Phex 3.4.2 released

Written by Arne Babenhauserheide
Sunday, 01 February 2009

Today the Phex development group is happy to announce the release of **Phex 3.4.2**. This is a minor release, yet it contains some tasty improvements.

The changes since Phex 3.4.0 are:

- Less wait time for the first connections,
- Strong leafs become Ultrapeers,
- Automatic reconnect on network failure.

And a few squashed bugs.

But even though Phex made good progress, we want it to evolve even faster, and so we're searching for additional developers who want to join us in development.

If you want to contribute to Phex, please come into our [forums](#) or meet us in IRC via #phex @ [freenode.net](#).

Phex 3.2.4.105 received SOFTPEDIA "100% FREE" AWARD

Written by GregorK
Monday, 23 June 2008

Softpedia continues to guarantee that Phex 3.2.4 is 100% FREE, which means it is a freeware product (both for personal and commercial use) that does not contain any form of malware, including but not limited to: spyware, viruses, trojans and backdoors.

"Softpedia tested Phex 3.2.4 thoroughly and it was found absolutely clean, therefore it can be installed with no concern by any computer user."

A poll on Your wishes

POLLS

Which new feature do you want for the next 6 months?

- ☐ Switching look and feel, theme and icon pack without restart.
- ☐ Automatic activation of a downloaded Phex update during the next startup.
- ☐ Support of virtual library directories.
- ☐ Firewall to Firewall transfer.
- ☐ Subscription management for PodCast and Magma.
- ☐ Bandwidth schedule, adjust the bandwidth to use at specific hours.
- ☐ Net-Zip: Private Networks made easy.
- ☐ Meta-Data readout and display.
- ☐ UPnP support.
- ☐ Ability to run multimedia files inside Phex via user specified external program.
- ☐ Phex as Daemon, usable without GUI.
- ☐ Something else, which I'll tell you about in the Forum.

[Vote](#) [Results](#)

Which one for the next two years?

- ☐ i2p (anonymous p2p using Phex and i2p).
- ☐ Credence in Phex for decentral Spam detection.
- ☐ Kademia support for searches by Hash.
- ☐ Integration of a free file release service.

Monday, 14 May 2007

We just started two new polls to find out into which direction you want Phex to move.
Please take a moment to read through the polls and select your favourite feature.

We've divided the question into two sets.
The first one includes features which can be implemented in half a year.
The second one shows four big items which will take a lot of time and energy to implement, so we need to be careful which direction we take.

Those are big decisions for Phex, and we want to include you into these decisions, so please vote to make your input count.

If you want to add more feedback, or if you want to offer your help, please visit us in the [Phex-forum](#).

Also we're always searching for people who like to help us in shaping the [Phex-Wiki](#) into a universal knowledgebase for Phex and Gnutella.

Phex 3.0.0 released

Written by Arne Babenhauserheide
Sunday, 07 January 2007

With Version 3.0 Phex has its first major release since July 2004, and we'll take this chance to have a look back, a look on the wealth of new things which found their way into this cunning fox in the course of two years.
