Quest Summary Document and Fulfillment Partners

Quest Service (Q), Fulfillment Partner (FP)	Solution or Provider	Description
FP	6clicks	6clicks aims to redefine how the modern enterprise approaches risk and compliance by connecting organizations, third-parties, service providers and regulators from around the world. 6clicks is helping businesses and service providers bring risk assessment, risk management and compliance processes into the digital era. Our accessible tool allows businesses to digitally integrate service providers into these existing processes. We want to foster trust and transparency within and outside organizations, backed by new technologies and direct digital guidance.
FP	AAMP Global	Our asset and vehicle Fleet Management products span a variety of the most popular categories for vehicle enhancements, from safety and, multimedia, to audio and telematics such as cloud-based, real-time GPS tracking and monitoring, driver-behavior monitoring for safety, vehicle health, incident alerts, and ELD tracking and management. Our integration solutions enable the installation of those front-end technologies to interface with the vehicle's existing electrical system.
FP	Agate Software	Agate Software's industry leading grants management solution, IntelliGrants®, allows our state and federal government clients to manage all data related to the complete lifecycle of their grants in one user-friendly environment. The new IGX platform of IntelliGrants allows agencies to quickly analyze and report on any grant data that has been input into the system for any stage of the grant lifecycle. IntelliGrants offers an efficient, easy-to-use platform for managing your agency's complete grant management needs from pre-application through grant closeout.
FP	AireSpring, Inc.	Founded in 2001, AireSpring is an award-winning, nationwide network operator and managed services provider serving thousands of businesses nationwide. AireSpring provides fully managed and connected end-to-end, next-generation solutions for multi-location enterprises including SD-WAN, AirePBX™ Cloud Business Phone System, SIP Trunking, MPLS, Disaster Recovery, Managed Security, and Business Internet. AireSpring's services are delivered over its revolutionary nationwide MPLS Mesh network, via strategic wholesale relationships with over 20 major carriers, providing customers a fully integrated, end-to-end solution across the United States, from a single vendor.
FP	Allgress, Inc.	Allgress is a global provider of cost-effective IT security, compliance and risk management solutions for end-user organizations and 3rd party vendors. Allgress solutions allow organizations of all sizes to automate processes for the assessment, monitoring and remediation of risks with more flexibility and less complexity. Unlike other similar solutions, the Allgress patented technology permits customers to derive quicker-time-to-value without an army of consultants or the need for other applications. For additional information, please visit us at http://www.allgress.com
FP	AmpliFund	AmpliFund is a web-based grant management software for nonprofit and public sector organizations developed by StreamLink Software. AmpliFund is designed for managing every stage of the grant lifecycle, and is at the forefront of automating grant compliance and data standardization in the public sector. Find out more at www.streamlinksoftware.com/amplifund .
FP	Aspen Technology Group Inc.	Aspen Technology Group Inc. was founded with a single mission: to help our clients be the most successful, creative and customer centric providers as possible. We approach each of our clients' business needs with fresh eyes to help develop a customized digital experience using our unique set of strategies. Let us help make your customer experience and automation vision a reality. We serve businesses locally, regionally and internationally. Our solutions include Amazon Connect, AWS Serverless, Quick Base, Jabra, Google Apps, Dynamics – O365, WordPress Hosting and more.
Q	Backups as a Service	Organizations with on-premises backup deployments can extend their availability strategy to the cloud. By sending backups to Quest's cloud, customers can avoid the cost and complexity of building and maintaining an offsite infrastructure for backups and replication.
FP	Brighton Training Group	Brighton is an online training company that automates child nutrition training and tracking for dozens of state agencies and large sponsoring organizations. Our Bright Track SaaS solution is a hosted platform that includes a library of over 75 interactive online courses tailored to your state's rules and policies.

