

MSQ2.1 – System Screenshots

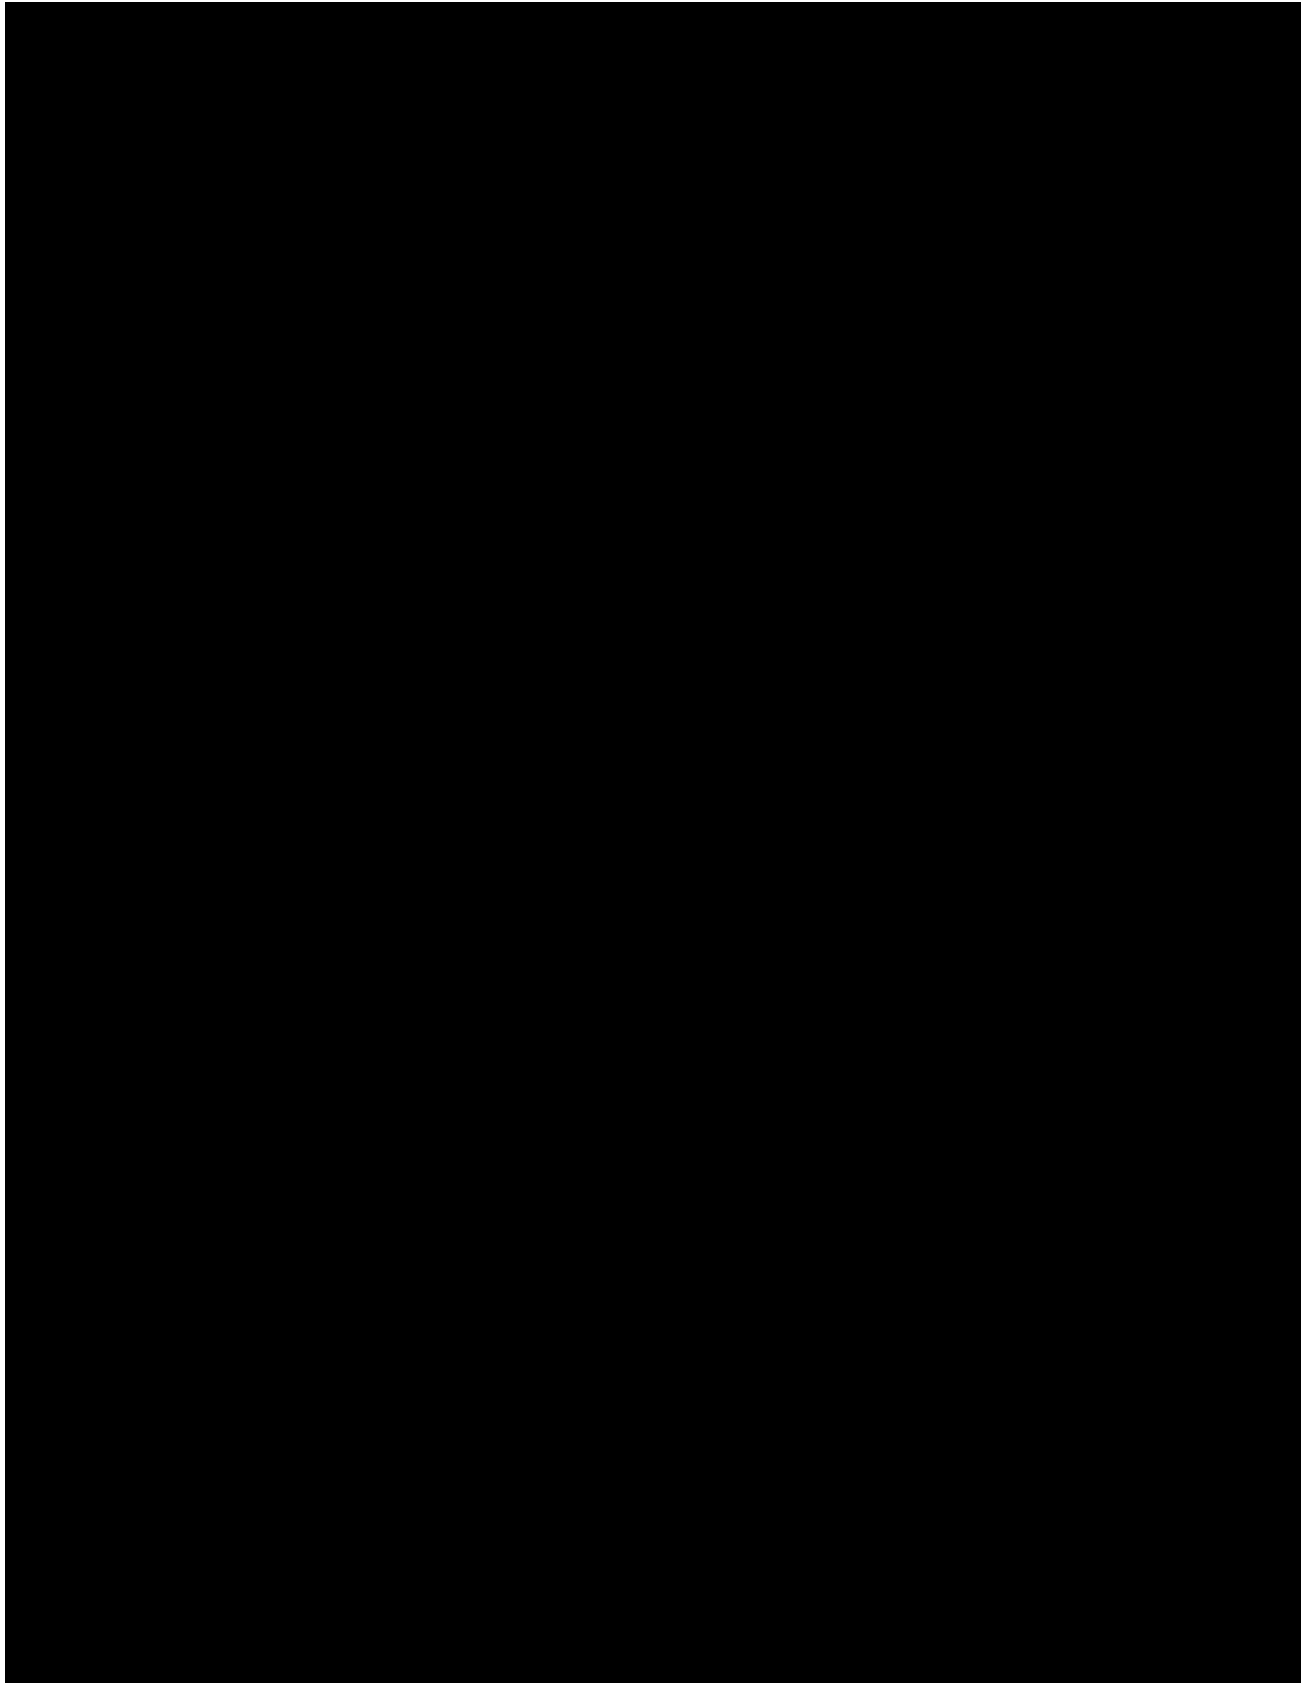

MSQ2a.

Optum Rx provides the State's Authorized Solution Users access to the Optum Rx Rebate System. Access is through a user interface which is initiated on the user's desktop through a standard internet browser (e.g., Microsoft Internet Explorer, Microsoft Edge, Safari, Google Chrome, Firefox) by accessing our internet uniform resource locator (URL). The Rebate System's four component applications are all accessed in this manner.

