Class A	\$72	0.73%

HOW DID THE FUND PERFORM LAST YEAR AND WHAT AFFECTED ITS PERFORMANCE?

POSITIONING

Given the steepness of the yield curve during the fiscal year (for example the 20-year point yields 1.17% more than the 10-year point), the Fund continues to overweight the 15- to 20-year area of the curve while holding very little exposure to the 5- to 10-year part of the curve. This approach focused on the highest yielding parts of the municipal benchmark curve along with the additional potential return derived from “rolling down” a portion of the yield that is very steep in relation to history.

Furthermore, considering the historically relative high yield environment for municipal bonds, the Fund also targeted a higher allocation to bonds that carry more call-protection and price off a longer part of the yield curve.

PERFORMANCE

The Fund posted a negative return for the year ended 8/31/2025 as rates rose across the AAA curve (all municipal bond yields quoted are sourced from the MMD AAA scale) beyond 5-year maturities with longer-term yields increasing more than shorter-term yields. Underperformance relative to the benchmark (Bloomberg Municipal Bond Index) and the Morningstar Category (Morningstar Municipal National Intermediate) can generally be attributed to the Fund’s differentiated yield curve positioning and higher allocation to bonds that carry more call-protection and price off a longer part of the yield curve, making the Fund more responsive to movements in interest rates.

The increase and steepening of the yield curve detracted from the Fund’s performance as yields rose by more in the 15- to 20-year part of the yield curve where the Fund was overweight while yields rose a lot less (or were down) in the area of the yield curve where the Fund had very little exposure.

HOW DID THE FUND PERFORM OVER THE PAST 10 YEARS?*

The \$10,000 chart reflects a hypothetical \$10,000 investment in the class of shares noted and assumes the maximum sales charge. The chart uses total return NAV performance and assumes reinvestment of dividends and capital gains. Fund expenses, including 12b-1 fees, management fees and other expenses were deducted.

** Credit rating agencies Fitch Ratings, Moody's Investor Service, and Standards & Poor's Corporation (S&P) rate the credit quality of debt issues. For reporting purposes, PT Asset Management, LLC ("PTAM"), the Fund's investment adviser, generally assigns a composite rating based on stated ratings from Nationally Recognized Statistical Ratings Organizations ("NRSROs"). For example, if Fitch, Moody's, and S&P all provide ratings, PTAM assigns the median rating. In certain instances, such as US Treasury and Agency securities, PTAM will assign an internal PTAM rating. The internal PTAM rating can only be as high as the highest stated credit rating from an NRSRO.
