for iPad, iPhone/iPod Touch

Viaden Mobile presents a new highly addictive app for iPhone/iPod Touch and iPad with the world's most popular poker game, Texas Hold'em Poker. This is not only a top-line casino application, but also a great socializing tool. Being at the cutting edge of application development for Apple devices, Viaden Mobile designed a product that will set higher standards for other mobile developers.

Texas Hold'em Poker is certain to become your favorite as it combines everything that defines a good app: a realistic gameplay, excellent design, social network features to mix with friends and smooth performance. If you are after a perfect casino app for iPhone/iPad, look no further, you've found it!

Just think about it: you get a chance to compete with thousands of poker players all over the

world! It does not matter whether you are a newbie or a seasoned poker-shark, you can become a Texas Hold'em legend! All you need is a Wi-Fi connection to play and a determination to win.

Texas Hold'em Poker for iPhone/iPad offers several features that you won't find in most other apps. First of all, you can log into the game in several ways: using an account at Facebook or Game Center, registering a new account or playing a test game under a Guest account. If you log in via Facebook or Game Center, your profile info will be automatically transferred to your game account.

Another great thing about the app is that it lets you play with four or eight other actual, live poker fans from various parts of the world. Thinking globally, Viaden Mobile localized the app into 6 languages so that as many people as possible could enjoy a good game of poker. The game becomes very exciting and challenging as you get a good diversity of players to rival.

You can customize the table search by setting several parameters such as the size of bets, the number of players, game speed and currency type. The game speed option is a great perk when playing with online opponents who are slow or have problems with their Internet connection. The game currency choice between regular chips or VIP gold chips comes in handy if you are careful with your money or, on the contrary, like to risk and play high stakes.

To make the app more compelling, around 150 achievements were added. They will help you climb the global rankings of the best Hold'em players. Being a worldwide recognized poker connoisseur is really something to be proud of, isn't it? Those who are just in the beginning of the way to becoming a Hold'em superstar will find a detailed description of poker rules and combinations.

But what makes Texas Hold'em Poker stand out of the crowd of similar apps is its socializing features. Now you can meet up your friends at a casino table while sitting comfortably at home, or wherever life may take you. The app allows you to search for your friends, add new ones and invite them to play at your table. You can send them messages and chat with them during the game. For more fun, you can send gifts to your friends and rivals. If you are curious to know who you are dealing with, view stats, achievements and gifts of your co-players.

These are only few of the awesome features that Texas Hold'em Poker offers and there will be even more soon when a super update with tournaments is released. Stay tuned!