Quest Summary Document and Fulfillment Partners

FP	<u>Bynder</u>	Bynder, the first Digital Asset Manager delivered as pure SaaS, is designed for intuitive ease of use. This transformed the industry by making it easy for brand and creative teams to provide the right, on-brand assets across the enterprise. Today, as digital transformation accelerates, Bynder leads the evolution to the 3rd wave of DAM: the creative content engine that brands need to power personalized digital experiences including Digital Asset Management, Brand Guidelines, Creative Workflow, Content Workflow, Studio, Digital Brand Templates, Print Brand Templates, Analytics, and Integrations.
FP	<u>Cato Networks</u>	Cato is the world's first SASE platform, converging SD-WAN and network security into a global, cloud-native service. Cato optimizes and secures application access for all users and locations. Using Cato, customers easily migrate from MPLS to SD-WAN, optimize connectivity to on-premises and cloud applications, enable secure branch Internet access everywhere, and seamlessly integrate cloud datacenters and mobile users into the network with a zero-trust architecture. With Cato, the network, and your business, are ready for whatever's next. CatoNetworks.com @CatoNetworks.
FP	<u>CommunityConnect Labs</u>	CommunityConnect Labs enables government and service providers to use mobile messaging to connect with hard-to-reach populations. We provide mobile-first engagement solutions - including mobile messaging, interactive voice, or mobile web. The CommunityConnect platform is designed for government agencies and service providers to connect with your community quickly and easily in the most accessible way – by mobile messaging and texting. You can create sophisticated Q&A interactions, screen for eligibility, automate reminders, and conduct surveys. We work with leading governments and service providers, and we understand your needs for easy to use, accessible, and multi-language solutions to communicate with your communities.
FP	<u>Corvid Cyberdefense</u> (formerly Rocus Networks)	Corvid Cyberdefense is a leading provider of cybersecurity solutions and services. Corvid Cyberdefense Haven™ is their fully managed prevention, detection and response security solution that integrates all the necessary controls, management, and 24/7 monitoring to protect against cyberattacks. More information can be found at https://www.corvidcyberdefense.com/ , https://www.linkedin.com/company/corvid-cyberdefense/ , https://www.facebook.com/corvidcyberdefense , https://twitter.com/corvidcyber , and https://www.instagram.com/corvidcyberdefense/ .
FP	<u>Crowe LLP</u>	Crowe LLP (www.crowe.com) is a public accounting, consulting, and technology firm that uses its deep industry expertise to provide audit services to public and private entities. The firm and its subsidiaries also help clients make smart decisions that lead to lasting value with its tax and consulting services, helping businesses uncover hidden opportunities in the market – no matter what challenges the markets present.
Q	<u>Cylance</u>	Cylance® is revolutionizing cybersecurity with products and services that proactively prevent, rather than reactively detect the execution of advanced persistent threats and malware. Our technology is deployed on over four million endpoints and protects hundreds of enterprise clients worldwide including Fortune 100 organizations and government institutions. CylancePROTECT is 100% predictive and prevents cyberattacks from being successful by providing a proactive security posture with higher efficacy than traditional antivirus. Don't rely on detect and respond – get the power of prevention.
FP	<u>DataEndure</u>	DataEndure (formerly Computer Media Technologies) helps companies build digital resilience so that their critical information assets are protected and available to the right people, at the right time in a cost-effective and compliant way. We take a holistic approach in architecting and delivering a data management and protection strategy that leverages the relationship of integrated and interoperable solutions to simplify enterprise environments and accomplish our customer's specific business goals. DataEndure customers are better able to manage their IT risks, respond well when information assets are threatened, and protect and access their critical company information wherever it resides. www.DataEndure.com or 1-800-969-4268.
Q	<u>DR as a Service</u>	Combining protection, orchestration and automation all in one. There are no hidden costs, later discovered dependencies or lengthy custom scripts needed for recovery. Is your business more focused on protecting data than protecting applications? Applications typically span multiple Virtual Machines (VMs) and are more complex in terms of dependencies and infrastructure. They can require recovery

