, the vendor must include "Commercially Licensed" in the column titled "Other" for the specific line item. This exclusion also applies to infrastructure, infrastructure software, or software that supports the core product. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO01          | The Contractor shall establish and maintain an automated reconciliation of all electronic claims received and provide a dashboard with daily aggregate summary and the ability to drill down by specific trading partner, billing provider, transaction type (e.g., 837I, 837P, 837D, encounter) and search capabilities using all available data elements to validate all transactions received are processed according to Agency defined business rules.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO02          | The Contractor shall provide staff to develop, organize, lead, and conduct training and education activities (e.g., provider and Agency staff training) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO03          | The Contractor's solution shall provide flexible publishing capabilities (e.g., formatting and stylistic consistency, allow control of format, font, graphics, layout, and page design, allow creation of master pages and style sheets to automate and structure documents, utilize industry standard tools to assure proper spelling, punctuation, grammar, capitalization, and checks for technical compliance with printing industry standards before publication) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. | System Administration & Operations | SAO04          | The Contractor shall provide flexible publishing capabilities for multi-chapter publications and large technical documents (e.g., generate and insert footnotes and endnotes, generate table of contents, generate indices, include appendices, manage chapter files, manage centralized style sheets, manage tabular material, import tables from various data sources into controlled table structures) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO05          | The Contractor shall provide flexible publishing capabilities to allow for control over all typographical characteristics (e.g., leading and kerning) and support for full color output as defined by the Agency                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO06          | The Contractor's solution shall provide a ticket (e.g., customer service request, state task request) dashboard to include, but not limited to: request, design, analysis of change (e.g., level of effort, schedule, resources), ticket type (e.g., Enhancements, Deficiencies, Maintenance, Research, Configuration and Mass Adjustments), test, implement, and approval and provide a detailed and viewable status of all ticket requests (including linking related tickets) from receipt through approval as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO07          | The Contractor shall create and maintain a communication inventory (e.g., letter, email templates) with necessary information (e.g., content, stakeholders) to communicate specific events (e.g., system or staff change) and develop appropriate communication and notifications for stakeholders as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements             |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| System Administration & Operations | SAO08          | The Contractor's solution shall provide for the creation and processing of online surveys, store indexed survey results (e.g., survey number, date, topic, response date) and provide the results and supporting data of online surveys to authorized users as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | COTS - Commercial Off the Shelf                        | T - Third Party Hosting                                | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| System Administration & Operations | SAO09          | The Contractor shall supply staff to meet all service level agreements and perform all claims processing functions (e.g., claims supervisor, claims processing staff, quality assurance staff, publication staff, training staff) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO10          | The Contractor shall supply staff to analyze, develop, configure, and maintain all claims pricing and payment methodologies (e.g., claims processing updates, payment methodology updates, Federal and State policy guideline changes, ad hoc impact analysis, changes with third party tools) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO11          | The Contractor must receive approval from the Agency to make any changes to the system (e.g., applications, programs, procedures, specifications, parameters, disposition codes, definitions or objectives.) In the event that an emergency system change is required to continue normal system operations and the Contractor is unable to obtain Agency approval for the change, the Contractor must notify the Agency as soon as the change is made and the system returns to normal operations using the communication process as defined by the Agency.                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO13          | The Contractor must support the Agency during all audits and reviews conducted by CMS, authorized agencies and contractors, and/or by the State over the life of the contract, to include but not limited to: assisting the Agency and the auditing entity in sample selections, documentation and data gathering, and responding to questions as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO14          | The Contractor shall provide and maintain a telecommunications link and associated hardware (e.g., VPN, site to site connection) between the claims solution and all associated systems and subsystems.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| System Administration & Operations | SAO15          | The Contractor's solution shall proactively monitor claims processing statistics (e.g., denial rates, denial reasons, claim suspense reasons and resolution) and identify and provide necessary training to mitigate continued claim denials as defined the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO16          | The Contractor's solution shall maintain claims history available for adjustments and inquiry for a duration as defined by the Agency; and all "once in a lifetime" claims.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO17          | The Contractor's solution shall create, store, and return a unique identification number (e.g., internal control number) for all claims transactions as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO18          | The Contractor's solution shall have the ability to create, maintain, and produce regularly-scheduled and ad-hoc publications (both print and electronic) of multilingual documents as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO19          | The Contractor shall provide translator and integrated mapping software (e.g., flexible mapping functionality supporting all required formats and transactions, allowing for structure and information to be extracted directly from database tables, providing the ability to receive, assemble, validate, encrypt, respond, and transport batches of data to and from covered entities and other trading partners; accept, code, decode, balance, and transmit all current and future HIPAA healthcare transactions (e.g., 837, 835, 270, 271, 276, 277 (including unsolicited), 278, 820, 834, 997,999, 991, 824, TA-1) and providing support for automatically re-submitting the transaction when a transmission error occurs) as defined by the Agency. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | V - Vendor On-Premise Hosting                          | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO20          | The Contractor's solution shall provide predictive modeling capability for the management of quality and cost-effectiveness of healthcare services, as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements             |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                       |                                    |                                  |                                                           |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| System Administration & Operations | SAO21          | The Contractor shall develop and maintain a configurable summary dashboard for ticket requests with the ability to drill-down to detailed information to include, but not limited to: ticket type, identifier, prioritization, description, related notes or comments, request date, requester, start date, assigned resource(s), estimated completion date, estimated hours, hours worked to date, documentation impact and status, testing reports and status, agency approval, implementation date, post implementation updates as defined by the Agency. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO22          | The Contractor's solution shall serve as the EDI broker/gateway to create, edit, receive, and respond (e.g., real-time, SFTP, batch file upload), translate, and process X12, standardized transactions and current and future HIPAA standard transactions as defined the Agency.                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO23          | The Contractor shall provide a secure web portal with the ability for members to receive REOMB and respond, as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO24          | The Contractor shall receive, track, monitor, and respond (e.g., using Agency approved template, free-form) to inquiries through a secure portal inbox, as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO25          | The Contractor's secure web portal shall allow external users inquiry of member information (e.g., eligibility, demographic, detailed description of covered benefits and utilization information, service authorization requirements, copayment and out-of-pocket accumulation) as defined by the Agency.                                                                                                                                                                                                                                                   | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO26          | The Contractor shall provide a secure web portal with the ability to view, retrieve, download and print remittance advice (e.g., x12 835, PDF) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO27          | The Contractor provide a web portal with the capability to receive, store, maintain (e.g., version history) and upload documents, as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO28          | The Contractor's solution shall provide a web portal with the ability for a secondary navigation scheme (e.g., breadcrumb trail) for navigation on the web portal as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO29          | The Contractor's solution shall provide operational support and maintenance of the web portal to include a dashboard detailing usage statistics (e.g., user count, transactions, uploads, downloads, secure messages) as defined by the Agency.                                                                                                                                                                                                                                                                                                              | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO30          | The Contractor's solution shall provide a web portal with comprehensive functionality (e.g., contacting the Agency or a payee, view summary and detail information, remittance advices, warrant summaries, complete and submit an EDI trading partner application, frequently asked questions) as defined by the Agency.                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. | System Administration & Operations | SAO31          | The Contractor's solution shall manage and maintain EDI transaction sets and permissions (e.g., eligibility inquiry and response only, 837 Dental submission and response only) for covered entities and/or trading partners as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO32          | The Contractor shall create, maintain (e.g., current and historical versions) Agency-specific EDI companion guides in a format and timeframe defined by the Agency. All EDI companion guides must have the required Agency and/or federal approval.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO33          | The Contractor shall provide a web portal with the ability to post and archive user specific or non-specific announcements or alerts (e.g., member, provider, specific benefit plan, and user role) that are displayed at user sign-on or at a frequency defined by the Agency. Users should be required to acknowledge the announcement so that it is not repeatedly displayed at subsequent sign-on, as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO34          | The Contractor shall provide an interactive web portal with smart links to Agency, Federal, provider, and member resources and information (e.g., provider manuals, instructions, bulletins, program descriptions and updates, fee schedules, eligibility criteria, forms, member guides, certifying agencies, SSA, public health care and nutritional programs) for viewing, downloading, and printing as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO35          | The Contractor shall establish and maintain a reconciliation process for all paper claims and attachments received and provide a dashboard with daily aggregate summary and the ability to drill down by specific billing provider, claim type (e.g., professional, institutional, dental, nursing home) and search capabilities using all available data elements to validate all claims and attachments received are processed according to Agency defined business rules.                                                                                                                                                                                                                                                                                                                                                                                                                                                      | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO36          | The Contractor shall identify, procure, and maintain licenses for all reference data (e.g., payment methodologies, claims editing, translator(s)) and electronic copies (e.g., implementation guides, reimbursement methodologies, National Correct Coding Initiative policy manual) necessary to support the acceptance, editing, pricing, adjudication, and payment of healthcare and non-healthcare claims for use by all modules as defined by the Agency. These licenses must allow the reference data to be shared with other modules (e.g., care management, EDW, provider services, TPL, customer care, fraud waste and abuse) to support the administration of the Agency healthcare programs.                                                                                                                                                                                                                           | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO37          | The Contractor's Electronic Data Interchange solution shall provide the ability to support the exchange of EDI transactions with multiple distinct segregated testing environments with the full functionality of the production environment (including transaction processing, editing, validation, and reporting). The EDI solution will have the capability to create, update, and maintain X12 transactions (i.e. 834, 837, 270/271) as part of targeted testing scenario groups to support comprehensive system wide regression testing across all claim types, eligibility groups, and provider types as defined by the Agency. Following the execution of each EDI regression test group, Contractor will perform automated reconciliation between the test outcomes and the expected outcomes. Whenever possible, EDI regression tests should utilize real production transactions and outcomes for EDI regression tests. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | V - Vendor On-Premise Hosting                          | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO38          | The Contractor shall establish and operate a mailroom for the intake of physical correspondence (e.g., scanning, batching claims, claims and attachments, faxes, adjustments and/or voids, medical records, appeals and grievances, letters, documents, surveys, returned mail) and processing and mailing of outbound physical correspondence (e.g., claims that fail prescreening, letters, documents, surveys, handbooks, mass mailings) including producing mailing labels.                                                                                                                                                                                                                                                                                                                                                                                                                                                   | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO39          | The Contractor shall provide a courier to pick up and drop off mail at the Agency designated USPS facility including delivering provider correspondence, administrative mail, and other non-claims mail to the appropriate functional areas (e.g., Agency staff).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO40          | The Contractor's solution shall test all current and future HIPAA transaction processing according to guidelines developed by the Strategic National Implementation Process as defined by the Agency (e.g., compliance testing; application, operations, and interface testing; business to business testing).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO41          | The Contractor's shall create materials at a reading level and for a culturally diverse population in a language or format (e.g., Braille, large-fonts, recordings) preferred by the intended recipient (e.g., member, provider) as defined by the Agency.,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements             |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                       |                                    |                                  |                                                           |                                                                                 |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| System Administration & Operations | SAO42          | The Contractor shall not require travel by Agency staff outside of the primary project location to support contract activities, as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                       | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO43          | The Contractor's solution shall provide a configurable dashboard to display transaction activity (e.g., average processing time and transaction volume) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO44          | The Contractor shall create and maintain the comprehensive conceptual, physical, and logical data model for all data throughout the life of the contract as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                              | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO45          | The Contractor shall allow the state to purchase software licenses and software maintenance directly, if determined to be in the best interest of the Agency, for use within the solution as defined by the Agency.                                                                                                                                                                                                                                                                                                                                             | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO46          | The Contractor's solution shall only utilize production data for testing with approval as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO47          | The Contactor's solution shall have the capability for use of the Web Portal to report fraud, waste, and abuse as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                        | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO48          | The contractor's solution shall have the ability for members to manage their account using a Web Portal (e.g., verify eligibility (request a replacement Medicaid ID card), view claims information, and file complaints) as defined by the Agency.                                                                                                                                                                                                                                                                                                             | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S2 - This functionality is currently offered, but not in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO49          | The Contractor shall supply staff to analyze, develop, and configure payment methodologies and coordinate with Agency staff during rule and policy changes as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                            | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO50          | The Contractor's solution shall provide a web portal with the ability to upload forms and supplemental claim documents (e.g., primary payer EOB, medical records, contractor published documents, requests for information) and automatically associate the file to the claim or member record, as defined by the Agency.                                                                                                                                                                                                                                       | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO51          | The Contractor's solution shall process the following transactions: 837I Healthcare Claim: Institutional 837P Healthcare Claim: Professional 837D Healthcare Claim: Dental 835 Healthcare Claim Payment/Remittance Advice 270 Eligibility, Coverage, or Benefit Inquiry 271 Eligibility, Coverage, or Benefit Information 276 Healthcare Claim Status Request 277 Healthcare Claim Status Response 278 Healthcare Services Review – Request and Response 820 Premium Payment 834 Benefit Enrollment and Maintenance 997 Acknowledgement 824 Application Advice. | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO52          | The Contractor's solution shall accept, screen, date-stamp, assign unique control numbers, and store hard copy all claim forms and attachments.                                                                                                                                                                                                                                                                                                                                                                                                                 | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements             |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                       |                                    |                                  |                                                           |                                                                                 |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| System Administration & Operations | SAO54          | The Contractor's hosting environment for all module components shall be compliant with Statement on Standards for Attestation Engagements (SSAE-18) SOC 2 Type 2 and has Federal Risk and Authorization Management Program (FedRAMP) Certification, FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. If the Contractor proposes either a multi-tenant solution or a public cloud, hybrid cloud (Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS)), or community cloud environment, the vendor must ensure that the environment is either FedRAMP certified or that the shared resources are only accessible by HIPAA-covered entities as defined in 45 CFR 160.103. | No                                                                                    |                                    |                                  | F - Requires custom development                           | S2 - This functionality is currently offered, but not in use by other customers | SaaS - Software as a Service                           | O - Other                                              | N- The application has not been security tested based on NIST 800-53 Rev 4.                                                                                                                                                                                                                                                                                                                                                                          |                        |
| System Administration & Operations | SAO55          | In the event the Contractor is unable to continue meeting the requirements for the approved hosting model or if the Contractor desires to transition to different hosting model that is compliant with the requirements of the contract, the Contractor must: 1) provide the state with the opportunity to verify compliance of the new hosting environment with the contract requirements in advance of transition, 2) ensure that there is no additional cost to the state for the new hosting model, and 3) ensure that there is no disruption of service to end users as a result of the transition.                                                                                                                                                                                            | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| System Administration & Operations | SAO56          | The Contractor's solution shall receive, store, create, and maintain an indicator and effective dates of an enrolled provider's participation in state specific programs (e.g., health home, primary care enhanced rate) as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO58          | The Contractor's solution must evaluate criteria defined by the agency (e.g. provider participation flags for specified programs) to adjudicate claims and established pricing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO59          | The Contractor's solution shall validate that the member is assigned to the provider and has active eligibility for the period prior to payment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO64          | The Contractor's claims processing environment will be sized to process up to 200 concurrent transactions per second.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO65          | The Contractor shall provide tools for comprehensive performance monitoring and reporting via a dashboard, for SLAs related to the claims processing and management services scope of work and performance of the claims solution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO66          | The Contractor must provide a secure communication mechanism that can be accessed by multiple vendors based on user role as defined by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO67          | To support exchange of data with the MMIS requested by other entities, the contractor shall establish network connections with other MMIS vendors or State trading partners as determined necessary by the State and shall host related hardware and software components to support secure network connectivity at a reasonable cost that is paid by the other MMIS vendors or trading partners and shall establish Interconnection Security Agreements that document interface characteristics, security requirements, and the nature of the information communicated over the connection                                                                                                                                                                                                          | No                                                                                    |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers     | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| System Administration & Operations | SAO69          | Contractor shall ensure that individuals occupying Key Personnel positions shall, at a minumum, provide services between 8:00 a.m. and 5:00 p.m. local time Monday through Friday unless a resource-specific alternative schedule is approved by the Agency.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | No                                                                                    |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                          | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements             |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                       |                                    |                                  |                                                           |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Testing                            | TEST02         | At a minimum, the Contractor shall provide sufficient segregated environments to support testing processes that are equivalent to the following:<br><br>a. Integration Testing: End-to-end testing performed to expose defects in the interfaces and in the interactions between integrated module components or other systems and validate the system's readiness to meet non-functional requirements.<br><br>b. System testing: The process of demonstrating that a program, function, or integrated system components meets its requirements and objectives as stated in the requirements specification.<br><br>c. Regression Testing: Testing of a previously tested function following modification to ensure that defects have not been introduced or uncovered, as a result of the changes made. It is performed each time the software or its environment is changed, and typically involves automated testing scripts.<br><br>d. Parallel Testing: Validates that the system achieves the same results as compared to another system (e.g., a legacy system) or previous software version.<br><br>e. Performance and Load Testing: Verifies the performance of a system will meet service level agreements and also measures the behavior of the system with increasing load (e.g. number of parallel users and/or numbers of transactions to determine what load can be handled by the system).<br><br>f. User Acceptance Test: Testing conducted by the user or customer to determine whether or not a system satisfies the defined user acceptance criteria in an isolated environment. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                            | TEST03         | The Contractor must identify and resolve interdependencies that restrict or impede required testing of the Contractor's solution, other enterprise modules, or module components from performing required testing. Unless otherwise identified by the State strategies to resolve interdependencies must be reviewed and approved by the State prior to implementing the resolution strategy.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                            | TEST04         | The Contractor shall perform testing and present the results for each of the following test levels: Performance Test results, System Test results, Parallel Test results, Regression Test results, Integration Test results. Test results shall be traced to the use case/user story and design documentation being tested.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Testing                | TEST05         | The Contractor shall provide sufficient environments and resources for the following:<br><br>a. Synchronize the software and the data from the production environment and testing and impact analysis environment at a minimum on a quarterly basis or at the discretion of the Department.<br><br>b. Synchronize the software and the data from the production environment and training environment following software deployments.<br><br>c. Provide a fully functioning online test environment, which includes batch and online programs, files, and supporting systems.<br><br>d. Provide technical and functional support to create and analyze "what-if" scenarios and compare results between scenarios in the impact analysis environment. Provide an analysis of outcomes in impact analysis environment and another environment, such as production or test.<br><br>e. Provide State, Contractor, and IV&V staff a minimum of read-only access to all environments and tools.<br><br>f. Provide sufficient resources to support the execution of automated regression testing.<br><br>h. Provide comparative analysis support of regression testing results.<br><br>i. Conduct testing of approved system configuration changes, corrections or enhancements or before implementation.<br><br>j. Allow Department resources and contractors designated by the Department to create and edit appropriate data to support testing efforts. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST06         | The Contractor shall ensure, in order to release code to UAT or production, it must meet the minimum acceptable defect levels:<br>• Critical: 100% have been resolved.<br>• High: 100% have been resolved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST08         | The Department plans to perform UAT on all software releases as part of the contract. The Contractor's approach to establishing testing environments should not impact the Department's ability to conduct continuous UAT in a separate, dedicated environment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST09         | The Contractor shall facilitate UAT as follows:<br><br>a. Provide test cases and scripts from previous test levels.<br><br>b. Assist the Department in developing UAT test cases.<br><br>c. Provide a dedicated UAT environment to the Department and maintain the environment as needed to support continuous UAT throughout design, configure/build and testing.<br><br>d. Refresh data, execute processes, and migrate releases or code fixes as requested or on an agreed-upon schedule.<br><br>e. Provide test data.<br><br>f. Provide a mechanism for the Department to enter defects into the online defect-tracking tool.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST10         | The Contractor shall provide Department resources or their designee access to test cases, test results and defect tracking via online tools. The Department reserves the right to inspect artifacts and results at any time.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST11         | The Department reserves the right to conduct independent testing of the solution at any time. The Contractor must cooperate with the Department or its designee, and provide environments, data, and technical support for independent testing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST12         | The Contractor's Performance and UAT test environments shall be sized to be capable of mirroring the production System in its infrastructure, files, databases, processing, and reporting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Testing                | TEST13         | The Contractor shall work proactively with the State's designated testing resources to review all test results and provide the necessary system and functional information to create verification procedures and user acceptance test cases.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Testing                | TEST19         | The Contractor shall develop test criteria and algorithms for expected outcomes prior to production of reports.                                                                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST20         | The Contractor shall ensure that the Project Work Plan allocates sufficient time to the State's user acceptance testing activities relative to the detailed scope of work, requirements and gaps, the number of manually executed test cases, and the complexity of module integration. The Contractor will be responsible for extended user acceptance testing if the proposed testing duration is not sufficient for the State to validate the module. | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Testing                | TEST22         | The Contractor shall plan and execute testing for all inbound and outbound interfaces, ensure accurate and secure data transmission between the contractor's solution and the State's Integration Platform and coordinate with external entities as appropriate.                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Testing                | TEST23         | The Contractor shall coordinate with the Department, Systems Integrator, and specific module component vendors to conduct integration testing.                                                                                                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN01          | The Contractor shall provide technical training to agency project resources and designated contractors to develop an understanding of how to monitor the system using available tools and dashboards while leveraging technical and functional documentation and/or reports.                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN04          | The Contractor shall update training materials when changes occur.                                                                                                                                                                                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN05          | The Contractor shall collaborate with the agency to finalize a training schedule.                                                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN06          | The Contractor shall maintain and update the training environment with training data to use during user training.                                                                                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN08          | The Contractor shall utilize a variety of delivery methods to best meet the training objectives. Examples include online self-paced training presentations, in-person classroom setting, written material, and demonstrations.                                                                                                                                                                                                                           | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN09          | The Contractor must provide training necessary to support new functionality and/or major software releases that materially change the user interaction.                                                                                                                                                                                                                                                                                                  | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN10          | The Contractor shall provide training to Agency staff and other designated module vendors on the overall data management strategy and investigating data or process issues related to module integration.                                                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN13          | The Contractor shall provide training and support to State staff and individuals designated by the State (e.g., IV&V, QA/QC vendor), on the use of DDI tools provided by the contractor. This may include traceability tools, document repositories and testing tools.                                                                                                                                                                                   | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Training               | TRN14          | The Contractor shall provide training on the system for UAT testers. The Contractor shall provide updated User and System Documentation to UAT testers to support the UAT effort.                                                                                                                                                                                                                                                                        | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Workflow               | WKF01          | The Contractor's workflow solution shall provide a runtime engine that facilitates process events throughout the work type lifecycle.                                                                                                                                                                                                                                                                                                                    | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                       |                                    |                                  |                                                           |                                                                             |                                                        |                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Workflow               | WKF02          | The Contractor's workflow solution shall provide configurable work distribution and redistribution based on work type, worker skill, priority, and age of work which can be configured by the State.                                                                                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF03          | The Contractor's workflow solution shall provide a user-friendly Graphical User Interface (GUI) for process definition, execution, monitoring, and management. Support a role-based interface for process definition that leads the user through the steps of defining the workflow associated with a business process including processes that are managed by Department staff only, and that captures all the information needed by the workflow engine to execute that process. | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF04          | The Contractor shall support and assist the Department in mapping all business processes and subprocesses to the workflow application and in transitioning from manual to automated process execution.                                                                                                                                                                                                                                                                             | Yes                                                                                   |                                    |                                  | NA - This is not a functional or technical requirement    | NA - This is not a functional or technical requirement                      | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement | NA - This is not a functional or technical requirement                                                                                                                                                                                                                                                                                                                                                                                               |                        |
| Workflow               | WKF05          | The Contractor's workflow solution shall support work-type processing that includes internal and external dependencies.                                                                                                                                                                                                                                                                                                                                                            | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF06          | The Contractor's workflow solution shall provide the ability to view alerts and/or reminders by user, by work-type.                                                                                                                                                                                                                                                                                                                                                                | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF07          | The Contractor's workflow solution shall provide the ability to set alerts and or reminders by user, by work-type.                                                                                                                                                                                                                                                                                                                                                                 | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF08          | The Contractor's workflow solution shall automatically set the state of the work item, based on the processing steps when completed to provide transparent, accurate status of the work at all times.                                                                                                                                                                                                                                                                              | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF09          | The Contractor's workflow solution shall provide supervisors access and control of work by type and by user.                                                                                                                                                                                                                                                                                                                                                                       | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF11          | The workflow engine shall be configured to support capturing business processes using Business Process Model and Notation (BPMN) 2.0 or later, even if the engine uses a separate coding of the rules for execution.                                                                                                                                                                                                                                                               | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF12          | The workflow engine shall be configured to support the establishment of work queues allowing in-process knowledge, data, and documentation to flow from one-solution to another solution.                                                                                                                                                                                                                                                                                          | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF13          | The workflow engine shall be configured to support workflow access, assignments, and execution for all essential aspects of the business processes (e.g., provider enrollment, provider screening, client communications).                                                                                                                                                                                                                                                         | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service                           | T - Third Party Hosting                                | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment F - Requirements Response Matrix

