

Medicaid Management

Provider Service

Seamless, automated Medicaid provider management

Medicaid programs need to efficiently fulfill provider enrollment and screening requirements necessary to meet Centers of Medicaid and Medicare Services (CMS) mandates and ensure program integrity.

Gainwell Technologies makes it easier for providers to participate in your Medicaid program. Our Provider Service module is an essential component of our Medicaid Management Solutions, a wide-ranging set of services for healthcare interoperability that combines automation, standardization and process maturity to support all aspects of Medicaid.

Purpose-built for Medicaid, our Provider Service offering is available through the NASPO ValuePoint cooperative purchasing program.

Increase automation, improve efficiency

Advanced functionality in our Provider Service module helps you seamlessly handle provider enrollments and screening, accurately identify providers in health plan networks and efficiently manage associated provider data. The solution increases maturity, efficiency and accuracy in provider processing, and provides the modularity and technology you need to deliver high-quality and timely Medicaid services.

We offer a cloud-based platform and a SaaS approach to help you manage provider information—from initial enrollment through the final termination letter. Our flexible healthcare services solution is based on COTS software aligned with industry standards. Our Provider Service tools support providers' participation in fee-for-service and in other programs, including enrollment with managed care organizations (MCOs).

Dynamic and powerful service modules

Our Provider Service provides the modularity required by federal Medicaid mandates—it unites automation, standardization and process maturity into easy-to-use modules that are always available and always current. The solution includes federally required provider screening and enrollment processes, so you can use the modules to upgrade and componentize your current provider network management and contracting capabilities.

Gainwell's four Provider Service sub-modules can be implemented individually or linked as part of our Medicaid Management Solution for healthcare interoperability.

**Provider
Enrollment**

**Provider
Screening**

**Provider
Management**

**Provider
Portal**

Provider Enrollment module

The Provider Enrollment module guides providers through the enrollment process using a dynamic Enrollment Wizard, a user-friendly tool that orchestrates smart data entry. The wizard leverages built-in data lists and data validation services to increase accuracy and minimize errors—and only asks for relevant and necessary data. The module automates revalidation.

A built-in configurable workflow and business-rules engine reduce your reliance on IT staff. A letter correspondence tool manages provider communication. Providers can choose menu options to easily perform enrollment activities and check the status of applications.

Provider Screening module

The Provider Screening module is specifically designed to address CMS provider qualification requirements, including enrollment business rules. Built-in automation reduces your costs and expands stakeholders' ability to identify exceptions in the screening process by referencing an extensive catalog of state and Federal resources.

Provider Screening enables you to easily and accurately identify appropriate providers who can offer care to beneficiaries. Both the Provider Enrollment Module and the Provider Screening Module deliver increased efficiency and greater investigative power to your healthcare enterprise. You save money, boost data accuracy and offer better service to both your member and provider populations.

Provider Management module

The Provider Management module is a COTS product aligned with MITA. The module includes a wealth of new features we designed to help you accurately and efficiently manage provider enrollment, relations and contracting. We upgraded traditional batch-scheduled paper reports to online reporting that is available on demand and enhanced with automated flags and queries for follow up.

New workflow processes interface between management and screening modules to streamline and automate monthly provider screenings. The module facilitates compliance with federal regulations for provider screenings and regularly incorporates CMS changes as part of our continuous improvement of our Medicaid Management Solutions.

Provider Portal module

The Provider Portal module links the provider modules together and allows you to tailor your system's look to meet your specific needs. Your administrative staff can configure menu items and turn them on or off, facilitating a fast turnaround on changes.

The portal's user-friendly design includes an intuitive, context-sensitive help bar for quick, relevant assistance.

The benefits of our Provider Service

- Reduce costs through automation and improved efficiency
- Increase ease of use and data accuracy
- Improve modularity and interoperability
- Attain greater investigative capabilities
- Meet federal CMS requirements

Results you can expect

A Gainwell Provider Service state client produced the following results:

- Decreased the average time for a provider to complete enrollment from 1-2 hours to 15 minutes
- Decreased the average time to screen an application from more than one hour to 15 minutes
- Decreased the number of enrollment staff needed from 12 to 9
- Decreased the average enrollment time from 120 days to 5-7 days
- Increased the number of enrollments received monthly from 250 to more than 600
- Increased the number of enrollments processed monthly from 150-200 to more than 800