Quest Summary Document and Fulfillment Partners

		with write-order fidelity, database consistency, and more—something most replication solutions do not supply. We can help protect, recover and set protection policies for your applications that meet your business objectives, so in your time of need you have peace of mind.
FP	e-Builder	e-Builder Enterprise is fully-integrated, owner-centric, cloud-based construction software focused exclusively on meeting the needs of facility owners and construction professionals. An end-to-end Project Management Information Solution (PMIS) delivering outcomes from capital planning and design through commissioning.
FP	Eccovia Solutions	Eccovia Solutions provides an industry-leading care coordination platform for state Medicaid agencies, ACO/MCOs, Medicaid Waiver programs, and community-based providers. Our platform helps case workers and care providers collaborate across the spectrum of service delivery to address the physical, behavioral, and economic factors that drive population health.
FP	Echolo	The Echolo Internet of Things Platform delivers your data from the physical world to the digital one. Our platform and network were built from the ground up to reduce the complexity of traditional systems making it easy for you to get your products to market faster. Echolo's IoT Platform offers unmatched flexibility and ease of use, at a reasonable price point.
Q	eFax as a Service	A cloud-based document process and information exchange service, Quest's eFax as a Service enables companies to automate business documents and provide full visibility over all processes with just an Internet connection and web browser. Whether you need flexibility for variations in document volume or want support for basic compliance requirements, our on-demand offering provides value to companies seeking the highest levels of efficiency, security and control. eFax as a Service benefits include: pay for only what you use with predictable pricing models, go-live quickly with low risk and immediate scalability, benefit from 24/7 availability and access from anywhere, simplify IT infrastructure via system standardization, and meet contractual commitments thanks to scalable architecture.
FP	Emgage	Emgage for Government connects people with their cities and government through seamless digital experiences. No more bloated, disconnected, and costly government technologies. With Emgage, your constituents and communities will connect seamlessly across multiple jurisdictions sharing data, processes, and communication. Deliver services that reduce burdens on your staff and delight your residents. Our applications are built on the foundation of our Application Platform, a robust and integrated set of services that endows all applications with a consistent user experience, flexible architecture, and powerful capabilities.
Q	Endpoint Security as a Service	Quest offers Endpoint Security including threat detection, incidence response, vulnerability assessment, and configuration compliance. Quest also provides Endpoint Management including patch management, asset inventory, software distribution and asset utilization.
Q	Enformion, Inc.	The Enformion data aggregation platform integrates more than 6,000 data sources with a powerful algorithm that connects billions of records to build comprehensive profiles about US adult individuals. The data is available to end-users via three deliver vehicles: online web platform application, a published Application Program Interface (API), and traditional batch data file exchange for integration with third party applications and end-user database applications.
FP	Eproval	Eproval is a permitting software as a service (SaaS) platform that specializes in managing complex permitting, licensing, grant applications, and processes for film and special event offices. Our platform enables public agencies to digitize processes, automate workflows, and streamline collaboration, ultimately empowering agencies to manage their operations more efficiently. Eproval's cloud-based permitting platform is easy to implement, easy to use, and does not require any additional hardware. Plus, with Eproval's Customer Success team, you are never alone. You'll have access to our knowledge-based learning, subject matter experts, and library of best practices from cities across North America.
FP	Flairsoft	Flairsoft's flagship intellectual property product, Flairdocs offers an end-to-end, paperless business process and workflow automation solution for government agencies and interfacing organizations focused on case management, time management, acquisition, contract management, property rights management and enterprise permitting management. Flairdocs is included on the list of 50 Best Facility Management Software Tools. Flairsoft's services include application development and support, advisory and assistance services, independent verification and validation (IV & V) and quality assurance, artificial