All requirements must have responses in each of the following columns: General Status, Production Status, Product Type, and Hosting.

| Matrix of Requirements |                |                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                       |                                    |                                  |                                                           |                                                                             |                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |

| Workflow               | WKF14          | The Contractor shall configure, support and maintain a configurable document management, workflow, and ICR/OCR solution that meets the State's requirements. If the Contractor's solution does not include an integrated content management solution that meets the state's requirements, the Contractor will be required to leverage the State of Montana's Perceptive Content Management solution with their overall solution. | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |
| Workflow               | WKF16          | The Contractor's solution shall deliver automated business process/workflow management to support the establishment of work queues via an assigned worker portal allowing in-process knowledge, data, and documentation to route from one worker's queue to another as well as across solutions. The Contractor's solution shall ensure compliance with defined processes.                                                       | Yes                                                                                   |                                    |                                  | A - Included in the base release of the proposed solution | S1 - This functionality is currently offered, and in use by other customers | SaaS - Software as a Service | T - Third Party Hosting | Y-The functionality has been security tested based on NIST 800-53 Rev 4. NOTE: The "Y" value can be applied to Hosting and Environment business requirements when the security testing that indicates that the solution is Federal Risk and Authorization Management Program (FedRAMP) Compliant, has a FedRAMP Risk Assessment that indicates compliance, or has a documented NIST 800-53 rev 4 at a "moderate" system risk assessment designation. |                        |

