

OneTouchPoint Awareness Signage

COVID-19 is forcing us all into a “new normal” and is changing the way people interact with each other and how the educate system operates. Providing a safe classroom environment is a vital part of re-opening our K-12 education system in response to the COVID-19 crisis. Each school has had to evaluate preventative measures like remote learning, face covering, and social distancing that can be used to protect teachers and students. Keep staff and students safe and aware of social distancing regulations and COVID-19 developments with the right signage and materials. OneTouchPoint can help produce any materials you may need. We have templates available or can create custom work for your brand.