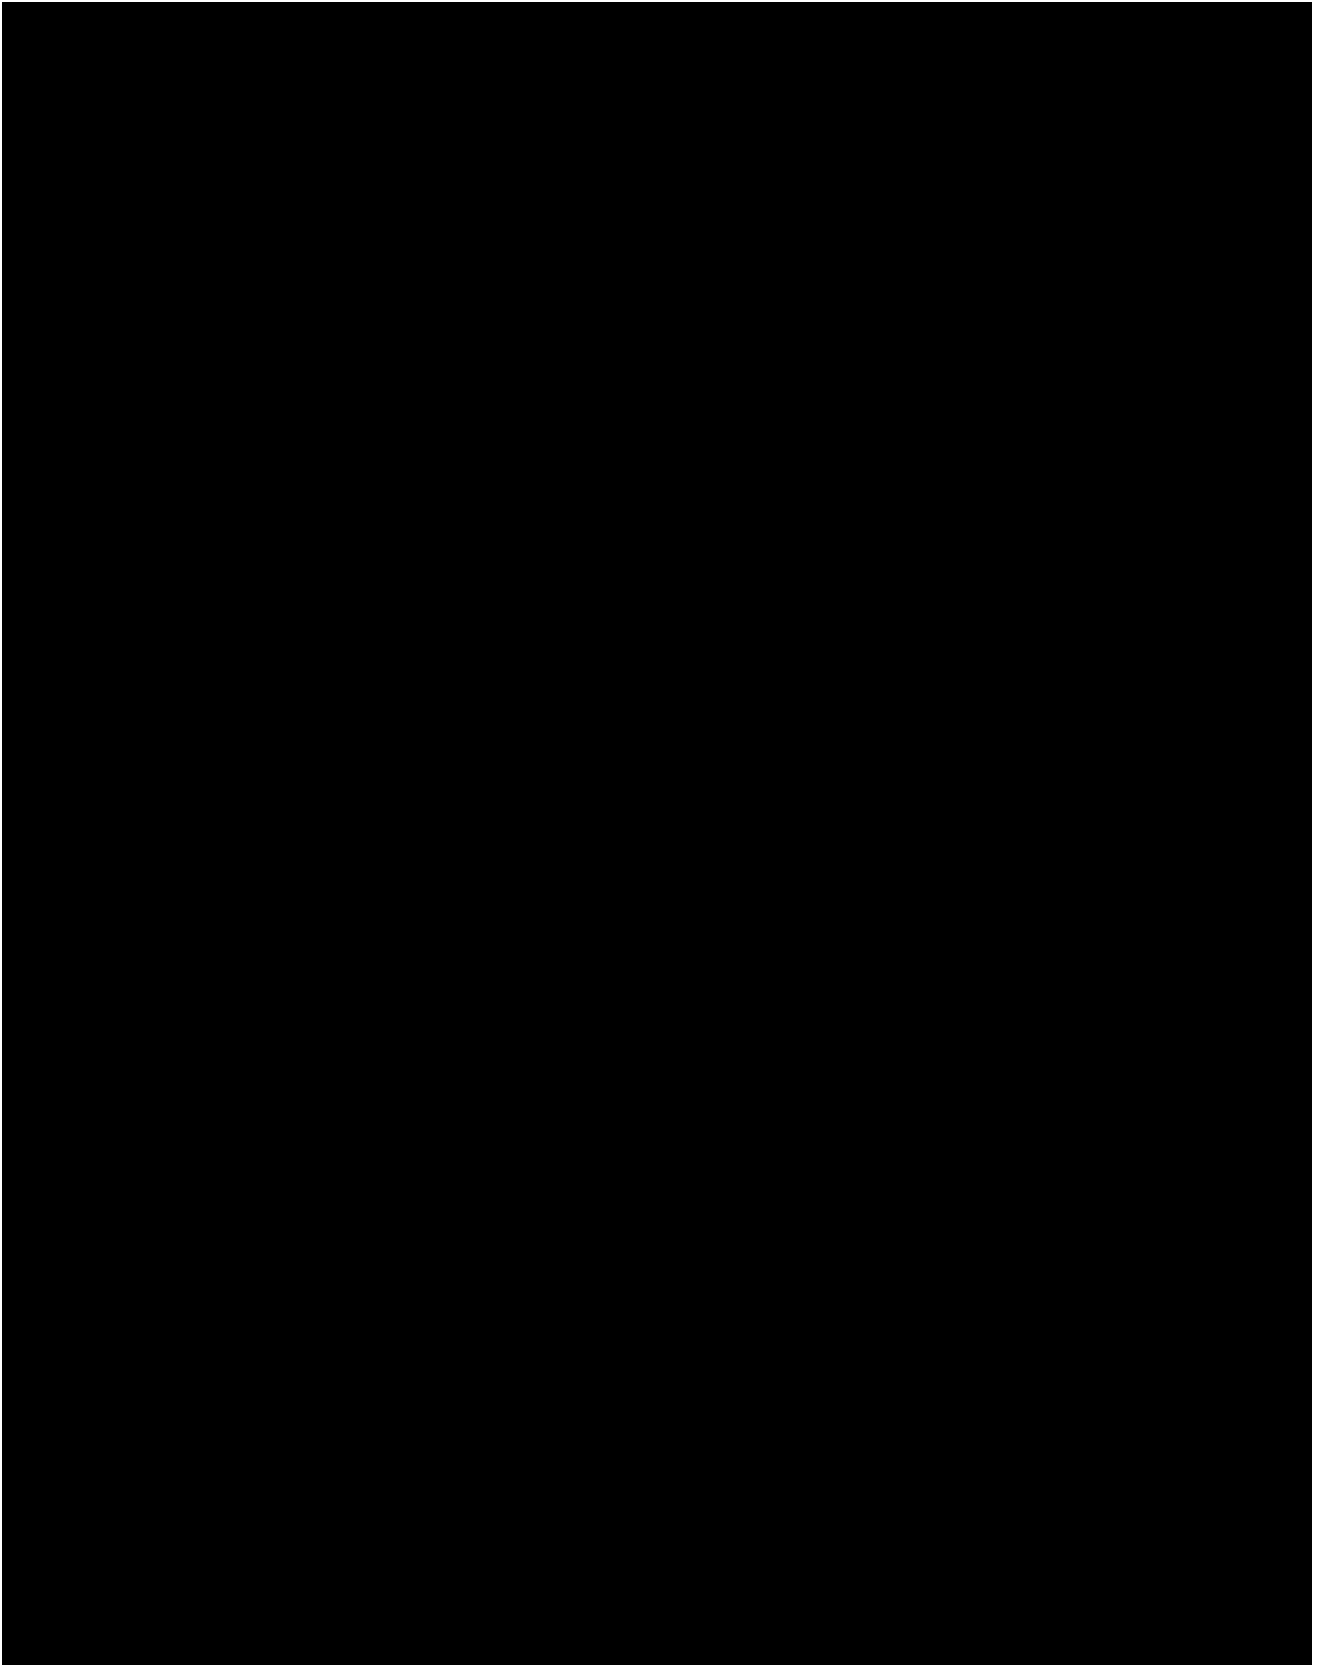

The Rebate System is programmed to restrict access to functions and features with role-based access control. Functionality is limited (e.g., read only versus update capability) based upon a user's defined role. Optum Rx provides the State's Authorized Solution Users with access to our Rebate System based on the applicable access level needed. The Rebate System's four component applications all utilize role-based access control.

The eROMS application is a web portal developed and maintained by Optum Rx. It is accessed through a user interface which is initiated on the user's desktop through a standard internet browser (e.g., Microsoft Internet Explorer, Microsoft Edge, Safari, Google Chrome, Firefox) by accessing our Internet URL. Optum Rx provides access to eROMS to the State's Authorized Solution Users as well as authorized users from manufacturers. While the State can review offer information from all manufacturers, authorized manufacturer users only have access to offer information for that specific manufacturer's products.

eROMS guides manufacturers, step-by-step, through the rebate offer submission process. Manufacturers can enter offers for any or all their NDCs. In addition, the manufacturers can make offers on either a Guaranteed Net Unit Price (GNUP) or a

percent of Wholesale Acquisition Cost (WAC) basis. Offerors can differentiate, whether GNUP or percent WAC, based on various PDL placement scenarios. Offers may be tiered to specify 1 of 1, 1 of 2, 1 of 3 or 1 of many preferred brand positioning.