Quest Summary Document and Fulfillment Partners

		intelligence: robotics process automation and chatbots, enterprise program management, business intelligence and data analytics, value added staffing, hardware and software license reseller, disaster recovery and business continuity. Flairsoft serves various state, federal and Fortune 500 companies in implementing business process management and enterprise solutions, which enables its customers to acquire innovative business capabilities that optimize operational performance, while reducing overall life cycle costs.
FP	First Fire Consulting	Elevate your contact center experience with First Fire Consulting, your trusted partner in optimization and revolutionizing operations. Our specialized consulting services are designed to comprehensively enhance efficiency, elevate customer satisfaction, and boost the overall performance of your contact center. With a focus on innovation and tailored solutions, we collaborate with you to implement strategies that align with your business objectives. From cutting-edge technology integration to personalized customer-centric approaches, our expertise ensures a transformative journey for your contact center. Partner with us to redefine your operational excellence and create a customer-centric environment that sets you apart in the competitive landscape.
FP	Fusion Connect	Fusion Connect provides the entire business communications and collaboration suite, all from one vendor. We'll help you choose the platform that best fits your business, so you get the most out of your business infrastructure.
FP	GeoSpatial Technologies	GeoSpatial Technologies® (GST) develops crime analysis solutions designed specifically for law enforcement Intel Units. GST IntelNexus Web is an intelligence database management system designed to help agencies stay compliant with 28 CFR Part 23. It allows agencies to collect, organize, maintain, and analyze sensitive information about individuals, organizations, and their activities. GST also develops location-based technologies, incorporating Geographic Information Systems (GIS), GPS, and wireless communications for the First Responders, Public Safety, Transportation, and Fleet Management Industries. The core technology platforms have been designed to be embedded in vehicles, cell phones, or thin-client devices that are GPS-enabled, providing real-time mobile asset tracking with dynamic communication, and viewing capacities. GST offers an array of solutions for mobile asset tracking on local, inter-state or nationwide maps. We not only help multi-department agencies of all levels increase their day-to-day management effectiveness, but in any emergency situation where multi-agency operations collaborate, we provide Command Centers a critical tool for them to take immediate action, such that the locations of an agency's deployed personnel, vehicles, assets, and CAD incidents can be viewed on both Dispatch Center and Mobile Data computers (MDCs) through a Common Operating Picture. The series of products that GST has developed offer great flexibility for clients with different sizes, budgets, or personnel resources.
FP	Gilbarco Veeder-Root	Gilbarco Veeder-Root is the global leader of integrated technology solutions in the retail petroleum industry. From our reliable fuel dispensers to intuitive point of sale to revolutionary operation management systems and convenience store equipment, Gilbarco Veeder-Root delivers total integrated solutions from the forecourt to the convenience store. Insite360 is a global cloud services platform for all Gilbarco Veeder-Root technology. It provides a secure, user-friendly dashboard that allows operators full visibility of information, generated across their network of sites, from anywhere, anytime. Remote monitoring and control technology features a user-friendly dashboard.
FP	GoTo (FKA LogMeIn or Jive)	In a flexibility-first world, great work can happen anywhere. That mindset has helped us fulfill the promise of reliability, connection, and simplicity for tens of millions of people, and in turn, has helped

Quest Summary Document and Fulfillment Partners

	<u>Communications, Inc.</u>	us become one of the world's largest SaaS companies – with more than 3,500 global employees, over \$1.3 billion in annual revenue and tens of millions of users. Today, we're the trusted partner for companies of all sizes to connect, collaborate, secure their workforces, and support employees and customers.
FP	<u>GreatNonprofits</u>	GreatNonprofits is the leading website for people to find, review and share information about nonprofits. More than 1.2 million different charities, their reviews, ratings, and personal stories about their work, are searchable by issue and location. The GreatNonprofits Top-Rated Awards are the only top ratings determined by those who deal directly with the charities – as donors, volunteers, and recipients of aid. The GreatNonprofits seal is rated by Software Advice, a Gartner company, as the second most-trusted rating seal after the Better Business Bureau. GreatNonprofits also provides tools and services to help nonprofits share and collect reviews and stories about the communities they serve. For more information, visit http://www.greatnonprofits.org
Q	<u>Inspired eLearning</u>	Inspired eLearning is dedicated to delivering the highest quality enterprise educational products that transform corporate culture, nurture and enhance workforce skills, and deliver maximum ROI for the corporate education budget. Inspired eLearning offers Security Awareness and Compliance solutions (including HR, HIPAA/HITECH), PhishProof phishing assessment software, custom courseware design and development, content integration, and a fully hosted web-based eLearning course delivery and tracking system using the iLMS (Inspired Learning Management System). For more information, visit https://inspiredelearning.com/security-awareness/ .
FP	<u>Intelligent Wireless Sensor Networks</u>	Intelligent Wireless Sensor Networks (IWSN) helps organizations manage the internet of things (IoT), where through the use of sensors, the entire physical infrastructure is closely coupled with information and communication technologies; where intelligent monitoring and management can be achieved via the usage of networked embedded devices. In such a sophisticated dynamic system, devices are interconnected to transmit useful measurement information and control instructions via distributed sensor networks. WSNs are regarded as a revolutionary information gathering method to build the information and communication system to improve the reliability and efficiency of infrastructure systems. Compared with the wired solution, WSNs feature easier deployment and better flexibility of devices. With the rapid technological development of sensors, WSNs will become the key technology for IoT and IWSN can help you deploy and manage a system to fit your needs.
Q	<u>IT Asset Management</u>	Quest can help manage all of your IT assets. We offer end-to-end ITAM services, dedicated account teams, industry-leading tools and proven practices to help your company remain compliant and ensure your IT portfolio is fully optimized at all times. Quest ITAM Services includes retention of all contract data. This data contains all important contract facts from the reseller including quantity, license type, device count, purchase price, and contract timeframe.
FP	<u>JASK</u>	JASK is modernizing security operations to reduce risk and improve efficiency. The JASK Autonomous Security Operations Center (ASOC) platform applies advanced AI and machine learning to identify and extract data from multiple sources. Fusing data gathered with alerts from existing security solutions, JASK automates the correlation and analysis of threat alerts to deliver advanced insights based on records of activity across the network, users and endpoints. Advanced analysis delivers the highest-priority alerts (JASK Insights) via a simple dashboard, streamlining investigations and enabling faster response times. By ignoring the noise and focusing on the most critical activities, analysts are free to threat hunt. As new threats are identified, critical data is sent back into the JASK platform for continuous learning and application across all customer environments. With an entrepreneurial team, savvy data scientists and engineers with a long-term vision for risk mitigation, JASK is removing the technology gaps that limit SOC modernization
FP	<u>JourneyTEAM</u>	JourneyTEAM helps companies implement business solutions and improvements through Microsoft technologies. JourneyTEAM is an award-winning Microsoft Partner specializing in all three Microsoft Clouds: Modern Workplace, Microsoft Azure, and Microsoft Business Applications, including Microsoft Dynamics 365 and Power Platform. Meet today's challenges by bringing your customers and business together with the next generation of CRM and ERP applications. From sales and marketing to

