

Make Your Sheet Pile Watertight

WADIT

The Proven Sheet Pile Interlock Sealant

WADIT® = Water Tight Corrosion Inhibitor

WADIT is a purpose-built and globally proven sheet piling interlock sealant and corrosion inhibitor. The creators of WADIT know first-hand the installation and long-term challenges faced when sealing all types of hot rolled or cold formed sheet piling interlocks.

With an unmatched success rate in real-world applications, WADIT provides both water-stopping and corrosion protection. The application of WADIT in the WOF chamber minimizes corrosion by sealing the interlock. WADIT also acts as a pile lubricant by reducing friction and preventing interlocks from “heating up”; this allows for the contractor to choose to drive socket first, if needed.

For any application where water leakage presents a problem, from dewatering cofferdams to barrier and cutoff walls for site remediation, WADIT is the smart sheet pile sealant of choice.

Benefits

TESTED AND CERTIFIED

WADIT fortifies your project. This real-world and lab-tested sealant keeps water out and protects against hazardous substances. Comprehensive third party test data clearly states that the permeability of a sheet pile lock with WADIT is zero because there is NO water flow through the sheet pile lock at five bars (-70 psi) of differential water pressure. Please refer to the University of Dortmund Water-Tightness Study under the Technical Documents on wadit.com.

HIGHLY DURABLE

WADIT performs in every environment, from the tropics to the arctic, where high pressure sealing is required with extreme temperature ranges. The longevity of your sheet pile project is guaranteed with this durable sealant.

EXTREMELY FLEXIBLE

WADIT has exceptional memory rebound properties. Conventional materials may harden like glass in temperatures of just 50F (10C). WADIT, on the other hand, remains extremely flexible even in groundwater.

NON-PROPRIETARY

Made by and for sheet pile professionals, WADIT can be installed in any interlock system or used with U-, Z-, or O-type of walls or combined SSP.

ENVIRONMENTALLY FRIENDLY

WADIT's non-toxic and made from sustainable, natural raw materials. Internationally lab-tested and certified, WADIT is safe and can be used without any restriction in sheet pile wall interlocks for ground and surface water use.

IMPERVIOUS TO WEATHER

No matter the climate, WADIT can be applied, transported and stored in any weather condition, ensuring a fast and problem-free sealant application.

PROFESSIONALLY INSTALLED

Certified technicians professionally install the WADIT Sealant System to ensure the perfect seal every time. You can be confident that the quality of your project will never be compromised.

The Proven Sheet Pile Interlock Sealant

WADIT: A Professionally Installed Sealant System

WADIT's unmatched success rate is the result of professional application. Applied by trained and tested WADIT installation crews, the WADIT Sealant System guarantees an effective, durable, sheet pile interlock seal every time. WADIT is sold pre-installed into any sheet pile type on a per foot or per metre of interlock basis.

Call PilePro at 866-666-7453 to find an authorized WADIT distributor in your area and/or to receive a quote for PilePro to carry out the WADIT installation.

Internationally Lab-Tested and Certified

WADIT has been repeatedly proven as a safe material for use in potable water projects. The Bavaria State Trade Department (LGA), the German equivalent of the EPA, has certified WADIT for use in areas with potable water.

“The reports by the LGA come to the conclusion that WADIT sealant can be used without any restrictions in sheet pile wall interlocks in ground and surface water areas. There are no fears of harmful effects if it is used in the area of drinking water extraction systems.”