Attachment G - Tier 1 Claims Pricing Schedules

Claims Services Schedule A - Cost Summary

| Schedule A-1: Claims Processing and Management Services Core Scope of Work Costs                     |                   |                                                                                                                                                         |
|------------------------------------------------------------------------------------------------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Phase                                                                                                | Cost              | Instruction                                                                                                                                             |
| Claims Processing and Management Services Core Claims Solution Installation DDI                      | \$ 1,738,532.77   | Insert "Total Claim Solution Installation Cost" from Schedule B, Schedule B-1                                                                           |
| Claims Processing and Management Services Core Scope of Work DDI                                     | \$ 19,993,126.80  | Insert "Total Core Base + Group DDI * CPI-U Costs" from Schedule F, Tab F-1 less "Total Claim Solution Installation Cost" from Schedule B, Schedule B-1 |
| Claims Processing and Management Services Core Scope of Work Operations                              | \$ 72,164,551.80  | Insert "Total Core Base + Group Operations * CPI-U Costs" from Schedule F, Tab F-2                                                                      |
| Claims Processing and Management Services DDI Requisitioned Integration Services Pool Hours and Cost | \$ 5,007,600.00   | Insert "Total Cost for DDI Requisitioned Integration Services Pool Hours Cost & CPI-U Adjusted Cost" from Schedule K cell F14                           |

| * The Grand Total cost for Schedule B-3 cannot exceed the "Total Option A DDI Cost" from Schedule G-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-4: Claims Processing and Management Services Option B (Call Center) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |                 |                 |

| * The Grand Total cost for Schedule B-4 cannot exceed the "Total Option B DDI Cost" from Schedule H-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| * The Grand Total cost for Schedule B-5 cannot exceed the "Total Option C DDI Cost" from Schedule I-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-6: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |            |           |

| Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 5%                                   | 15%                                             | 25%                           | 10%           |            |           |
| Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 35%                                  | 30%                                             | 50%                           | 25%           |            |           |
| GRAND TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | \$0.00                               |                                                 |                               |               |            |           |
| * The Grand Total cost for Schedule B-6 cannot exceed the "Total Option D DDI Cost" from Schedule M-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |            |           |

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC31:The Contractor will provide 4,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 4,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC33:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC34: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC35:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC36: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC37:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Total Fixed Hours for Each Onboarding Service Integration: | 192   |

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC39:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| * The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = \$10,000,000, the Claim Solution Installation Cost must be between \$500,000 and \$1,000,000 (\$500,000/\$10,000,000= 5% and \$1,000,000/\$10,000,000=10%) |                         |     |     |     |                |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Grand Total                          |                                                 |                               |                 |                 |                  |
| * The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |                 |                 |                  |

| * The Grand Total cost for Schedule B-3 cannot exceed the "Total Option A DDI Cost" from Schedule G-1. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-4: Claims Processing and Management Services Option B (Call Center) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |                 |                 |

| GRAND TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | \$2,190,456.23                       |                                                 |                               |               |                 |                 |
| * The Grand Total cost for Schedule B-4 cannot exceed the "Total Option B DDI Cost" from Schedule H-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| GRAND TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | \$1,784,528.21                       |                                                 |                               |               |                 |                 |
| * The Grand Total cost for Schedule B-5 cannot exceed the "Total Option C DDI Cost" from Schedule I-1. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-6: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                      |                                                 |                               |               |            |           |

| Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 5%                                   | 15%                                             | 25%                           | 10%           |            |           |
| Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 35%                                  | 30%                                             | 50%                           | 25%           |            |           |
| GRAND TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | \$0.00                               |                                                 |                               |               |            |           |
| * The Grand Total cost for Schedule B-6 cannot exceed the "Total Option D DDI Cost" from Schedule M-1. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |            |           |

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC31:The Contractor will provide 4,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 4,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC33:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC34: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC35:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC36: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC37:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Technical Writer                                           | 8     |
| Total Fixed Hours for Each Onboarding Service Integration: | 192   |

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC39:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10%                     | N/A | N/A | N/A | N/A            |
| * The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = \$10,000,000, the Claim Solution Installation Cost must be between \$500,000 and \$1,000,000 (\$500,000/\$10,000,000= 5% and \$1,000,000/\$10,000,000=10%) |                         |     |     |     |                |

| * The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |                 |                 |                  |

| * The Grand Total cost for Schedule B-3 cannot exceed the "Total Option A DDI Cost" from Schedule G-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-4: Claims Processing and Management Services Option B (Call Center) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |                 |                 |

| Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 5%                                   | 15%                                             | 25%                           | 10%           |                 |                 |
| Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 35%                                  | 30%                                             | 50%                           | 25%           |                 |                 |
| GRAND TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | \$1,921,089.86                       |                                                 |                               |               |                 |                 |
| * The Grand Total cost for Schedule B-4 cannot exceed the "Total Option B DDI Cost" from Schedule H-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| * The Grand Total cost for Schedule B-5 cannot exceed the "Total Option C DDI Cost" from Schedule I-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-6: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |            |           |

| * The Grand Total cost for Schedule B-6 cannot exceed the "Total Option D DDI Cost" from Schedule M-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |            |           |

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC31:The Contractor will provide 4,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 4,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC33:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC34: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC35:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC36: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC37:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Total Fixed Hours for Each Onboarding Service Integration: | 192   |

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC39:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Minimum percent of Total DDI Cost cannot be less than the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 5%                      | N/A | N/A | N/A | N/A            |
| Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10%                     | N/A | N/A | N/A | N/A            |
| * The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = \$10,000,000, the Claim Solution Installation Cost must be between \$500,000 and \$1,000,000 (\$500,000/\$10,000,000= 5% and \$1,000,000/\$10,000,000=10%) |                         |     |     |     |                |

| * The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |                 |                 |                  |

| * The Grand Total cost for Schedule B-3 cannot exceed the "Total Option A DDI Cost" from Schedule G-1. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-4: Claims Processing and Management Services Option B (Call Center) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |                 |                 |

| Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 35%                                  | 30%                                             | 50%                           | 25%           |                 |                 |
| GRAND TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | \$2,496,185.15                       |                                                 |                               |               |                 |                 |
| * The Grand Total cost for Schedule B-4 cannot exceed the "Total Option B DDI Cost" from Schedule H-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| * The Grand Total cost for Schedule B-5 cannot exceed the "Total Option C DDI Cost" from Schedule I-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-6: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |            |           |

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Variable Rate Factor Group 2-7:                                                                                                                       |                |                               |                |                               |                |                               |                |                               |                |                               |                |                               |                |                               |                |                                 |

OMC31:The Contractor will provide 4,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 4,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC33:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC34: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC35:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

Schedule I - Claims Processing and Management Services Option C (Federal Reporting) Scope of Work Costs  
Schedule I-1 Claims Processing and Management Services Option C (Federal Reporting) DDI Costs

OMC36: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC37:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Technical Writer                                           | 8     |
| Total Fixed Hours for Each Onboarding Service Integration: | 192   |

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC39:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Minimum percent of Total DDI Cost cannot be less than the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 5%                      | N/A | N/A | N/A | N/A            |
| Maximum percent of Total DDI Cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 10%                     | N/A | N/A | N/A | N/A            |
| * The Claims Solution Installation is complete once the Contractor completes the Claim Solution Installation, provides access to designated Agency staff, and makes the solution ready for requirements confirmation and design session. The Claim Solution Installation percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total Core DDI Costs = \$10,000,000, the Claim Solution Installation Cost must be between \$500,000 and \$1,000,000 (\$500,000/\$10,000,000= 5% and \$1,000,000/\$10,000,000=10%) |                         |     |     |     |                |

| * The Grand Total cost for Schedule B-2 cannot exceed the "Total Core DDI Cost" from Schedule F-1 less the total cost from Schedule B-1 above. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |                 |                 |                  |

| * The Grand Total cost for Schedule B-3 cannot exceed the "Total Option A DDI Cost" from Schedule G-1. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| * The Grand Total cost for Schedule B-4 cannot exceed the "Total Option B DDI Cost" from Schedule H-1. The sum of four phases must equal the grand total (100%). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| * The Grand Total cost for Schedule B-5 cannot exceed the "Total Option C DDI Cost" from Schedule I-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |                 |                 |

| Schedule B-6: Claims Processing and Management Services Option D (State Specific Requirements) Scope of Work<br>Design, Development & Implementation (DDI) Payment Milestone by Phase                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                      |                                                 |                               |               |            |           |

| Minimum percent of total DDI cost cannot be less than the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 5%                                   | 15%                                             | 25%                           | 10%           |            |           |
| Maximum percent of total DDI cost cannot exceed the following percentages for each phase.*                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 35%                                  | 30%                                             | 50%                           | 25%           |            |           |
| GRAND TOTAL                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | \$0.00                               |                                                 |                               |               |            |           |
| * The Grand Total cost for Schedule B-6 cannot exceed the "Total Option D DDI Cost" from Schedule M-1. The sum of four phases must equal the grand total (100% ). The phase percentage must be greater than or equal to the minimum percentage and less than or equal to the maximum percentage. Example: Total DDI Cost = \$1,000,000, the Development Configuration and Build Cost must be between \$50,000 and \$350,000 (\$50,000/\$1,000,000= 5% and \$350,000/\$1,000,000=35%). The sum of four phase percentages must equal 100%. Example: Development Configuration and Build = 25% User Acceptance Testing and Integration Testing = 20% Implementation and Acceptance = 40% Certification = 15% |                                      |                                                 |                               |               |            |           |

OMC30: The Contractor shall provide 7,500 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 7,500 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC31:The Contractor will provide 4,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 4,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC32: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC33:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC34: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC35:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC36: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC37:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

| Total Fixed Hours for Each Onboarding Service Integration: | 192   |

NOTE: Please see RFP Section 3.10.1.4.1 titled "Integration Services Type Definition" for a more complete definition of each integration service type listed above.

The Contractor should allocate the hours across the Resource Types applicable for each Integration Service Type. If a Resource Type is not required for a specific Integration Service Type, put zero (0) in the Hours column. When an Integration Service is required, the Contractor will evaluate the Integration Service and document the detailed requirements. Using the detailed requirements, the Contractor will propose the Integration Service Type to the Department. Once the Department and Contractor mutually agree on the Integration Service Type, the value indicated in the "Total Fixed Hours..." row for each Integration Service Type will be the total hours that the Department will reimburse the Contractor for the respective Integration Service Type regardless of the actual level of effort required to complete the work.

OMC38: The Contractor shall provide 3,000 system enhancement pool hours for the duration of the DDI phase of the contract. The cost of these 3,000 system enhancement pool hours are included in the offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool for DDI includes personnel cost for all resources supporting the system enhancement effort. The unused system enhancement pool hours for DDI will be rolled over to the system enhancement pool for Operations or the number or system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for DDI will require one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G, Claims Pricing Schedules, Schedule D-Enhancement Pool Hours.

OMC39:The Contractor will provide 2,000 system enhancement pool hours during the Operations phase per operations year. The cost of these annual 2,000 system enhancement pool hours are included in the Offeror's fixed price and included in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The System Enhancement Pool includes personnel cost for all staff supporting the system enhancement effort. Unused system enhancement pool hours for each year of operations may be rolled forward to the next operations year or the number of system enhancement pool hours may be adjusted downward, at the discretion of the State. Any reduction in the number of system enhancement pool hours for operations will require a one month notification by the State, and the cost of the contract will be reduced proportional to the cost of the reduction in system enhancement pool hours eliminated using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours. The cost of the contract will be reduced proportional to the cost of the unused hours using the rates provided in Attachment G Pricing Schedules, Schedule D-Enhancement Pool Hours.

|                                                                          |                                                |                              |                          |
| CUSTOMER NAME AND ADDRESS                                                | ISSUING FINANCIAL INSTITUTION NAME AND ADDRESS | BENEFICIARY NAME AND ADDRESS |                          |
|                                                                          |                                                |                              |                          |

The purpose of this Irrevocable Letter of Credit is to create a primary obligation on the part of the Issuing Financial Institution to the State of Montana relating to the above-captioned matter.

Funds in an amount up to but not exceeding the amount noted above are available prior to the contract expiration date, plus 60 calendar days thereafter. The Issuing Financial Institution agrees to honor this Irrevocable Letter of Credit upon receipt of a properly dated and signed letter demanding payment. No other documentation or substantiation will be requested or required. The check for the amount requested will be transmitted within 10 days of the receipt of a letter as long as it is presented to the Issuing Financial Institution on or before the close of business within 60 calendar days of the contract expiration date.

This Irrevocable Letter of Credit shall be deemed automatically extended without amendment for one year from the contract expiration date, or any future expiration date, unless 60 days prior to any expiration date, the Issuing Financial Institution notifies the State of Montana that they elect not to consider this Letter of Credit renewed for any such additional period. Notice of nonrenewal will be sent to the State Procurement Bureau, Department of Administration, P.O. Box 200135, Helena, MT 59620-0135.

This Letter of Credit is subject to and governed by the International Chamber of Commerce Uniform Customs and Practice for Commercial Documentary Credits (2007 Revision) (UCP No. 600), the laws of the State of Montana (Mont Code Ann. §§ 30-5-101, *et seq.*), and Administrative Rule of Montana 2.5.502. In the event of any conflict, the laws of the State of Montana will control with venue in Lewis and Clark County.

Sincerely,

---

Authorized Signature – Issuing Financial Institution

## **APPENDIX E. SOURCE CODE ESCROW AGREEMENT**

This Appendix has been intentionally omitted as not being relevant unless and until the Department requests that Contractor deliver Custom Software to the Department as part of the Module. In that event, the parties will address clarifications to the Contract terms regarding Custom Software and the parties' related rights and obligations, to clarify the terms regarding source code escrow, for instance to provide that the Department would be made a beneficiary of Contractor's existing source code escrow agreement.