Quest Summary Document and Fulfillment Partners

		operations, to field and customer service, JourneyTEAM's end-to-end solutions help you get more done by making every process easier.
FP	<u>Kambrian Corporation</u>	Kambrian Corporation is an IT Value Added Reseller (VAR). Kambrian uses its expertise in licensing to assist customers in purchase and management of licenses, upgrade and maintenance plan. We take the complexity out of licensing and help manage the contract negotiation and renewal process.
Q	<u>ManageEngine</u>	ManageEngine is bringing IT together for IT teams that need to deliver real-time services and support. Worldwide, established and emerging enterprises - including more than 60 percent of the Fortune 500 - rely on our <u>real-time IT management tools</u> to ensure tight business-IT alignment and optimal performance of their IT infrastructure, including networks, servers, applications, desktops and more. ManageEngine is a division of <u>Zoho Corporation</u> with offices worldwide, including the United States, India, Singapore, Japan and China. For more information, please visit <u>buzz.manageengine.com/</u> .
Q	<u>Microsoft</u>	Quest carries a full line of Microsoft software and peripherals including: Microsoft® Windows® XP desktop operating system, Windows 2000, and Windows Embedded operating system. Microsoft Office, Microsoft Publisher, Microsoft Visio®, Microsoft Project, and other stand-alone desktop applications; Microsoft Business Solutions, encompassing Great Plains and Navision business process applications, and bCentral™ business services; Microsoft Windows Server System™ integrated server software, software developer tools, and MSDN®; Mobile and Embedded Devices, featuring mobile devices including the Windows Powered Pocket PC, the Mobile Explorer microbrowser, and the Windows Powered Smartphone software platform.
FP	<u>Morpheus Data</u>	Morpheus is the first completely infrastructure agnostic cloud management platform (CMP). With Morpheus, organizations can combine all their technology onto a single pane of glass to easily manage everything from AWS to bare metal in just a few clicks. Morpheus offers IT and Dev capabilities they never thought possible: instant one-click provisioning, fast and simple database management, easy workload migration, automatic monitoring, logging and backups, dynamic management, cloud brokerage, and more. To learn more, email <u>info@morpheusdata.com</u> or visit: <u>morpheusdata.com/demo</u> , or <u>https://www.morpheusdata.com/resource-center</u> .
FP	<u>NetDocuments</u>	NetDocuments, the most trusted cloud-based content management and productivity platform that helps legal professionals do their best work. Backed by over 20 years of experience in cloud innovation, NetDocuments supports 3,700+ law firms, corporate legal departments, and public sector entities with solutions that drive better user experiences and business outcomes. NetDocuments offers a complete end-to-end platform for document and email organization and management, including award-winning security and research capabilities; robust automation, collaboration, and search technologies; seamless integrations with other tools professionals use daily; and much more. Learn more about <u>NetDocuments</u> .
FP	<u>NTT America, Inc.</u>	NTT Ltd. is a global technology services company bringing together the expertise of leaders in the field, including NTT Communications, Dimension Data, and NTT Security. We partner with organizations around the world to shape and achieve outcomes through intelligent technology solutions. For us, intelligent means data driven, connected, digital, and secure. As a global ICT provider, we employ more than 40,000 people in a diverse and dynamic workplace, and deliver services in over 200 countries and regions. Together we enable the connected future. We're proud to be part of the global holding company under NTT, called NTT Incorporated (Inc.) For more information, please visit <u>https://hello.global.ntt</u>
Q	<u>Nutanix</u>	Nutanix is a global leader in cloud software and a pioneer in hyperconverged infrastructure solutions, making clouds invisible, freeing customers to focus on their business outcomes. Organizations around the world use Nutanix software to leverage a single platform to manage any app at any location for their hybrid multicloud environments. Learn more at <u>www.nutanix.com</u> or follow us on social media @nutanix.
Q	<u>OneSpan</u>	OneSpan enables State, Local and Federal governments and agencies to succeed by making bold advances in their digital transformation. We do this by establishing trust in people's identities, the devices they use, and the transactions that shape their lives. More than 10,000 customers, including over half of the top 100 global banks and all levels of government, rely on OneSpan's solutions to protect their most important relationships and business processes.

