Ochsner has a security feature called Two-Step Verification.

With two-step verification your health information is now only accessible from devices you trust, such as your cell phone or home computer. This is done by a unique code that is sent to either your email address or mobile phone.

Here’s how to do it from the Website:

1. Under Your Menu, select or search **Security Settings** in the Account settings section.

2. Select the **Turn On Two-Step Verification** option.

3. Fill in the required information to verify your identity:
4. Select a method in which the security code will be sent.

5. Enter the security code when prompted:
6. Once the code has been entered Two-Step Verification will be enabled.
