Download Amanda

PLEASE NOTE: THIS SOFTWARE IS BEING MADE AVAILABLE "AS-IS". UMD and the Amanda contributors are making this work available so that other people can use it. This software is in production use at a number of sites around the world, but we make no warranties that it will work for you. There is no free support available other than users helping each other on the [amanda-users mailing list](#). Other support options [can be found here](#).

Binary packages

To download Amanda binary packages (e.g. RPMs, debian packages, Win32 Windows client) for stable and beta versions for various distributions and source tarball please visit the following page: <http://www.zmanda.com/download-amanda.php>

Source packages

Amanda project is hosted at [SourceForge](#). You can download the most recent release (source tarball) from this page, and both new and old releases (source tarball) can also be found on the [sourceforge download page](#)

Daily snapshots from all active branches are available from <http://www.zmanda.com/community-builds.php>.

Status	Release	Date	CVS		Subversion

	2.4.5	April 20, 2005	amanda245	amanda-245-branch
Development	snapshots	Active Development		amanda/trunk
	3.3.0_beta1	March 31, 2011	amanda/tags/3_3_0beta1	amanda/branches/3_3

Latest Source

All modern development (since the 2.5.1 release) is in subversion. Prior revisions are available in CVS. Note that some old, unsupported Amanda releases are available from <ftp://ftp.amanda.org/pub/amanda>

Subversion Access

Amanda subversion repository is hosted at [SourceForge](#).

Amanda Subversion tree access

- [Browsing Amanda subversion tree anonymously](#)
- [Amanda subversion access for downloading source tree](#)

Branch use in Amanda subversion tree

- The tag in the above table will allow you to get the same source as the release.
- The branch in the above table will allow you to get the most recent source for this branch, it include the fix since the release.
- To check out a specific tag or branch:

```
svn co https://amanda.svn.sourceforge.net/svnroot/amanda/<tag_or_branch>
eg. svn co https://amanda.svn.sourceforge.net/svnroot/amanda/amanda/trunk
```

Git Access

The git repository at [github](#) is a mirror of the Subversion repository. The mirror polls periodically, so it may lag Subversion by a few hours. Several of the Amanda developers use git for day-to-day development, and github provides an easy way for new developers to get involved with Amanda.

- <http://github.com/zmanda/amanda>

CVS Access

Note that the Amanda CVS repository is no longer maintained. It is hosted at [SourceForge](#). The CVS module name is: **amanda**