Quest Summary Document and Fulfillment Partners

		OneSpan Sign was the first e-signature solution to be granted authorization to operate (ATO) under the Federal Risk and Authorization Program (FedRAMP) and our team has decades of experience implementing e-signatures in government across a wide range of use cases – both on-premises and in the cloud. From workflow and process digitization to digital on-boarding and fraud mitigation, OneSpan’s unified, open platform reduces costs, accelerates customer acquisition, and increases customer satisfaction.
FP	OnTrak Solutions	OnTrak Solutions puts you in a position to manage your vehicles and assets with maximum efficiency. Through the utilization of the latest technology, OnTrak Solutions creates a line of communication between your staff and your assets. Through this communication, you can now monitor and manage your assets in real-time - exponentially increasing productivity and responsiveness. OnTrak Solutions’ offering includes vehicle camera solutions , dashcam solutions, commercial GPS tracking , and electronic driver log .
FP	Optiv Security	At Optiv, we manage cyber risk so you can secure your full potential. We believe for any organization to achieve its full potential, cyber risk must be understood and overcome. We work alongside clients to manage cyber risk and equip them with perspectives and programs to accelerate business progress. Our real-world experience, deep vertical expertise and diverse teams enable us to face any challenge with confidence. We put you at the center of our unmatched ecosystem of people, products, partners and programs to design and implement agile solutions. Our adaptive approach continually assesses risk in the context of cyber and broader objectives to secure today’s business and fortify it for the future.
FP	Pacxa	Pacxa is Hawaii’s largest information technology group providing an extensive range of end-to-end solutions for many of Hawaii’s top 250 businesses, small- and medium-sized companies, and government and nonprofit agencies. Pacxa works with its clients to meet their technology needs by tailoring solutions and leveraging partnerships with industry leading hardware and software providers to improve operational efficiency and increase revenue.
FP	PastPerfect	Designed by museum professionals for museum professionals, PastPerfect offers desktop and cloud-based software that combines collection and contact management into one easy-to-use software package. PastPerfect has transformed how museums of all sizes catalog collections and manage relationships with members and donors.
Q	Quest UCCS	Quest UCCS offers Cloud/Hosted solutions to meet any business need for Unified Communications and Carrier Solutions. We feature flexible workspace offerings as well as IT solutions. Quest’s expert team of Technical Support Associates, On-Site Technicians, Engineers, Project Coordinators, and Project Managers will support your business during implementation, programming changes and future system upgrades including: Support Services, Technical Service Center, Implementation Services, VoIP Network Assessment, Project Management and Coordination, as well as System Administration and User Training.
FP	REI Systems	REI Systems is a technology company providing application modernization, grants management systems and products, government data analytics, and advisory services that help government meet the demands of the 21st century. What began with a single contract with the National Aeronautics and Space Administration in 1989 is now a customer portfolio that cuts across 25+ federal agencies and 180+ state, local, and nonprofit customers.
FP	RingCentral	RingCentral, Inc. is an award-winning global provider of cloud unified communications and collaboration solutions. More flexible and cost-effective than legacy on premise systems, RingCentral solutions empower today’s mobile and distributed workforces to be connected anywhere and on any device through voice, video, team messaging, collaboration, SMS, conferencing, online meetings, contact center, and fax. RingCentral provides an open platform that integrates with today’s leading business apps while giving customers the flexibility to customize their own workflows.
FP	Rocky Mountain Audio	AV Services for Product Launches, General Sessions, Virtual Meetings, Community Gatherings, and more. We are the event services provider you need. Rocky Mountain Audio has a superb selection of event services with a seasoned crew and in-house certified meeting planning professional at the helm.
FP	ROI Networks	ROI Networks is a systems integrator specializing in voice, data and video communications serving small, mid-sized and enterprise customers seeking to virtualize their infrastructure in order to reduce

