

COREFORCE

Real-Time Intelligence

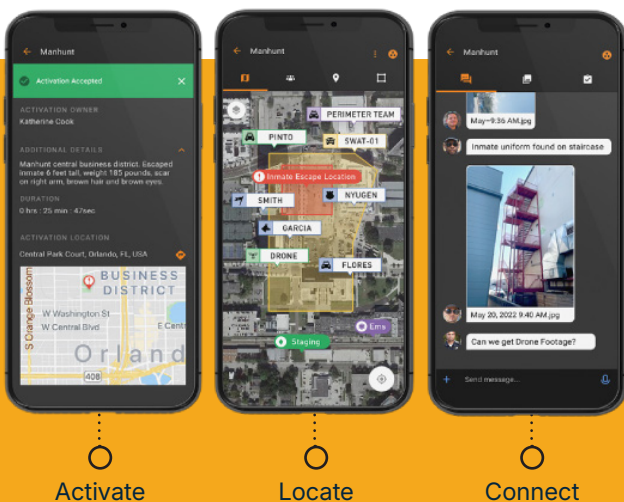

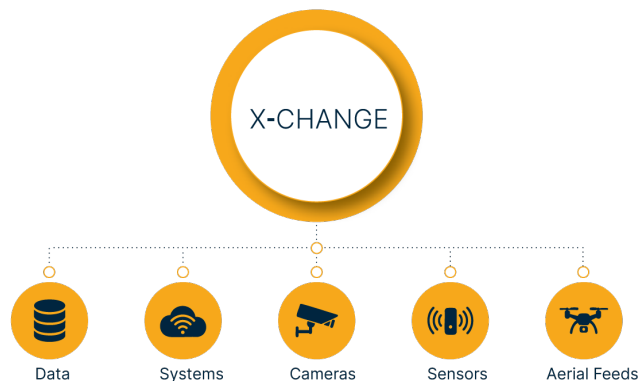

Unifying Operations to Scale — Future-Proofing Your Needs

Real-Time Intelligence by Coreforce™ unifies fragmented data into a single operational view—enhancing coordination and accelerating response to complex incidents. Purpose-built for RTCCs and situational awareness at scale, it centralizes video, data, alerts, and workflows to support both field and command decisions.

Built on open architecture, combining system endpoints—cameras, drones, ALPR, beacons, CAD/RMS—delivers a complete view. Use command and integrated AI tools, to drive faster threat detection, improved awareness, and quicker decisions.

REAL-TIME INTELLIGENCE X-CHANGE PROGRAM

Enables secure sharing of data and real-time video feeds for increased response coordination and investigation. Policy-based access criteria with notifications, chain of custody auditing provide secure collaboration.

REAL-TIME INTELLIGENCE MOBILE RESPONSE

Provides an integrated mobile app for agency devices, giving responders access to incident details, maps, detected weapons, key objects, personnel locations, and messages—delivering critical info in the field.

WHY USE RTI BY COREFORCE

- Drone Agnostic
- Inter-operable Design & Unified Interface
- AI Detection & Intelligent Alerts
- Scalable & Policy-Based
- Automation
- No Vendor Lock-In—Open Integration
- Video Management System Integration
- Part of Coreforce's Open Ecosystem

NOT JUST CAMERAS— COMMAND TOOLS

- Centralized Command & Incident Visibility
- Multi-Jurisdiction or Regional Collaboration
- Replace Siloed Video or Legacy RTCC Technology
- Next-Gen, AI-Ready Platform for Proactive Threat Detection

DEPLOYMENT & PRICING

Flexible, transparent pricing aligned to your needs. Deploy standalone or as part of the Coreforce ecosystem—DEMS, body cameras, ALPR, in-car, and interview room solutions.

REAL-TIME INTELLIGENCE BY COREFORCE

Scales with your needs, now and in the future—integrating with your systems for maximum interoperability and mission alignment.