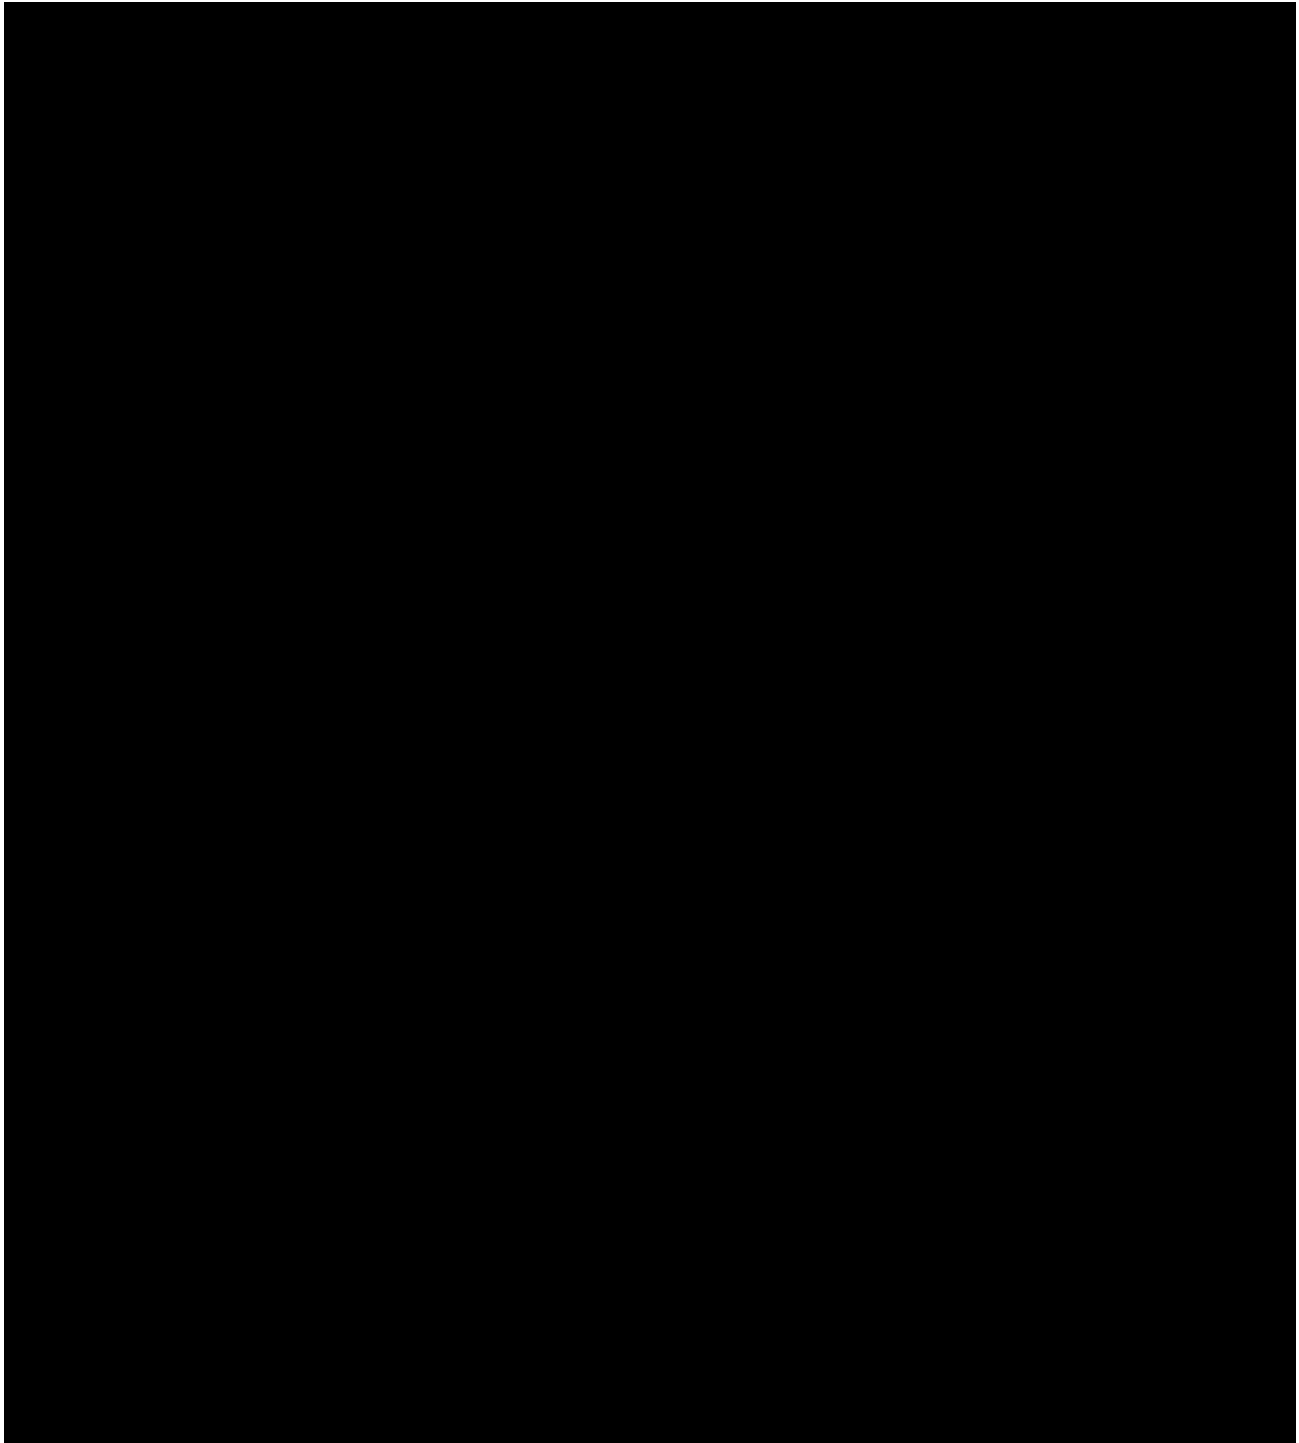

The below screenshot is a mock-up of the eROMS Home Page for the State. The eROMS login screen provides news, upcoming deadlines, links to related websites as well as providing the ability to download documents such as the State's CMS-approved Supplemental rebate template.
