

Attachment G

Value Added Plan

This template must be used. The Value-Added Plan should identify any **value added options or ideas that may benefit the State(s)**. The value added claims should be prioritized (identify the most important claims first). The Respondent may add or delete Value Added Claim table templates, but do not exceed the **2-page** limit for this section. Do NOT include any identifying information in the Plan. Information listed under the “Documented Performance” line may describe where the Respondent has used the approach or solution previously, and what the results were in terms of verifiable metrics.

Item #1 Claim: *SmartStreaming. Utility's AVail™, BodyWorn™, and Rocket-IoT™ systems make it easy for a dispatcher or supervisor to live-view stream video from an in-field video capture device.*

How will this add value? *The ability to stream and view video live from the field greatly enhances situational awareness between the officer in the field and dispatchers and supervisors, increasing officer safety and efficiency.*

Documented Performance: *This feature is standard on all BodyWorn™ cameras delivered by Utility.*

Cost Impact: *There is no additional cost* **Schedule Impact:** *There is no impact to schedule.*

Item #2 Claim: *SmartMounting. Utility's BodyWorn™ integrates seamlessly and directly into the officer's uniform.*

How will this add value? *Utility's BodyWorn™ is securely mounted to the officer. Traditional, clip-on cameras bounce around, are bulky, and fall off or get jostled into an untenable position. Utility's BodyWorn™ reliably stays mounted correctly, capturing video properly, and freeing up the officer to do their job, rather than making sure that their camera is properly mounted all the time.*

Documented Performance: *This feature is available on all BodyWorn™ cameras delivered by Utility.*

Cost Impact: *There is no additional cost* **Schedule Impact:** *There is no impact to schedule*

Item #3 Claim: *SmartRecording. Vehicle sensors (light bar, seat belt, door, etc.), running, man-down, acceleration, Action Zone, Geofence, remote activation (by dispatch or supervisor), or even a manual Bluetooth remote can start a recording. All configurable and easily managed.*

How will this add value? *We capture more video and more relevant video, freeing up the officer to do their job and not concentrate on whether they have started recording video during the busyness and heat of an in-progress incident. If there is action, we are recording it.*

Documented Performance: *These features are standard on all BodyWorn™ and RocketIoT™ delivered by Utility.*

Cost Impact: *There is no additional cost* **Schedule Impact:** *There is no impact to schedule.*

Item #4 Claim: *SmartCommunication. Utility's AVail™ and BodyWorn™ system can send time sensitive information, including BOLO, Amber, Silver, and Officer Down alerts, to officers and dispatchers. Additionally, AVail can integrate with your CAD system, automatically creating Action Zones and triggering recordings based on calls entered into the CAD system.*

How will this add value? *Officers and dispatchers are immediately aware of pertinent information, increasing situational awareness and officer safety, helping officers and dispatchers do their jobs and potentially saving lives.*

Documented Performance: *The SmartCommunication feature is standard on all BodyWorn™ cameras delivered by Utility. The interface to CAD requires CAD Integration which is an option in our Attachment D.*

Cost Impact: *The cost for CAD Integration is included in Attachment D.* **Schedule Impact:** *There is no impact to schedule.*

Item #5 Claim: *SmartRedaction™. Utility's SmartRedaction™ makes it easy to redaction video and audio evidence, providing intuitive tools like automatic skin blur, voice detection, and object tracking*

How will this add value? *Utility's SmartRedaction™ frees up hours of redaction work for staff tasked with honoring FOIA requests. You can release video to press or to the public while maintaining privacy and security of people or objects in the video. This time savings equals cost savings and can make all the difference, affording the most value for dollars spent.*

Documented Performance: *SmartRedaction™ is available through AVail and can be used with BodyWorn™ and RocketIoT™*

Cost Impact:	<i>There is no additional cost</i>	Schedule Impact:	<i>There is no impact to schedule.</i>
Item #6 Claim:	<i>SmartStorage. Utility's video evidence is stored immediately and securely upon capture, either on the in-car system or directly in the cloud. No one has to dock anything for video upload and storage.</i>		
How will this add value?	<i>Video storage is automatic and immediate, so no person has to remember to do it. This frees up officers to do their job, increases situational awareness between the officers and dispatch and supervisors, and eliminates the risk of losing video evidence by waiting until the end of a shift to move that evidence from a mobile device in a volatile environment.</i>		
Documented Performance:	<i>This feature is standard on all RocketIo™ devices delivered by Utility.</i>		
Cost Impact:	<i>There is no additional cost</i>	Schedule Impact:	<i>There is no impact to schedule.</i>
Item #7 Claim:	<i>SmartAssociation. Utility's AVail™ system automatically associates videos with each other, based on proximity, officer-entered custom field information, or recording reason (e.g. Action Zone or alert). Additionally, AVail™ makes it easy for a user to associate videos manually.</i>		
How will this add value?	<i>Utility's AVail™ system saves users hours of time searching for videos related to each other. This time savings equals cost savings and can make all the difference, affording the most value for dollars spent.</i>		
Documented Performance:	<i>This feature is standard in AVail™ and utilized in all deployments today.</i>		
Cost Impact:	<i>There is no additional cost</i>	Schedule Impact:	<i>There is no impact to schedule.</i>
Item #8 Claim:	<i>SmartIncident. Utility's BodyWorn™ and RocketIo™ in-car video systems seamlessly record and integrate video into a single incident.</i>		
How will this add value?	<i>Automatically integrating recordings saves hours of time searching for videos related to the same incident. This time savings equals cost savings and can make all the difference, affording the most value for dollars spent.</i>		
Documented Performance:	<i>This feature is standard in AVail™ and utilized in all deployments today.</i>		
Cost Impact:	<i>There is no additional cost</i>	Schedule Impact:	<i>There is no impact to schedule.</i>