Upon mutual agreement, and subject to written acceptance, the Contractor shall provide Source Code for the current version of the Custom Software as a Deliverable on a quarterly basis in lieu of placing the source code in escrow.

## APPENDIX E

### SOURCE CODE ESCROW AGREEMENT

THIS ESCROW AGREEMENT (the "Agreement") is made as of this \_\_\_ day of \_\_\_\_\_, 20\_\_\_ (the "Effective Date"), among \_\_\_\_\_ ("ESCROW AGENT"), \_\_\_\_\_ ("LICENSOR"), and the State of Montana acting by and through the Department of Public Health and Social Services ("LICENSEE").

#### RECITALS

LICENSOR and LICENSEE have entered into a Contract dated the Effective Date (the "Medicaid Management Information System Contract") to license certain Application Software and Third-Party Software (as described in the Medicaid Management Information System Contract) (the "Software") upon specified terms and conditions; and

To assure the continued availability and usefulness of such Software, LICENSOR has agreed to establish and maintain in escrow with ESCROW AGENT the Software source code and certain documentation therefor.

NOW, THEREFORE, in consideration of the foregoing premises and the mutual covenants contained herein and other good and valuable consideration, receipt of which is hereby acknowledged, the parties agree as follows:

#### **1. Deposit in Escrow.**

**1.1** Within 30 days of the Effective Date as defined in the Medicaid Management Information System Contract, LICENSOR shall deliver to ESCROW AGENT a sealed package containing the same current version of the source code for the Software which is owned by third parties, licensed to LICENSEE by LICENSOR, and is described as the Contractor Software in the Medicaid Management Information System Contract, programmer notes, its database schema and architecture, and its related documentation (collectively, the "Source Materials"). LICENSOR shall identify each item in said package and certify the completeness and accuracy of the Source Materials in a letter forwarding the same to ESCROW AGENT, with a copy of each letter to LICENSEE. Immediately upon receipt of the package, ESCROW AGENT shall give notice to LICENSEE of such receipt.

**1.2** LICENSOR shall deliver revisions of the Source Materials, including the Source Code for the Software, to ESCROW AGENT as and when corresponding revisions of the Executable Code for the Software are delivered to LICENSEE in accordance with the Medicaid Management Information System Contract. At such time as any modifications or revisions to the Source Materials are deposited with ESCROW AGENT, LICENSOR shall give written notice of such deposits to LICENSEE.

**1.3** ESCROW AGENT shall acknowledge receipt of all revisions of or additions to the Source Materials by sending written acknowledgment thereof to both LICENSOR and LICENSEE.

**1.4** Upon receipt of a new revision, ESCROW AGENT agrees to return to LICENSOR all such Source Materials from previous revisions as specified by LICENSOR in writing to ESCROW AGENT.

#### **2. Release From Escrow.**

**2.1** ESCROW AGENT shall seven days following receipt of an affidavit, which is from an officer of LICENSEE to ESCROW AGENT sent via certified mail with return receipt requested, and which states that one of the following events has occurred, proceed in accordance with the procedure described in Sections 2.3 through 2.7 below if:

**2.1.1** LICENSOR has made an assignment for the benefit of creditors; or

**2.1.2** LICENSOR institutes or becomes subject to a liquidation or bankruptcy proceeding of any kind; or

**2.1.3** A receiver or similar officer has been appointed to take charge of all or part of LICENSOR's assets; or

**2.1.4** LICENSOR terminates its maintenance and support services for LICENSEE for the Software or breaches its support and maintenance obligations for the Software for LICENSEE, whether due to its ceasing to conduct business generally or otherwise; or

**2.1.5** LICENSOR fails to make timely payments of fees and other costs required under this Agreement.

**2.2** LICENSEE shall send a copy of the affidavit to LICENSOR via certified mail with return receipt requested, simultaneously with its affidavit to ESCROW AGENT. Upon its receipt of the affidavit as provided above in Section 2.1, ESCROW AGENT shall immediately give written notice to LICENSOR, attaching a copy of the affidavit to the notice, via certified mail with return receipt requested.

**2.3** Upon receipt of such notices in accordance with Sections 2.1 and 2.2, LICENSOR shall have 30 days to review LICENSEE's affidavit requesting release from escrow as provided for in Section 2.1 above.

**2.4** If LICENSOR does not give notice to ESCROW AGENT within the 30 days provided in Section 2.3 that LICENSEE's request for release from escrow is contested by LICENSOR, ESCROW AGENT shall automatically release the Source Materials to LICENSEE. The Source Materials shall be used by LICENSEE subject to the Medicaid Management Information System Contract and solely for support and maintenance for the Software within the provisions of the Medicaid Management Information System Contract. Delivery of the Source Materials to LICENSEE in accordance with provisions hereof shall automatically terminate this Escrow Agreement.

**2.5** If LICENSOR does give ESCROW AGENT notice within the 30 days provided in Section 2.3 that LICENSEE's request for release from escrow is contested by LICENSOR, ESCROW AGENT shall retain the Source Materials in escrow while LICENSOR and LICENSEE either:

**2.5.1** Settle the dispute among themselves and jointly give notice to ESCROW AGENT in writing of the result; or

**2.5.2** Submit the dispute to litigation for resolution in accordance with the terms of this Agreement.

**2.6** In the event of litigation, ESCROW AGENT shall dispose of the Source Materials as directed by the court of competent jurisdiction's finding given in writing to all parties.

**2.7** Each party shall bear its own costs incurred in any litigation as set forth in Section 2.5 above

### **3. Ownership of Source Material.**

**3.1** The tangible medium comprising the escrowed Source Materials, but not the source code or technical specifications and other information embodied in such tangible media, shall be in the possession of ESCROW AGENT as soon as such material is received by ESCROW AGENT and at all times until the Source Materials are returned to LICENSOR or to LICENSEE as outlined in Section 2 above.

**3.2** ESCROW AGENT, LICENSOR, and LICENSEE recognize and acknowledge that ownership of the source code itself shall remain the sole and exclusive proprietary property of LICENSOR at all times and that nothing in this Agreement shall be interpreted to deprive LICENSOR of any right, title or interest in or to the Source Materials.

**3.3** It is expressly understood and agreed that LICENSEE's right to obtain the source code and other documentation from escrow is subject to the terms described in Section 8 of the Medicaid Management Information System Contract and that LICENSEE shall have no right or claim to LICENSOR's proprietary rights in the Software.

#### **4. Storage and Security.**

**4.1** ESCROW AGENT will act as custodian of the Source Materials until the escrow is terminated. ESCROW AGENT shall establish, under its control, a secure receptacle for the purpose of storing the Source Materials.

**4.2** The Source Materials deposited with ESCROW AGENT by LICENSOR pursuant to this Escrow Agreement shall remain the exclusive property of the LICENSOR, except as otherwise provided in Section 2.

**4.3** Except as provided in this Agreement, ESCROW AGENT agrees that:

**4.3.1** It shall not divulge, disclose or otherwise make available to any parties other than LICENSOR or LICENSEE, or make any use whatsoever, of the Source Materials;

**4.3.2** It shall not permit any person access to the Source Materials, except as may be necessary for ESCROW AGENT's authorized representatives to perform its functions under this Agreement;

**4.3.3** Access to the Source Materials by LICENSOR shall be granted by ESCROW AGENT only to those persons duly authorized in writing by a competent officer of LICENSOR or as provided herein; and

**4.3.4** Access to the Source Materials shall not be granted without compliance with all security and identification procedures instituted by ESCROW AGENT.

**4.4** ESCROW AGENT shall, upon LICENSEE's request and pursuant to the Medicaid Management Information System Contract, verify or determine that the Source Materials deposited with ESCROW AGENT by LICENSOR do, in fact, consist of those items which LICENSOR is obligated to deliver under any agreement.

**4.5** ESCROW AGENT shall accept, store and deliver the Source Materials deposited with it by LICENSOR, in accordance with the terms and conditions of this Agreement.

**4.6** If any of the Source Materials held in escrow by ESCROW AGENT shall be attached, garnished or levied upon pursuant to an order of court, or the delivery thereof shall be stayed or enjoined by an order of court, or any other order, judgment or decree shall be made or entered by any court affecting the Source Materials or any part thereof of any act of ESCROW AGENT, ESCROW AGENT is hereby expressly authorized in its sole discretion to obey and comply with all orders, judgments or decrees so entered or issued by any court, without the necessity of inquiring whether such court had jurisdiction, and in case ESCROW AGENT obeys or complies with any such order, judgment or decree, ESCROW AGENT shall not be liable to LICENSEE, LICENSOR or any third party by reason of such compliance, notwithstanding that such order, judgment or decree may subsequently be reversed, modified or vacated.

**4.7** ESCROW AGENT shall, at its expense, indemnify, defend, and hold harmless LICENSEE, its employees, officers, directors, contractors and agents from and against any losses, liabilities,

damages, penalties, costs, fees, including without limitation reasonable attorneys' fees, and expenses from any breach of Section 4.3.

**5. Termination.** LICENSEE and LICENSOR may terminate this Agreement by mutual written agreement, giving 60 days notice to ESCROW AGENT. This Agreement may also be terminated in accordance with the terms of Section 2.

**6. Good Faith Reliance.** ESCROW AGENT shall act in good faith reliance upon any instruction, instrument, or signature believed in good faith to be genuine and may assume that any person purported to give any writing, notice, respect, advice, or instruction in connection with or relating to this Agreement has been duly authorized to do so.

**7. Fees.** ESCROW AGENT shall be entitled to reasonable compensation for performance of its duties hereunder and for establishment of the escrow described herein. LICENSOR shall pay for the costs to establish, maintain, and verify the escrow described herein.

**8. Entire Agreement.** Except to the extent this Agreement incorporates by reference specific sections of or definitions from the Medicaid Management Information System Contract, this Agreement constitutes the entire Agreement among the parties, including the subject matter hereof and shall supersede all previous communications, representations, understandings and agreements, either oral or written between the parties. This Escrow Agreement is intended to be and shall be treated as an agreement separate and distinct from the Medicaid Management Information System Contract.

**9. Notice.** Notice will deemed to be given by the parties under the Agreement if in writing and delivered personally or by messenger, by telecopier or facsimile, or mailed by first-class, registered, or certified mail, postage prepaid, to the addresses noted below the signatures on the Agreement. Each party will provide notice to the other of changes to such addresses.

**10. Governing Law.** This Agreement shall be governed by and construed according to the laws of the State of Montana. LICENSOR and ESCROW AGENT consent to personal jurisdiction in that State. The exclusive venue of any action hereunder, including arbitration (if any), shall be in the First Judicial District in and for the County of Lewis and Clark, State of Montana.

**11. Severability.** In the event any of the provisions of this Agreement shall be held by a court of competent jurisdiction to be contrary to any state or federal law, the remaining provisions of this Agreement will remain in full force and effect.

**12. Headings.** The headings in this Agreement do not form a part of it, but are for convenience only and shall not limit or affect the meaning of the provisions.

**13. Medicaid Management Information System Contract Terms.** Capitalized terms not defined in this Agreement shall have the meanings provided in the Medicaid Management Information System Contract. However, to the extent this Agreement is in conflict with the Medicaid Management Information System Contract, the terms of this Agreement shall prevail.

IN WITNESS WHEREOF, the parties hereto have executed this Escrow Agreement as of the Effective Date.

## **APPENDIX F. FEDERAL REQUIREMENTS**

## APPENDIX F. FEDERAL REQUIREMENTS

### **1 Generally**

- 1.1** Contractor, in addition to the federal requirements specified in this Contract and any appendices to this Contract, must comply with the applicable federal requirements and assurances for recipients of federal grants provided in the federal OMB 424B (Rev. 7-97) form, known as "ASSURANCES - NON-CONSTRUCTION PROGRAMS", and in the Department's "CERTIFICATION OF COMPLIANCE WITH CERTAIN REQUIREMENTS FOR DEPARTMENT OF PUBLIC HEALTH & HUMAN SERVICES (MAY 2011)". Those assurance documents must be signed by Contractor and submitted to the Department prior to the signing of this Contract.
- 1.2** Contractor is responsible for determining which requirements and assurances are applicable to Contractor.
- 1.3** Contractor must ensure compliance of its subcontractors with the applicable federal requirements and assurances and any related reporting requirements.

### **2 Federal Financial Requirements**

- 2.1** Contractor must maintain appropriate financial, accounting and programmatic records necessary to substantiate conformance with federal requirements governing fund expenditures, even if this Contract is not cost / budget based.
- 31.2.2** Contractor must comply with the federal audit requirements set forth in 2 CFR 200.201 through 200.521
- 31.2. 3** Contractor must comply with the federal cost and accounting principles set forth in 2 CFR 200,400 through 200.475.

### **3 Political and Lobbying Activities**

- 3.1** Federal monies received by Contractor under the terms of this Contract may not be used for any political activities by Contractor, its employees or agents except as expressly permitted by state and federal legal authorities.
- 3.2** As required by 31 U.S.C. §1352 and 45 CFR §93.100 et seq., federally appropriated monies may not be used to influence or attempt to influence an officer or employee of any agency, a member of the U.S. Congress, an officer or employee of the U.S. Congress or an employee of a member of the U.S. Congress, in connection with the awarding of any federal Contract, grant or loan, the making of any cooperative agreement or the extension, continuation, renewal, amendment or modification of any federal Contract, grant, loan or cooperative agreement.