Quest Summary Document and Fulfillment Partners

		costs, maximize productivity and simplify their corporate networks. For more information please visit www.roinetworks.com .
Q	<u>Security as a Service</u>	Quest can design, implement, and manage a comprehensive managed security solution that covers your networks, servers, databases, and applications. Full security solution management can occur on-site or from Quest's remote Network Operations Center. Key features include: • Anomaly detection – monitor your network for anything out of the norm to easily identify new or unexpected trends/issues • SIEM and log management combined in a centralized console • With Quest's real-time reporting, you'll be able to see how your security and compliance posture changes over time • Simplified search, filtering, and reporting • Pre-built reports and customizable policies make reporting easy • Security reporting and event and log management in one simple interface • Two-tier data storage – heavily-indexed historical data for quick search/reporting in addition to real-time data collection and reporting
FP	<u>Silent Solutions Security</u>	Silent Solutions Security LLC provides solutions for security applications in non-traditional outdoor markets. Since 2005, we have prided ourselves on our ability to assess each site as a unique entity, and provide innovative approaches to a client's intrusion detection, surveillance, asset protection and monitoring needs. We provide integrated electronic security solutions that incorporate innovative technologies with our proven Mobile Sentry platform. Solutions include state of the art electronic security panels, wireless long range sensors, cellular communications, solar power assemblies, IP cloud video cameras with access through a central server, smart phone access for remote camera viewing, and off-site monitoring that virtually eliminates false alarms. Our ability to build a hardened wall around nearly any sized outdoor environment or project is truly what differentiates us from the traditional security providers.
FP	<u>SkyBitz</u>	SkyBitz, Telular's flagship brand for IoT Telematics solutions, is a leader in commercial telematics solutions across multiple vertical industry sectors, providing real-time information on the location and status of assets. More than a thousand enterprises rely on SkyBitz technology to achieve total asset visibility, improved security, lower operating and capital expenses, and enhanced customer service. SkyBitz delivers its solution via a secure web-based application and requires no software downloads. For additional information, visit www.skybitz.com .
FP	<u>Smartel</u>	Smartel has been a national leader in wireless expense management for the past 16 years and is now a complete mobility solutions provider. Our cutting-edge mobility platform allows our clients to manage all vendors, solutions and custom reporting in a single location. By managing and optimizing data usage, global usage, user/device/feature and plan inventory, we reduce our customer's wireless spend by 30% annually. Smartel is also a leader in IoT/m2m strategy and development. This includes connectivity, hardware, management and reporting. Additionally, Smartel offers MDM, Mobile Security, Fleet Management, Managed Services/Help Desk and Cloud Based Messaging
FP	<u>SpaceMade (d.b.a Solodev)</u>	The Solodev CMS platform has been used by enterprises, organizations, and governments to build, manage, and power hundreds of award-winning websites and mobile apps. Solodev is an American software company based in Orlando, Florida. The company primarily specializes in developing and marketing its proprietary content management system of the same name, Solodev CMS. In 2016, Solodev released its latest software version, Solodev CMS 8, completely re-architected for the AWS (Amazon Web Services) Cloud.

