Does the Offeror have any sustainability policies or programs (e.g., adoption of a sustainability policy, climate action plan, using clean fuel vehicles or sustainable packaging to deliver products, powering your facilities with renewable energy, etc.)? If yes, describe and attach supporting documentation. If no, describe any plans the Offeror may have to do this in the future.

Our focus on environmental sustainability is part of MSC's commitment to environmental stewardship. MSC's sustainability efforts have delivered substantial, measurable results in reducing energy, water, and materials required to support our operations and those of our customers with programs that target specific manufacturing process related opportunities for environmental impact savings and reductions.

For comprehensive details, please see MSC's 2023 ESG Report, which includes the company's sustainability policy, climate action, and other pertinent sustainability information:

<https://cdn.mscdirect.com/global/media/pdf/corporate/2023-msc-industrial-supply-esg-report.pdf>

Key highlights of our initiatives are described in the excerpts from our ESG Report provided in the figures that follow.

SUSTAINABLE MANUFACTURING

Energy Savings in Manufacturing Businesses

MSC contributes towards environmental sustainability through energy savings and waste avoidance within the durable goods manufacturing marketplace (automotive, general machining, fabrication, medical parts, etc.). MSC's team of Metalworking Specialists and supplier network partner to help customers leverage the latest manufacturing tools, technologies and strategies.

2021
INNOVATION
IMPACT AWARD
PEOPLE'S CHOICE

Energy savings from MSC's cycle times testing prove fast, stable tools are a quicker and more productive way to manufacture metal or metal-like products. When successful, this cycle time reduction is multiplied by the number of parts the end user needs, becoming the basis for kilowatts and/or kilowatt hours saved. Our metalworking specialists' work has resulted in more than **225,000 hours** of machine hours saved, equating to a savings of over **32,000,000 kilowatt hours**.

Our Metalworking Specialists also show our customers how to use fewer tools or products when they manufacture their parts, resulting in waste savings or avoidance. Through educated recommendations like operating at a more stable operating speed to better product suggestions, tool life is enhanced with less need for exchanges or resharpener.

In 2023, MSC helped customers reduce the consumption of items such as grinding wheels, metalworking fluids and cutting tools by over **500,000 product units**, resulting in a savings of **approximately 88 million cubic inches of waste, or the equivalent of 150 concrete mixer trucks**.
