Tia Snyder, Procurement Officer

Re: RFP DPHHS-RFP-2020-0254T

Thank you for the opportunity to present our proposal for Claims Processing and Management Services for Montana's Program for Automating and Transforming Healthcare (MPATH).

We have thoroughly reviewed the Request for Proposal (RFP) and are pleased to present a comprehensive, compelling and competitive solution to address the full scope of services called out in the RFP.

Our market leading, widely deployed Claims Processing and Management solution aligns to the flexible, configurable and interoperable modular strategy to modernize the Medicaid enterprise.

We offer Montana and other participating states, Wipro Enterprise Medicaid as a Service (EMaaS), as a hybrid-cloud hosted SaaS solution that is:

- ✓ A best-in-class core claims and services solution to support Medicaid claims administration business processes now and in the future
- ✓ A full portfolio of integrated SaaS/COTS technical solutions to meet your requirements for features and functions, configurability, scalability, security, automation, efficiency and cost savings
- ✓ Built on our decades of experience in successfully managing and modernizing Medicaid enterprise systems and Fiscal Agent services

We are confident that our proposal will meet and exceed your expectations. If awarded the contract, we commit to successfully deliver on the objectives of this project.

Please reach out to Mr. Thomas Stockdale, Director of Business Development, for questions, clarification or more information regarding our proposal. He may be reached at:
