

RedMane creates high-quality, innovative, industrial-strength software that improves businesses and lives.

RedMane is a software development company that puts people first—our clients, partners, end-users and our company. We work with purpose, passion and integrity to simplify and streamline technology systems. And we gain personal satisfaction from solving complex, meaningful business problems.

Working as your collaborative partner, we deliver the best possible solution, at the right investment, on the right schedule, with the right requirements for your organization.

Why RedMane for NASPO

Through NASPO ValuePoint, RedMane provides participating states with:

- A proven, cloud-based case management platform (mCase)
- Flexible configuration to meet diverse program needs
- Expertise in highly regulated public sector environments
- A trusted partner committed to long-term success

We empower agencies to deliver better outcomes for their communities—efficiently, responsibly, and at scale.

Many of the innovations and improvements in processes we are credited with were only possible because of the contributions and support from RedMane.”

Former Medicaid Director, State of Louisiana

Who We Are

RedMane is a mission-driven technology partner delivering innovative, human-centered solutions for state and local government agencies across the United States and Canada. For more than two decades, we have helped public sector organizations modernize complex, mission-critical systems—especially within Health and Human Services (HHS) and eligibility programs.

We are “right-sized”—bringing the expertise, innovation, and delivery discipline of larger firms without their complexity—allowing us to focus on partnership, agility, and client success.

What We Do

RedMane specializes in:

- AI-enabled automation and decision support
- Systems integration and modernization
- Cloud-based SaaS solutions
- Case management platforms
- Implementation, maintenance, and continuous enhancement

We deliver solutions that streamline operations, improve coordination, and support better outcomes for the populations government agencies serve.

Domain Expertise

RedMane brings deep expertise across public sector programs, including:

- Child Welfare (CCWIS Modernization)
- Adult Protective Services
- Benefits Eligibility & Enrollment (including Medicaid, SNAP, AND TANF)
- Adult Persons with Disabilities
- Child Care
- Provider Licensing
- Child Support Enforcement

We combine technical excellence with real-world program knowledge—many of our team members have firsthand experience working in human services environments.

Our Flagship Platform: mCase

At the core of our offering is mCase, a fully cloud-hosted, configurable, low-code/no-code platform purpose-built for government.

Key capabilities include:

- End-to-end case management (intake → assessment → service delivery → outcomes → closure)
- Low-code configurability to adapt quickly to policy and regulatory changes
- Mobile-enabled workforce support (online and offline)
- Integrated AI tools (e.g., natural language processing, intelligent intake, document intelligence)

mCase enables agencies to modernize without forcing operational change—tailoring the system to how organizations actually work.

Proven Impact

Our solutions help agencies:

- Improve service delivery and client outcomes
- Reduce administrative burden on caseworkers
- Strengthen accountability and compliance
- Increase workforce efficiency and sustainability

For example, mCase supports statewide systems such as Florida’s Adult Protective Services platform, enabling scalable, end-to-end case management for hundreds of users.
