

MSQ38.1 - Identity and Access Management

Optum Rx is a part of UnitedHealth Group, which is a large public entity. We are heavily regulated and have audits performed from a number of sources including Deloitte & Touche (please see our annual report, page 84 for a clean opinion noted on our controls over financial reporting), State Departments of Insurance, Model Audit Rule, customers and other stakeholders. Optum Rx does not have a specific HIPAA report related to the RxClaim application, however, we are in compliance with HIPAA requirements.

The RxClaim application and the Optum Rx shared data center infrastructure are HITRUST certified which shows our security controls are working effectively. HITRUST certification letters can be provided upon request. We would be happy to discuss your needs and determine how we can assist you.

Based upon representation from management as to the accuracy and completeness of information provided, the procedures performed by an Authorized External Assessor to validate such information, and HITRUST's independent confirmation that the work was performed in accordance with the HITRUST® Assurance Program requirements, the following platforms, facility, and supporting infrastructure of the Organization ("Scope") meet the HITRUST CSF® v11.1.0 Risk-based, 2-year (r2) certification criteria:

Platforms:

-

-
-
-
-
-
-
-

Facility:

-

The certification is valid for a period of two years assuming the following occurs. If any of these criteria are not met, HITRUST will perform an investigation to determine ongoing validity of the certification and reserves the right to revoke the Organization's certification.

- Annual progress is being made on areas identified in the Corrective Action Plan(s) (CAPs),
- No data security breach reportable to a federal or state agency by law or regulation has occurred within or affecting the assessed environment,
- No significant changes in the business or security policies, practices, controls, and processes have occurred that might impact its ability to meet the HITRUST Risk-based, 2-year (r2) certification criteria, and
- Timely completion of the HITRUST Interim Assessment for r2 Certification as defined in the HITRUST Assurance Program Requirements.

HITRUST has developed the HITRUST CSF, a certifiable framework that provides organizations with the needed structure, detail and clarity relating to information protection. With input from leading organizations, HITRUST identified a subset of the HITRUST CSF controls that an organization must meet to be HITRUST Risk-based, 2-year (r2) Certified. For certain HITRUST CSF controls that were not being met, the Organization developed a CAP that outlined its plans for meeting such controls.

HITRUST performed a quality assurance review to ensure that the control maturity scores were consistent with the results of testing performed by the Authorized External Assessor. Users of this letter can refer to the document [Leveraging HITRUST Assessment Reports: A Guide for New Users](#) for questions on interpreting this letter and can contact HITRUST customer support

6175 Main Street