**3.3** If any funds other than federally appropriated funds are paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of the U.S. Congress, an officer or employee of the U.S. Congress or an employee of a member of the U.S. Congress in connection with this Contract, Contractor must complete and submit to the Department the federally required form.

**3.4** Federally appropriated monies received through the programs of the federal Departments of Health and Human Services, Education, and Labor, as provided in Section 503 of H.R. 2029 – “Consolidated Appropriations Act, 2016”, and as may be provided by congressional continuing resolutions or further budgetary enactments, may not be used:

**3.4.1** to fund publicity or propaganda, or for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, electronic communication, radio, television, or video presentation designed to support or defeat legislation pending before the U.S. Congress or a state legislature, except for presentations to the U.S. Congress or a state or local legislative body as an aspect of normal and recognized executive-legislative relationships;

**3.4.2** to support or defeat any proposed or pending regulation, administrative action, or order issued by the executive branch of any State or local government, except in presentation to the executive branch of any state or local government itself;

**3.4.3** to pay the salary or expenses of any grant or contract recipient, or agent acting for the recipient, related to any activity designed to influence enactment of legislation, appropriation, regulation, administrative action, or executive order proposed or pending before the U.S. Congress or a state government, state legislature, or local legislature or legislative body other than for normal and recognized executive-legislative relationships or participation by an agency or officer of a state, local or tribal government in policymaking and administrative processes with the executive branch of that government;

**3.4.4** To promote any proposed, pending or future federal, state or local tax increase; or

**3.4.5** To promote any proposed, pending or future requirement or restriction on any legal consumer product including its sale or marketing, including the advocacy or promotion of gun control.

**3.4.6** Contractor must cooperate with any investigation undertaken regarding the expenditure of funds for political or lobbying activities.

#### **4 General Prohibition on Contracting With Federally Debarred Entities or Persons**

**4.1** The Department, in accordance with The Federal Acquisition Streamlining Act of 1994, P.L. 103-355, and Executive Orders #12549 and #12689, is prohibited from contracting with any entity that is debarred, suspended, or otherwise excluded from participating in procurement activities funded with federal monies. This prohibition also extends to contracting with an entity that has a director, officer, partner, person with beneficial ownership of more than 5 percent of the entity's equity, employee, consultant, or person otherwise providing items and services that are significant and material to the entity's obligations under this Contract with the Department if that person has been debarred, suspended or otherwise excluded from participating in procurement activities funded with federal monies. The general federal listing of debarred persons and entities for contracting purposes is maintained by the federal General Services Administration (GSA) at [www.epls.gov](http://www.epls.gov).

**4.2** If the Department finds that Contractor is not in compliance with these contract related federal debarment requirements, the Department:

**4.2.1** must notify the federal government;

**4.2.2** may continue this Contract for its current term unless the Secretary of the federal Department of Health and Human Services or other authorizing federal authority directs otherwise; and

**4.2.3** may only renew or otherwise extend the duration of the existing contract with Contractor if the federal government provides to the Department and to Congress a written statement describing compelling reasons that exist for renewing or extending this Contract.

#### **5 Prohibition In Relation To Expenditures of Medicaid Monies on Contracting With Entities or Persons Listed As Debarred By the Federal Department of Health & Human Services**

**5.1** At the time of engagement and on a regular basis thereafter, Contractor must check the "List of Excluded Individuals/Entities" maintained by the Office of Inspector General for the federal Department of Health & Human Services at <http://exclusions.oig.hhs.gov/> to determine whether any person or entity engaged with or employed by Contractor appears on the list and will immediately report to the Department any person or entity who appears on the list and will take appropriate action to terminate Contractor's relationship with the debarred person.

**5.2** The Department will terminate this Contract immediately if Contractor:

**5.2.1** is an entity is debarred, suspended, or otherwise excluded by the federal Office of Inspector General ["OIG"] or by the Department under federal or state

legal authority from participating in federally funded procurement activities or from receiving reimbursement through a health care program unless the OIG provides a lawful waiver of the debarment exclusion; or

**5.2.2** employs or engages a person who is debarred or subject to debarment from receiving reimbursement through federal and state health care programs, including a director, officer, partner, person with beneficial ownership of more than 5 percent of Contractor's equity, employee, consultant, or person otherwise providing items and services that are significant and material to Contractor's obligations under this Contract with the Department.

**6** Reporting for compliance with the federal transparency act. Contractor must comply with the reporting requirements of the Federal Funding Accountability And Transparency Act (FFATA or Transparency Act), P.L. 109-282, as amended by Section 6202(a), P.L. 110-252-1 and provide the information listed on Contract Appendix L, which is incorporated in the Contract by reference.

**7** Contractor is required by the Transparency Act to report to the Department in some circumstances the compensation, as specified in this subsection, of Contractor's top 5 officers/executives, If a compensation report is required by this subsection it is to be titled "Officers/Executive Compensation Report" and sent to the Business and Financial Services Division of the Department through the following means:

the Department  
Attn: BFSD - FFATA Reporting  
P.O. Box 4210  
Helena, MT 59604-4210

**7.1** Contractor, in lieu of compiling this report for the Department may submit, as may be currently available from Contractor, the most current public report of compensation information as reported to the Security And Exchange Commission (SEC) under sections 13(a) or 15(d) of the Securities Exchange Act of 1934 through Contractor's annual proxy statement or as reported to the Internal Revenue Service under section 6104 of the Internal Revenue Code of 1986 through Section VII of Contractor's Form 990.

**7.2** The compensation report submitted to the Department by Contractor must include Contractor's Data Universal Numbering System (DUNS) number issued through Dun and Bradstreet.

**7.3** The compensation report submitted to the Department by Contractor is due by the end of the month that follows the month in which the total of the monies obligated through this Contract is at \$25,000 or more whether it occurs at the time of signing or at some later date due to a contractual amendment. Even if the total consideration for the Contract should be amended later to be less than \$25,000, Contractor is required to continue to provide the compensation report.

## **8 Text Messaging While Driving**

**8.1** A Contractor and its subcontractors are requested to adopt and enforce policies, in accordance with Presidential Executive Order 13513, October 1, 2009, that ban text messaging by owners, officers, employees, agents and subcontractors while driving in contractor or employee owned or leased vehicles for purposes of the work contracted for through this Contract.

**8.2** Contractors and subcontractors receiving funding through this Contract originating with the Centers For Disease Control And Prevention (CDC) of the federal Department Of Health And Human Services are prohibited from texting while driving a government owned vehicle or when using government furnished electronic equipment while driving any vehicle.

**8.3** Texting includes reading from or entering data into any handheld or other electronic device, including SMS texting, e-mailing, instant messaging, obtaining navigational information, or engaging in any other form of electronic data retrieval or electronic data communication.

**8.4** Driving includes operating a motor vehicle on an active roadway with motor running, including while temporarily stationary due to traffic, a traffic light, stop sign or otherwise. It does not include operating a motor vehicle with or without the motor running when one has pulled over to the side of, or off, an active roadway and has halted in a location where one can safely remain stationary.

**8.5** Contractor and its subcontractors are responsible for ensuring that owners, officers, employees, agents and subcontractors are aware of Contractor's adopted policies and adhere to the requirements and prohibitions of those policies.

## **9 Certification Of Tax Compliance** If Contractor receives \$5,000,000 or more in funding from the federal appropriations for the programs of the federal Departments of Health and Human Services, Education, and Labor, as provided in Section 503 of H.R. 3547, "Consolidated Appropriations Act, Division H, Departments Of Labor, Health And Human Services, And Education, And Related Agencies Appropriations Act, 2014", Pub. L. No. 113-76, Contractor must certify in writing to the Department that to the best of its knowledge or belief Contractor has filed all federal tax returns required during the 3 years preceding the certification, has not been convicted of a criminal offense under the Internal revenue Code of 1986, and has not, more than 90 days prior to certification, been notified of any unpaid federal tax assessment for which the liability remains unsatisfied unless the assessment is the subject of an installment agreement or offer in compromise that has been approved by the Internal Revenue Service and is not in default, or the assessment is the subject of a non-frivolous administrative or judicial proceeding.

## **APPENDIX G. WORK PLAN**

**APPENDIX H. REQUEST FOR PROPOSALS**

The State of Montana's Request for Proposal (RFP) DPHHS-RFP-2020-0254T, dated October 29, 2019

This is a place holder for the RFP and any attachments or amendments.

## **APPENDIX I. RESPONSE**

This is a place holder for the response to the Request for Proposal (DPHHS-RFP-2020-0254T), October 29, 2019 and any attachments or amendments including all documents and artifacts submitted by Conduent State Healthcare, LLC to the State of Montana eMACS on February 18, 2020.

**APPENDIX J. BUSINESS ASSOCIATE AGREEMENT**

## **APPENDIX J BUSINESS ASSOCIATE AGREEMENT**

### **PARTIES**

This Business Associate Agreement (Agreement) is entered into between the Department of Public Health and Human Services, (the Department), State of Montana (State), 111 N. Sanders, P.O. Box 4210, Helena, Montana 59604, (406) 444-6902, e-mail [HHSLEGALAFFAIRS@mt.gov](mailto:HHSLEGALAFFAIRS@mt.gov) and Conduent State Healthcare, LLC (Business Associate) whose nine (9) digit Federal ID Number is 58-2479287, and whose address, phone number, and e-mail address are: 9601 Amberglen Blvd, Suite 200, Austin, TX 78729; 512.573.3808; and Donna.Migoni@conduent.com.

### **THE PARTIES AGREE AS FOLLOWS:**

#### **1. Business Associate Status**

a. The Department is subject to and must comply with provisions of the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), as codified at 42 U.S.C. § 1320d-d8, and the Health Information Technology for Economic and Clinical Health Act (the "HITECH Act"), enacted as part of the American Recovery and Reinvestment Act of 2009, as codified at 42 U.S.C. §§ 300jj et seq. and §§ 17901, et seq. and the implementing regulations for the two acts at 45 CFR Parts 160, 162 and 164.

b. The Department has determined it is a hybrid entity as defined in the implementing regulations, that is a covered entity performing both covered and non-covered functions. Under the HIPAA and HITECH and the implementing regulations, the Business Associate, as an entity that performs or assists in the performance of an administrative or data function for the Department involving the use or disclosure of protected health information (PHI) for the Department, is acting as a business associate of a covered entity.

#### **2. Definitions that Apply to This Agreement**

Terms used in this Agreement have the same meaning as those terms in the HIPAA and HITECH Acts and the implementing regulations.

#### **3. Status as a Business Associate**

The Business Associate agrees that it is a Business Associate of the Department, as defined at 45 CFR § 160.103, and further agrees that it is obligated to comply with the terms of this Agreement and with the requirements of the HIPAA and HITECH Acts and the implementing regulations.

#### **4. Obligations of Business Associate**

The Business Associate, as a business associate of the Department, must:

- a. use or disclose PHI, including E-PHI, only as is permitted or required by this Agreement, in compliance with the Department's minimum necessary standard policies and procedures, or by applicable law inclusive of 45 CFR Parts 160, 162 and 164;
- b. use appropriate safeguards to prevent use or disclosure of PHI and E-PHI other than as provided for by this Agreement or by law;
- c. implement appropriate administrative, physical and technical security safeguards as set forth in § 164.306, § 164.308, and § 164.312, that reasonably and appropriately protect the confidentiality, integrity, and availability of PHI and prevent use or disclosure of the PHI other than as provided for by this Agreement;
- d. mitigate to the extent practicable and as may be directed by the Department any harmful effect that is known to the Business Associate of a use or disclosure of PHI by the Business Associate that is in violation of the requirements of this Agreement;
- e. report in a timely manner as required by law and this Agreement to the Department any use or disclosure of the PHI not provided for by this Agreement inclusive of uses and disclosures of information that are not in compliance with the minimum necessary standard;
- f. report to the Department any security incident of which it becomes aware, and at the request of the Department must identify: i) the date of the security incident, ii) the scope of the security incident, iii) the Business Associate's response to the security incident, and iv) the identification of the party responsible for causing the security incident, if known;
- g. enter, as required by 45 CFR § 164.504, into Business Associate Agreements containing the terms and conditions as required by the HIPAA and HITECH Acts and the implementing regulations and as are stated in this Agreement, with any subcontractors performing services in relation to the services being provided by the Business Associate for the Department that involve PHI; and
- h. make internal practices, books, and records, including policies and procedures and PHI, relating to the use and disclosure of PHI received from, or created or received by the Business Associate on behalf of the Department, available to the Department, or to the Secretary of the Federal Department of Health and Human Services in accordance with 45 CFR § 164.408, in a time and manner prescribed by the Department or designated by the Secretary, for purposes of the Secretary determining

the Department's and the Business Associate's compliance with the Privacy Regulation, the Security Regulation, and the HITECH Act;

i. document disclosures of PHI and collect information related to those disclosures necessary for the Department to respond to a request by a person for an accounting of disclosures of PHI in accordance with 45 CFR § 164.528 and Section 13405(c) of the HITECH Act;

j. provide to the Department or a person, in time and manner prescribed by the Department, documentation necessary for the Department to respond to a request by a person for an accounting of disclosures of PHI in accordance with 45 CFR § 164.528. Notwithstanding 45 CFR § 164.528(a)(1)(i), the Business Associate must document disclosures of PHI made through an electronic health record to carry out treatment, payment or health care operations as provided by 45 CFR § 164.506 in the six years prior to the date on which the accounting is requested, and to collect information related to such disclosures as required by the Secretary in regulation pursuant to Section 13405(c)(2) of the HITECH Act;

k. implement a response program, in compliance with Section 13402 of the HITECH Act and implementing regulations, and Subpart D of 45 CFR Part 164 that specifies the actions to be taken when the Business Associate detects or becomes aware of unauthorized access to information systems. The response program must include the following features:

(i) The Business Associate must notify the Department, by facsimile or telephone, of any breach or suspected breach of its security related to areas, locations, or computer system which contain unsecured PHI, including, without limitation, any instance of theft, unauthorized access by fraud, deception, or other malfeasance or inadvertent access (a Security Incident) in accordance to 45 CFR § 164.410, as promptly as possible, upon having reason to suspect that an incident may have occurred or determining the scope of any such Security Incident, but in no event later than two (2) calendar days upon having reason to suspect that an incident may have occurred;

(ii) In the event of any incident, the Business Associate must provide to the Department, in writing, those details concerning the incident as the Department may request, and must cooperate with the Department, its regulators and law enforcement to assist in regaining possession of the unsecured PHI and in preventing its further unauthorized use, and take any necessary remedial actions as may be required by the Department to prevent other or further incidents;

(iii) If the Department determines that it may need to notify any person(s) as a result of such incident that is attributable to the Business Associate's breach of its obligations under this Agreement, the Business Associate must bear all reasonable direct and indirect costs associated with the

determination, including, without limitation, the costs associated with providing notification to the affected person, providing fraud monitoring or other services to affected persons and any forensic analysis required to determine the scope of the incident;

(iv) The Business Associate, working in cooperation with the Department, must update the notice provided to the Department under this Agreement of the incident to include, to the extent possible and as soon as possible, the identification of each person whose unsecured PHI has been, or is reasonably believed by the Business Associate or the Department to have been accessed, acquired, used or disclosed during the incident and must provide any of the following information the Department is required to include in its notice to the person pursuant to 45 CFR § 164.404(c):

(A) A brief description of what happened, including the date of the incident and the date of the discovery of the incident, if known;

(B) A description of the types of unsecured PHI that were involved in the incident (e.g., Social Security Number, full name, date of birth, address, diagnosis);

(C) Any steps the person should take to protect themselves from potential harm resulting from the incident;

(D) A brief description of what is being done to investigate the incident, mitigate the harm, and protect against future incidents;

(E) Contact procedures for persons to ask questions or learn additional information which shall include a toll-free number, an e-mail address, website, or postal address;

(F) This additional information must be submitted to the Department immediately at the time the information becomes available to the Business Associate;

(v) limit its use and disclosure of PHI created or received by the Business Associate from or on behalf of the Department to uses or disclosures as are permitted to the Business Associate under the applicable requirements of 45 CFR § 164.504(e) and the HITECH Act and the terms of this Agreement. The Business Associate must also comply with the additional requirements of Subtitle D of the HITECH Act that relate to privacy and that apply to covered entities and to the Business Associate as a business associate; and

(vi) respond to a person's request under 45 CFR § 164.522(a)(1)(i)(A) that the Business Associate restrict the disclosure of the person's PHI.

## **5. Permitted Uses, Disclosures and Limitations**

a. Except as otherwise limited in this Agreement, the Business Associate may use or disclose PHI on behalf of, or to provide services to, the Department for the following purposes, if such use or disclosure of PHI would not violate the requirements of the HIPAA and HITECH Acts and the implementing regulations if done by the Department or otherwise violate the minimum necessary policies and procedures of the Department as set forth in the Master Agreement.

b. The Business Associate may use PHI to report violations of federal and state laws to appropriate Federal and State authorities, consistent with 45 CFR § 164.502(j)(1) and (2).

c. The Business Associate, as required by 45 CFR § 164.504(e)(1)(iii), must terminate any business associate agreement with a subcontractor that violates the requirements of this Agreement or the applicable law.

d. The Business Associate shall not directly or indirectly receive remuneration in exchange for PHI that is created or received by the Business Associate from or on behalf of the Department.

## **6. Use and Disclosure for Business Associate's Purposes**

a. The Business Associate must use and disclose PHI that is created or received by the Business Associate from or on behalf of the Department in compliance with each applicable requirement of 45 CFR § 164.504(e) and the HITECH Act.

b. The Business Associate may use and disclose PHI for the proper management and administration of the Business Associate or to carry out the legal responsibilities of the Business Associate provided that:

- (i) the disclosures are required by law;
- (ii) the disclosures are expressly authorized in this Agreement by the Department;
- (iii) the Business Associate obtains reasonable assurances from the person to whom the information is disclosed that it will remain confidential and used or further disclosed only for the purpose for which it was disclosed to the person; and
- (iv) the Business Associate requires the person to whom the information is disclosed to report immediately any incident of which it is aware in which the confidentiality of the information has been breached.

c. The Business Associate may only use PHI for Data Aggregation purposes if the Department in this Agreement expressly authorizes those purposes and the Data Aggregation is permitted in accordance with 42 CFR § 164.504(e)(2)(i)(B).

d. To the extent otherwise permitted by this Agreement, a communication that is described in the definition of Marketing in 45 CFR § 164.501 for which the Department receives or has received Direct or Indirect Payment (excluding payment for Treatment) in exchange for making such communication, shall not be considered a Health Care Operation unless:

(i) such communication describes only a drug or biologic that is currently prescribed for the recipient of the communication and any payment received in exchange for making such a communication is reasonable in amount; or

(ii) the communication is made by the Business Associate on behalf of the Department and the communication is otherwise consistent with this Agreement. No communication may be made by the Business Associate without prior written authorization by the Department.

## **7. Obligations of the Department**

a. The Department must notify the Business Associate of any limitation(s) in the Department's notice of privacy practices in accordance with 45 CFR § 164.520, to the extent that such limitation may affect the Business Associate's use or disclosure of PHI. A copy of the Department's Notice of Privacy Practice is attached to this Agreement and incorporated herein.

b. The Department must notify the Business Associate of any changes in, or revocation of, permission by a person to use or disclose PHI, to the extent that such changes may affect the Business Associate's use or disclosure of PHI.

c. The Department must notify the Business Associate of any restriction to the use or disclosure of PHI that the Department has agreed to in accordance with 45 CFR § 164.522, to the extent that such restriction may affect the Business Associate's use or disclosure of PHI.

d. The Department, except as may be expressly agreed to by the parties and stated in this Agreement, may not request the Business Associate to use or disclose PHI in any manner that would not be permissible under the requirements of the HIPAA and HITECH Acts and the implementing regulations if done by the Department.

## **8. Term and Termination**

a. The term of this Agreement shall be effective as of the effective date that the Business Associate begins delivery of its services and shall terminate when all of the PHI provided by the Department to the Business Associate, or created or received by the Business Associate on behalf of the Department, is destroyed or returned to the Department, or, if it is infeasible to return or destroy PHI, protections are extended to such information, in accordance with the termination provisions in this subsection.

b. Upon the Department's knowledge of a breach, as defined in § 164.402, by the Business Associate, the Department, as its sole discretion, must provide an opportunity for the Business Associate to:

- (i) cure the breach; or
- (ii) end the violation and terminate this Agreement if the Business Associate does not cure the breach; or
- (iii) end the violation within the time specified by the Department; or
- (iv) immediately terminate this Agreement if the Business Associate has breached a material term of this Agreement and cure is not possible; or
- (v) if neither termination nor cure are feasible, the Department must report the violation to the Secretary.

c. Upon the Business Associate's knowledge of a material breach by the Department, the Business Associate must either:

- (i) notify the Department of such breach in reasonable detail, and provide an opportunity for the Department to cure the breach or violation; or
- (ii) if cure is not possible, the Business Associate may immediately terminate this Agreement; or
- (iii) if neither termination nor cure is feasible, the Business Associate shall report the violation to the Secretary.

d. The Department may unilaterally terminate this Agreement with the Business Associate upon thirty (30) days written notice in the event:

- (i) the Business Associate does not promptly enter into negotiations to amend this Agreement when requested by the Department pursuant to the terms of this Agreement; or
- (ii) the Business Associate does not enter into an amendment to this Agreement providing assurance regarding the safeguarding of PHI that the Department, in its sole discretion, deems sufficient to satisfy the standards and requirements of the HIPAA and HITECH Acts and the implementing regulations.

## **9. Effect of Termination.**

a. except as provided in this subsection, upon termination of this Agreement, for any reason, the Business Associate shall at the Department's sole discretion return or destroy all PHI received from the Department, or created or received by Business Associate on behalf of the Department. This Agreement shall apply to PHI that is in the possession of subcontractors or agents of the Business Associate. The Business Associate shall retain no copies of the PHI.

b. In the event that the Business Associate determines that returning or destroying the PHI is infeasible, the Business Associate must provide to the Department notification of the conditions that make return or destruction infeasible. Upon written agreement by the Department that return or destruction of PHI is infeasible, the Business Associate must extend the protections of this Agreement to such PHI and limit further uses and disclosures of such PHI to those purposes that make the return or destruction infeasible, for so long as the Business Associate maintains such PHI.

## **10. Miscellaneous.**

### **a. Regulatory References.**

A reference in this Agreement to a section in the Privacy Regulation or Security Regulation means the section as in effect or as amended.

### **b. Amendment.**

The Parties agree to take such action as is necessary to amend this Agreement from time to time as is necessary for the Department to comply with the requirements of the HIPAA and HITECH Acts and the implementing regulations.

### **c. Survival.**

The respective rights and obligations of the Business Associate under this Agreement shall survive the termination of this Agreement.

### **d. Interpretation.**

Any ambiguity in this Agreement shall be resolved to permit the Department to comply with the requirements of the HIPAA and HITECH Acts and the implementing regulations.

**ATTACHMENT A - DPHHS HIPAA Privacy Policy – Minimum Necessary**

Montana Department of Public Health and Human Services  
Health Insurance Portability and Accountability Act (HIPAA) Privacy Policy

|                |                    |             |
|----------------|--------------------|-------------|
| Policy Title:  | Minimum Necessary  |             |
| Policy Number: | 003                | Version 2.0 |
| Approved By:   | Marie Matthews     |             |
| Date Approved: | September 23, 2013 |             |

**Purpose:**

This policy addresses reasonable efforts to limit the amount of protected health information (PHI) requested and disclosed about a client to the minimum amount that is necessary to accomplish the purpose of the use (see HIPAA Privacy Policy 002 on Uses and Disclosures of PHI).

**Exceptions:**

The minimum necessary rule does not apply in the following circumstances:

1. Information necessary to provide treatment;
2. As requested by the client;
3. As required by law; and
4. As required for compliance with federal or state program mandates.

**Policy:**

1. DPHHS will limit its use and disclosure of PHI to the minimum that is necessary to accomplish the need. DPHHS will also limit the amount of PHI it requests to the minimum that is necessary to accomplish the need.

- a. Routine Disclosures – Each program will develop procedures to determine the minimum amount of information it can request or disclose to accomplish its defined purposes. Programs may not use, disclose or request an entire medical record unless the entire medical record is specifically justified as the amount of information needed to accomplish the purpose of the use, disclosure, or request.
- b. Non-routine Disclosures – Each program must develop criteria for non-routine disclosures and requests to assure that each request is evaluated against such criteria to limit the information used, requested, or disclosed to the minimum necessary to accomplish the purpose for the information.
- c. Access to Information – Supervisors must determine levels of access to PHI required by each job classification and must limit access to those staff who require the information in order to perform their job duties.

**APPENDIX K. ANNUAL DEPARTMENT CERTIFICATION FORM**

## **Appendix K - ANNUAL DEPARTMENT CERTIFICATION FORM**

### **ANNUAL CERTIFICATION FOR DEPARTMENT OF PUBLIC HEALTH & HUMAN SERVICES OF CONTRACTOR'S COMPLIANCE WITH CERTAIN STATE AND FEDERAL REQUIREMENTS (JUNE 2011)**

This annual certification form is standardized for general use by the Department Of Public Health And Human Services (Department) in contracting relationships. Not all of these assurances may be pertinent to Contractor's circumstances. Contractor in signing this form is certifying compliance only with those requirements that are legally or contractually applicable to the circumstances of the contractual relationship of Contractor with the Department.

These assurances are in addition to those stated in the federal OMB 424B (Rev. 7-97) form, known as "ASSURANCES - NON-CONSTRUCTION PROGRAMS", issued by the federal Office of Management of the Budget (OMB). Standard Form 424B is an assurances form that must be signed by Contractor if Contractor is to be in receipt of federal monies.

There may be program specific assurances, not appearing either in this form or in the OMB Standard Form 424B, for which Contractor may have to provide additional certification.

This form and OMB Standard Form 424B are to be provided with original signatures to the Department's contract liaison. The completed forms are maintained by the Department in the pertinent procurement and contract files.

Further explanation of several of the requirements certified through this form may be found in the text of related contract provisions and in the Department's policies pertaining to procurement and contractual terms. In addition, detailed explanations of federal requirements may be obtained through the Internet at sites for the federal departments and programs and for the Office for Management of the Budget (OMB) and the General Services Administration (GSA).