		revolutionized. Organizations no longer need to think in hours or days – they can think in minutes or seconds instead – for all applications, data, and workloads.
Q	<u>Verkada</u>	What started with video security cameras is now six product lines working seamlessly together using our software-first approach. Every product we offer ensures organizations have real-time insights into what could impact the safety and comfort of people throughout their physical environment while simultaneously empowering them to take immediate action. These actions enable our customers to minimize security risks, workplace frustrations and costly inefficiencies. We aren't just building another security system. We are setting the standard for enterprise building security and management. If we do our job well, we believe Verkada can become the operating system for the world's safest, most efficient buildings.
FP	<u>ViaTRON</u>	ViaTRON Systems, Inc. is a leading Enterprise Content Management Integrator & Document Scanning Conversion Organization. Headquartered in Los Angeles County, since 1990 ViaTRON provides Enterprise integrated solutions to both Government and Private sector organizations to ensure day-to-day operations is running as quickly and efficiently as possible with automated business processes while complying to organizations Record Retention Policies. From discovery to implementation, training, maintenance, and back file Document Scanning Conversion of paper, microfilm, and microfiche - ViaTRON Systems, Inc. has the experience and passion to ensure your Solutions are done right the first time and continue to provide exceptional value for years to come. ViaTRON also specializes in providing on-site Document Scanning conversion services across North America and Internationally.
Q	<u>Video Surveillance as a Service</u>	IP Video Surveillance as a Service is a leading-edge technology offering many advantages you can trust to be effective, reliable, affordable, and highly configurable. IP video offers substantial savings over traditional systems and costly security guard configurations; you may be able to use your existing cameras in conjunction with current network hardware to prevent large startup costs. And now that IP video is available as a web-based or Cloud service, more organizations than ever can afford to implement IP video surveillance systems. The low monthly costs can be expensed like any other service, making the transition to IP video painless and affordable. Advantages of IP video surveillance systems include the ability to use "best of breed" IP cameras that can broadcast live anywhere in the world. Digital IP video – especially HD video surveillance technology – is vastly superior to analog video and provides the flexibility of zoom, mega pixel, pan, and adjustable frame rates that can be stored on a hard drive, network storage device, or tape backup.
Q	<u>Virtual Desktop SaaS</u>	Quest's Virtual Desktop SaaS solution provides the benefits of virtual desktops – simplified deployment, improved data security, and centralized management – without the exorbitant capital costs and unending management hassles. Quest Cloud-hosted desktops can deliver savings upwards of 36% over average physical desktop PCs and provide the ability to offload endpoint costs and extend the lifecycle of an existing PC. Quest's solution is a pay-as-you-go Cloud subscription service that requires no capital investment and leverages carrier-class scale and geographic coverage that's not available to most organizations. You can custom-configure the service to meet your end-users' performance requirements, specifying OS, RAM, CPU, disk space, and more according to particular end-users' needs. Once you're a Quest customer, your Cloud-hosted desktops can be deployed in a matter of hours, not months, with substantially reduced complexity and risk.
Q	<u>Website Assets as a Service</u>	Quest offers managed web content delivery with security enabled features leveraging internet accessibility for the dissemination of information. Based on innovative technology, our cloud hosting platform is fast, scalable, and allows you to customize your solution. It comes with 24/7/365 support. Whether you are starting a small development project or need to host a high-traffic enterprise site, Quest will provide you with the options and security that you require.
FP	<u>Worldwide Tech Connections</u>	Worldwide Tech Connections offers Software-as-a-Service real-time language translation and live interpretation solutions that are not only technologically advanced but also contextually accurate and compliant. WWTC enables organizations to overcome both language and dialect communication challenges. WWTC integrates customizable dictionaries, a context engine for accurate translations, and best-in-class speech technologies into its software—supporting over 300 languages and dialects in text and more than 140 in speech. With Worldwide Tech Connections' flexible architecture, the SaaS solutions can be deployed via phone, text, online, live events, and more—nothing to download, nothing to install.

Quest Summary Document and Fulfillment Partners

		Additionally, WWTC’s technology can be delivered as an API integration with your organization’s current EMR, CRM, CMS, ERP, and similar systems or as a standalone customized solution. This makes it possible for any organization to meet the legal requirements of Title VI of the Civil Rights Act, the Equal Education Opportunity Act, and the Americans with Disabilities Act. Worldwide Tech Connections’ core product suite provides full coverage with a unique blend of applications. The NOW Translate Language and Interpretation Platform is a browser-based software-as-a-service. By protecting Personal Identification Information, the NOW Translate Platform remains COPPA, FERPA, HIPAA, and GDPR compliant. WWTC ensures your organization’s compliance requirements are met while you retain ownership and custody of all data. With any device, Worldwide Tech Connections helps improve customer service, enhance employee retention, and drive organizational growth—anyone, anytime, anywhere!