---

---

### **ASSURANCES**

Contractor, \_\_\_\_\_, for the purpose of contracting with the Montana Department of Public Health & Human Services, by its signature on this document certifies to the Department its compliance, as may be applicable to it, with the following requirements.

Contractor assures the Department:

### **GENERAL COMPLIANCE REQUIREMENTS**

A. That Contractor does not engage in conflicts of interest in violation of any state or federal legal authorities, any price fixing or any other anticompetitive activities that violate the federal antitrust Sherman Act, 15 U.S.C. §§1 – 7, Anti-Kickback Act, 41 U.S.C. §§ 51-58, and other federal legal authorities. And that Contractor does not act in violation of 18-4-141, MCA or other legal authorities by colluding with other contractors for the purpose of gaining unfair advantages for it or other contractors or for the purpose of providing the services at a noncompetitive price or otherwise in a noncompetitive manner. (reference Contract Section titled “Antitrust Violations”)

B. That Contractor does not act in violation of the federal False Claims Act at 31 U.S.C. §§ 3729–3733( the “Lincoln Law”) or of the Montana False Claims Act, at Title 17, chapter, 8, part 4, MCA. And that Contractor and its employees, agents and subcontractors act to comply with requirements of the federal False Claims Act by reporting any credible evidence that a principal, employee, agent, contractor, subgrantee, subcontractor, or other person has submitted a false claim to the federal government. (reference Contract Section titled “Reporting Of False Claims, Fraud, And Other Criminal Matters”)

C. That Contractor is solely responsible for and must meet all labor, tax, and other legal authorities requirements pertaining to its employment and contracting activities, inclusive of insurance premiums, tax deductions, unemployment and other tax withholding, overtime wages and other employment obligations that may be legally required with respect to it. (reference Contract Section titled “Compliance With Business, Tax, Labor, And Other Legal authorities”)

D. That Contractor maintains necessary and appropriate workers compensation insurance coverage. (reference Contract Section titled “Compliance With Business, Tax, Labor, And Other Legal authorities”)

E. That Contractor is an independent contractor and possesses, unless by law not subject to or exempted from the requirement, a current independent contractor certification issued by the Montana Department Of Labor And Industry in accordance with 39-71-417 through 39-71-419, MCA. (reference Contract Section titled “Compliance With Business, Tax, Labor, And Other Legal authorities”)

F. That Contractor’s subcontractors and agents are in conformance with the requirements of Sections B, C, and D of this Certification.

G. That Contractor, any employee of Contractor, or any subcontractor in the performance of the duties and responsibilities of the proposed contract: 1) are not currently suspended, debarred, or otherwise prohibited in accordance with 2 CFR Part

180, OMB Guidelines To Agencies On Governmentwide Debarment and Suspension (nonprocurement) from entering into a federally funded contract or participating in the performance of a federally funded contract; and 2) are not currently removed or suspended in accordance with 18-4-241, MCA from entering into contracts with the State Of Montana. (reference Contract Section titled “Federal Requirements”)

H. That Contractor is in compliance with those provisions of the privacy, security, electronic transmission, coding and other requirements of the federal Health Insurance Portability And Accountability Act of 1996 (HIPAA) and the federal Health Information Technology For Economic And Clinical Health (HITECH), a part of the American Recovery And Reinvestment Act Of 2009, and the implementing federal regulations for both acts that are applicable to contractual performance if Contractor is either a Covered Entity or a Business Associate as defined for purposes of those acts. (reference Contract Sections titled “Confidentiality Of Personal Information And Compliance With The Federal HIPAA And HITECH Privacy And Security Requirements” and “Business Associate Obligations”)

I. That, as required by legal authorities or contract, Contractor maintains smoke and tobacco free public and work sites. And if the contract performance is related to the delivery of a human service, Contractor does not perform any work involved in the production, processing, distribution, promotion, sale, or use of tobacco products or the promotion of tobacco companies; or 3) accept revenues from the tobacco industry or subsidiaries of the tobacco industry if the acceptance results in the appearance that tobacco use is desirable or acceptable or in the appearance that Contractor endorses a tobacco product or the gifting tobacco related entity. (reference Contract Section titled “Tobacco-free Workplace And Other Restrictions”)

### **COMPLIANCE REQUIREMENTS FOR FEDERALLY FUNDED CONTRACTS**

J. That Contractor, in conformance with the Pro-Children Act of 1994 (20 U.S.C. §6081 *et seq.*), prohibits smoking at any site of federally funded activities that serve youth under the age of 18. This federal prohibition is not applicable to a site where the only federal funding for services is through Medicaid monies or the federally funded activity at the site is inpatient drug or alcohol treatment.

K. That Contractor does not expend federal monies in violation of federal legal authorities prohibiting expenditure of federal funds on lobbying the United States Congress or state legislative bodies or for any effort to persuade the public to support or oppose legislation. (reference Contract Section titled “Federal Requirements”)

L. That Contractor maintains in compliance with the Drug-Free Workplace Act of 1988, 41 U.S.C. 701, *et seq.*, drug free environments at its work sites, providing required notices, undertaking affirmative reporting, and other requirements, as required by federal legal authorities.

M. That Contractor is not delinquent in the repayment of any debt owed to a federal entity.

N. That Contractor, if expending federal monies for research purposes, complies with federal legal authorities relating to use of human subjects, animal welfare, biosafety, misconduct in science and metric conversion.

O. That Contractor, if receiving aggregate payments of medicaid monies totaling \$5,000,000 or more annually, has established in compliance with 1902(a)(68) of the Social Security Act, 42 U.S.C. 1396a(a)(68), written policies with educational information about the federal False Claims Act at 31 U.S.C. §§ 3729–3733 (the “Lincoln Law”) and presents that information to all employees. (reference Contract Section titled “Reporting Of False Claims, Fraud, And Other Criminal Matters”)

P. That Contractor is in compliance with the executive compensation reporting requirement of the Federal Funding Accountability And Transparency Act (FFATA or Transparency Act), P.L. 109-282, as amended by Section 6202(a), P.L. 110-252-1, either in that Contractor does not meet the criteria necessitating the submittal of a report by an entity or in that, if Contractor meets the criteria mandating reporting, Contractor produces the information in a publicly available report to the Securities And Exchange Commission (SEC) or to the Internal Revenue Service and provides the report in a timely manner to the Department or produces a separate report with the information and submits that report to the in a timely manner to the Department. (reference Contract Section titled “Federal Requirements”)

Q. That Contractor, if a contractor for the delivery of medicaid funded services, is in compliance with the requirements of 42 C.F.R. §§ 455.104, 455.105, and 455.106 concerning disclosures of ownership and control, business transactions, and persons with criminal convictions. (reference Contract Section titled “Federal Requirements”).

R. That Contractor, if providing federally funded health care services, is not as an entity currently federally debarred from receiving reimbursement for the provision of federally funded health care services and furthermore does not currently have any employees or agents who are federally debarred from the receiving reimbursement for the provision of federally funded health care services. (reference Contract Section titled “Federal Requirements”)

**COMPLIANCE REQUIREMENTS FOR FEDERALLY FUNDED CONTRACTS INVOLVING THE PURCHASE OR DEVELOPMENT OF PROPERTY**

S. That Contractor manages any real, personal, or intangible property purchased or developed with federal monies in accordance with federal legal authorities.

T. That Contractor, if expending federal monies for construction purposes or otherwise for property development, complies with federal legal authorities relating to

flood insurance, historic properties, relocation assistance for displaced persons, elimination of architectural barriers, metric conversion and environmental impacts.

U. That Contractor, if the contract exceeds \$100,000, complies with mandatory standards and policies relating to energy efficiency which are contained in the state energy conservation plan issued in compliance with the federal Energy Policy and Conservation Act, Pub. L. 94-163, 42 U.S.C. §6321 et. seq.

V. That Contractor, if the contract exceeds \$100,000, complies with all applicable standards, orders and requirements issued under Section 306 of the Clean Air Act, 42 U.S.C. 7607, Section 508 of the Clean Water Act, 33 U.S.C. 1368, Executive Order 11738, and U.S. Environmental Protection Agency regulations, 40 C.F.R. Part15 and that if Contractor enters into a subcontract that exceeds \$100,000 these requirements are in that contract.

**APPENDIX M. NASPO VALUEPOINT COOPERATIVE PROCUREMENT PROVISIONS**

A. NASPO ValuePoint™ is a cooperative purchasing program of all 50 states, the District of Columbia and the territories of the United States. It is the cooperative contracting arm of the National Association of State Procurement Officials (NASPO), a non-profit organization formed in 1947 to promote public procurement throughout the country. NASPO ValuePoint facilitates administration of the NASPO cooperative group contracting consortium of state chief procurement officials for the benefit of state departments, institutions, agencies, and political subdivisions and other eligible entities (i.e., colleges, school districts, counties, cities, some nonprofit organizations, etc.) for all states, the District of Columbia, and territories of the United States. NASPO ValuePoint is identified in the Master Agreement as the recipient of reports and the NASPO ValuePoint administrative fee; and may perform contract administration functions relating to collecting and receiving reports and fees, as well as other contract administration functions, as assigned by the Lead State.

B. In addition to the State of Montana, the Lead State conducting this solicitation, the following Participating States have requested to be named in this RFP as potential users of the resulting Master Agreement: Colorado, Connecticut, Georgia, Hawaii, Idaho, Illinois, Maryland, Missouri, New Mexico, Oregon, South Dakota, Utah, Vermont. Other entities may become Participating Entities after award of the Master Agreement. Some Participating States may have included special or unique policies, practices, or terms and conditions considered important to disclose in this RFP. Those provisions may be included in their state Participating Addendum and would be negotiated with the supplier after award of the Master Agreement. Those policies, practices, or terms and conditions will not be addressed during this solicitation; therefore, the Lead State will not address questions or concerns or negotiate other States' terms and conditions. State-specific policies, practices, and terms and conditions will be included in the state-specific Participating Addendum to this Master Agreement.

## NASPO ValuePoint Master Agreement Terms and Conditions

### 1. Master Agreement and Order of Precedence

a. Any Order placed under this Master Agreement consists of the following documents:

- (1) A Participating Entity's Participating Addendum ("PA");
- (2) The State of Montana Agreement titled, "Contract between the Montana Department of Public Health and Human Services and [the Contractor]," subject to the order of precedence in subsection 24.9 of the agreement.

b. These documents shall be read to be consistent and complementary. Any conflict among these documents shall be resolved by giving priority to these documents in the order listed above. Contractor terms and conditions that apply to this Master Agreement are only those that are expressly accepted by the Lead State and must be in writing and attached to this Master Agreement as an Appendix or Attachment.

c. Except where otherwise agreed in the Participating Addendum, the Participating Entity shall have all the rights and obligations of the "Department", "DPHHS," or "State" in Montana's Contract between the Montana Department of Public Health and Human Services and the Contractor.

References to MPATH, the Montana Program for Automating Transforming Healthcare, are relevant to performance in the State of Montana and would be replaced in a Participating Addendum to the extent needed to define requirements of the Participating Entity.

### 2. Definitions

**Contractor** means the person or entity delivering products or performing services under the terms and conditions set forth in the Master Agreement.

**Department** as used in the State of Montana Agreement refers to the Participating Entity in Participating Addenda under this Master Agreement.

**Lead State** means the State of Montana.

**Master Agreement** means the Contract (also referred to as an Agreement) executed between the State of Montana, acting by and through the Department of Public Health and Human Services, and the Contractor, as now or hereafter amended, including these Master Agreement Terms and Conditions.

**NASPO ValuePoint** is the NASPO Cooperative Purchasing Organization LLC, doing business as NASPO ValuePoint, a 501(c)(3) limited liability company that is a subsidiary organization the National Association of State Procurement Officials (NASPO), the sole member of NASPO ValuePoint. NASPO ValuePoint facilitates administration of ValuePoint®, the NASPO cooperative contracting consortium of state chief procurement officials for the benefit of state departments, institutions, agencies, and political subdivisions and other eligible entities (i.e., colleges, school districts, counties, cities, some nonprofit organizations, etc.) for all states, the District of Columbia, and territories of the United States. NASPO ValuePoint will be the recipient of reports and may perform contract administration functions relating to collecting and receiving reports as well as other contract administration functions as assigned by the Lead State.

**Order** means the contract or other document used by a Participating Entity to order the Deliverables or Services under the State of Montana Agreement. The Participating Addendum may serve as the contractual ordering instrument.

**Participating Addendum** means a bilateral agreement executed by a Contractor and a Participating Entity incorporating the Master Agreement and any other additional Participating Entity requirements or terms/conditions specific to the Participating Entity. If so agreed by the parties, the Participating Addendum may also serve as the Order.

**Participating Entity** means a state or other authorized public entity that has signed a Participating Addendum.

**Participating State** means a state, the District of Columbia, or one of the territories of the United States that is listed in the Request for Proposal as intending to participate. Upon execution of the Participating Addendum, a Participating State becomes a Participating Entity. A Participating State listed in the Request for Proposals is not required to participate through execution of a Participating Addendum.

## **NASPO ValuePoint Program Provisions**

### **3. Term of the Master Agreement**

The Term is defined in section 2 of the Master Agreement. Where the Term of Contract is referred to in any provision of the Master Agreement, it means the earlier of the expiration or termination of the Master Agreement.

### **4. Participants and Scope**

a. Contractor may not deliver Deliverables or Services under this Master Agreement until a Participating Addendum acceptable to the Participating Entity and Contractor is executed. The Program Provisions of the NASPO ValuePoint Master Agreement Terms and Conditions are applicable to any Order by a Participating Entity. Statutory or constitutional requirements relating to availability of funds may require specific language in some Participating Addenda in order to comply with applicable law.

b. Obligations under this Master Agreement are limited to those Participating Entities who have signed a Participating Addendum. Entities permitted to participate may use an informal competitive process to determine which Master Agreements to participate in before execution of a Participating Addendum. Contractor shall email a fully executed PDF copy of each Participating Addendum to [PA@naspovaluepoint.org](mailto:PA@naspovaluepoint.org) to support documentation of participation and posting in appropriate data bases.

c. NASPO ValuePoint, is not a party to the Master Agreement. It is a nonprofit cooperative purchasing organization assisting states in administering the NASPO cooperative purchasing program for state government departments for all 50 states, the District of Columbia and the territories of the United States.

d. Participating Addenda shall not be construed to amend the following provisions in this Appendix M that prescribe NASPO ValuePoint Program requirements: Term of the Master Agreement; Participants and Scope; Administrative Fee; Right to Publish; NASPO ValuePoint Summary and Detailed Reports; NASPO ValuePoint Cooperative Program Marketing and Performance Review; and Individual Customers. Any such language is void and of no effect.

## 5. Administrative Fee

The Offeror will be required to pay two separate procurement administrative fees as part of this procurement (NASPO ValuePoint Administrative Fee and Participating State Procurement Administrative Fee) for Design, Development, and Implementation (DDI) services portion of the Participating Addendum. Procurement administrative fees will not be assessed on the Operations portion of the Participating Addendum. Procurement administrative fees will not be paid by the Participating State. Therefore, the Offeror's total proposed cost must account for the Offeror's responsibility to pay these fees to the respective entity at the time their invoices are paid. These procurement administrative fees support either the administration of the ValuePoint multi-state cooperative procurement program or they support the Participating State procurement activities in support of the multi-state cooperative procurement. The details of each administrative fee are as follows:

- a. **NASPO ValuePoint Administrative Fee:** The Contractor shall pay to NASPO ValuePoint, or its assignee, a NASPO ValuePoint Administrative Fee of one-quarter of one percent (0.25% or 0.0025) on DDI payments received from the Participating Entity no later than sixty (60) days following the end of each calendar quarter. The NASPO ValuePoint Administrative Fee shall be submitted quarterly and is based on all sales of products and services under the Master Agreement (less any charges for taxes or shipping) performed up until the time Design, Development, and Implementation (DDI) is completed. This fee is to be included as part of the pricing submitted with any proposal to a potential Participating Entity.
- b. **Participating State Procurement Administrative Fee:** If required by the Participating State, the Contractor shall pay to the Participating State Chief Procurement Officer, or its assignee, a Participating State Procurement Administrative Fee of no more than two and one-quarter percent (2.25% or 0.0225) on DDI payments received from the Participating Entity no later than sixty (60) days following the end of each calendar quarter (or subject to the terms of the Participating Addendum whichever is sooner). The Participating State Procurement Administrative Fee shall be submitted quarterly and is based on all sales of products and services under the Master Agreement (less any charges for taxes or shipping) performed up until the time Design, Development, and Implementation (DDI) is completed. This fee is to be included as part of the pricing submitted with any proposal to a potential Participating Entity. If a Participating State chooses to assess a procurement administrative fee in excess of two percent, the Offeror will be allowed to adjust their proposed cost for the Participating State to account for the difference. If the Participating State does not choose to assess a Procurement Administrative fee or if the Participating State Procurement Administrative Fee is less than 2.25%, the Contractor shall reduce their cost proportionally as part of the Participating Addendum.

## 6. NASPO ValuePoint Summary and Detailed Usage Reports

In addition to other reports that may be required by this solicitation, the Contractor shall provide the following NASPO ValuePoint reports:

- a. **Summary Sales Data.** The Contractor shall submit quarterly reports, on payments received from the Participating Entity, directly to NASPO ValuePoint using the NASPO ValuePoint Quarterly Sales/Administrative Fee Reporting Tool found at <http://www.naspo.org/WNCPO/Calculator.aspx>. Any/all sales made under this Master Agreement shall be reported as cumulative totals by state. Even if Contractor experiences zero sales during a calendar quarter, a report is still required. Reports shall be due no later than thirty (30) days following the end of the calendar quarter (as specified in the reporting tool).
- b. **Detailed Sales Data.** The Contractor and NASPO ValuePoint shall negotiate suitable detailed reporting formats to facilitate reporting of usage and administrative fees.
- c. **The Lead State and NASPO ValuePoint shall have a perpetual, irrevocable, non-exclusive, royalty free, transferable right to display, modify, copy, and otherwise use reports, data and information provided under this section.**

## **7. NASPO ValuePoint Cooperative Program Marketing and Performance Review**

Contractor acknowledges that the NASPO ValuePoint logos may not be used by Contractor in sales and marketing until a logo use agreement is executed with NASPO ValuePoint.

## **8. Right to Publish**

Throughout the duration of this Master Agreement, Contractor must secure from the Lead State prior approval for the release of information that pertains to the potential work or activities covered by the Master Agreement. This limitation does not preclude publication about the award of the Master Agreement or marketing activities consistent with any proposed and accepted marketing plan. The Contractor shall not make any representations of NASPO ValuePoint's opinion or position as to the quality or effectiveness of the services that are the subject of this Master Agreement without prior written consent. Failure to adhere to this requirement may result in termination of the Master Agreement for cause.

## **9. Individual Customers**

Each Participating Entity will be responsible for its own charges, fees, and liabilities.

## **Administration of Orders**

### **10. Ordering**

- a. Potential Participating Entities may define project-specific requirements and informally compete the requirement among companies having a Master Agreement in order to determine whether and with whom a Participating Addendum should be executed. This procedure may also be used when requirements are aggregated or other firm commitments may be made to achieve reductions in pricing. The potential Participating Entity may in its sole discretion determine which Master Agreement Contractors should be solicited for a quote.
- b. Each Participating Entity will identify and utilize its own appropriate purchasing procedure and documentation.
- c. Contractor shall not begin work without a valid contract or other appropriate commitment document (the Order) under the law of the Participating Entity.
- d. Orders may be placed consistent with the terms of this Master Agreement during the Term of the Master Agreement.
- e. All communications concerning administration of Orders placed shall be furnished solely to the authorized purchasing agent within the Participating Entity, or to such other individual identified in writing in the Order.
- f. Notwithstanding the expiration, cancellation or termination of the Master Agreement, Contractor agrees to perform in accordance with the terms of any Orders then outstanding at the time of such expiration or termination. Contractor shall not honor any Orders placed after the expiration, cancellation or termination of this Master Agreement, or otherwise inconsistent with its terms.

### **11. Payment**

Payment and other financial provisions are prescribed in Section 3 of the State of Montana Agreement, except the laws of Participating Entities may require a different late-payment period or other requirements as specified in the Participating Addendum. Contractors shall confer with Participating Entities regarding the applicable taxes and documents available to establish tax exemptions.

## General Provisions

### 12. Records Retention and Access

The rights and obligations in Subsection 4.7 of the State of Montana Agreement apply to Participating Entities also. Unless otherwise prescribed in the Participating Addendum, the state agencies granted access for any Order in a Participating Entity's state include the cognizant audit agency, and records retention and access requirements shall be consistent with applicable state statutes.

### 13. Public Information

This Master Agreement and all related documents are subject to disclosure requirements pursuant to the Participating Entity's public information laws.

### 14. Debarment

The Contractor certifies that neither it nor its principals are presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction (contract) by any governmental department or agency. This certification represents a recurring certification made at the time Participating Addendum is executed under this Master Agreement.

### 15. Governing Law and Venue

a. The construction and effect of any Participating Addendum to the Master Agreement shall be governed by and construed in accordance with the laws of the Participating Entity's state.

b. Venue for any claim, dispute, or action concerning the effect of a Participating Addendum shall be in the Participating Entity's State.

### 16. Tailored Application of State of Montana Agreement Provisions

**Preface: Wherever there is a reference to Montana law in this Master Agreement, a Participating Entity may substitute the applicable law of its state. This includes but is not limited to:**

a. Subsection 3.2, Maximum Amount and No Increases. The Maximum Amount under the Master Agreement and Appendix A shall be as specified in the Participating Addendum.

b. Subsection 3.7, Funding. Funding conditions refer to the Participating Entity's state for Orders outside the State of Montana.

c. Subsection 4.4, Participating Entity's Contract Manager and Project Manager. The Participating Entity will designate its Contract Manager and Project Manager in the Participating Addendum.

d. Subsection 4.5, Employment of State Personnel. With respect to Orders by Participating Entities outside the State of Montana, prohibitions on hiring current or past state employees shall be governed by the Participating Entity's state law.

e. Subsection 4.11, CIO Oversight. The Participating Addendum will identify the appropriate Participating Entity officer who will perform oversight activities.

f. Section 9, Ownership. Ownership by and assignment of rights to the Participating Entity shall be effective only insofar as ownership and assignment rights are not vested in the State of Montana with a right to further assign such rights (or grant adequate license rights) to the Participating Entity.

g. Subsection 13.2.3, Violation of State or Federal Law. This provision governing prohibited noncompetitive practices refers to applicable statutes in the Participating Entity's state.

h. Section 18, Insurance. The provisions of this section apply equally to Participating Entities, with the same insurance coverage required upon execution of a Participating Addendum.

i. Section 19, Protection of Proprietary Information of the Contractor and Proprietary Information of the Participating Entity. The open records and freedom of information laws of any Participating Entity shall govern in the event of conflict with this section 19.

j. Subsection 21, Indemnification. Unless modified in a Participating Addendum, the indemnification rights and obligations in Section 21 apply equally to any Participating Entity.

k. Subsection 23.8, Termination for Non-allocation of Funds. Applicable provisions to non-appropriation or non-allocation of funds by Participating Entities other than the State of Montana will be specified in the Participating Addendum.

l. RFP Attachment G – Pricing Schedules. Schedules A (Cost Summary), B (DDI Payment Milestones), C (Cost of Operations) and D (Enhancement Pool Hours) to Attachment G of the RFP shall be as specified in the Participating Addendum.

#### **APPENDIX N. Third-Party Pass Through Provisions**

The information provided in this Appendix N, below, describes Third-Party Pass Through Provisions that relate to agreements entered into between Contractor and third parties. Nothing in this Appendix N shall be construed to take precedence over, or to contradict any requirement of the Contract. In the event there is any conflict between the information provided in this Appendix N and the Contract, including the RFP, the Contract shall control.

## **APPENDIX O. SOLUTION DESCRIPTIONS**

The information provided in this Appendix O, below, describes in part how Contractor plans to meet the requirements of the Contract. Nothing in this Appendix O shall be construed to take precedence over, or to contradict any requirement of the Contract. In the event there is any conflict between the information provided in this Appendix O and the Contract, including the RFP, the Contract shall control.

The solution description for the Contractor's proposed solution is set forth in the Contractor's Response to the Request for Proposal, as well as in the Request for Proposal, both of which are incorporated by reference.

As mentioned in the Response, in the event that the Participating State cancels the Participating Addendum with Conduent prior to the maximum contract term, at no additional cost and as an added value to the Participating State, in addition to the SaaS rights Contractor is granting the Participating State as set forth in the Contract, Contractor also is granting the Participating State certain access and use rights to a specific portion of certain Contractor module(s) for a defined 10-year period starting with the Effective Date of the Participating Addendum and extending beyond the date of cancellation or termination of the Participating Addendum PROVIDED THAT the cancellation or termination of the Participating Addendum occurs before the 10-year period has expired. Specifically, Contractor is granting the Participating State the following fixed term license:

Fixed Term License. At no additional cost and as an added value to the Participating State Entity in addition to the SaaS rights Conduent is granting the Participating Entity as set forth in the Contract, Conduent also is granting the Participating Entity a renewable, limited, non-exclusive, non-sublicensable, non-transferable right to use, to access, and to permit a mutually agreed upon list of state staff users to use and access the portions of the CMdS Claims Module necessary for the Participating Entity to use the Participating Entity Work Product for the purpose of continuing to process State Medicaid claims for payment for a 10 year term starting on the date the Contract is signed by the last party to sign it (as indicated by the date associated with that party's signature) (the "Effective Date of the Participating Addendum") PROVIDED THAT this license does not include any hosting or other services AND THAT this license does not apply to third party commercial off the shelf (COTS) software, programming, tools, documentation, materials, and other intellectual property, or materials or to open source software, programming, tools, documentation, materials, and other intellectual property, or materials AND THAT Participating Entity shall not extract such Contractor Work Product from Participating Entity Work Product for use separately therefrom. As used in this license, the term Participating Entity Work Product means the modifications to the CMdS Claims reports, data, and materials that are created specifically for the Participating Entity by Conduent and paid for entirely by the Participating Entity as an output of the Services or other performance by Conduent under this Agreement. In the event the Participating Entity purchases all Optional Services as defined in the RFP, this fixed term license also applies to the portions of the CMdS Financial Module and CMdS Federal Reporting Module necessary for the Participating Entity to use the Participating Entity Work Product for the purpose of continuing to process State Medicaid claims for payment.
