

NTP Software Downloads

[NTP Home](#) | [Bugs](#) | [Contact](#) | [Documentation](#) | [Download](#) | [Links](#) | [Search](#)

New users should consult the [documentation](#) page before contacting the NTP development team with questions.

Current versions of NTP

| Release | Version | Date | Download |
|-------------------|-------------|------------|--|
| Production | 4.2.6p4 | 2011/09/23 | http / md5 http proxy / md5 |
| Release Candidate | 4.2.6p5-RC1 | 2011/10/18 | http / md5 http proxy / md5 |
| Development | 4.2.7p229 | 2011/10/26 | http / md5 http proxy / md5 |

 Feed for: [Current Versions of NTP](#)

Please use the [NTP Public Services Project download page](#) if the download links on this page don't work.

Source code for previous releases of NTP is available in the [HTTP archive](#) (IPv4 only) and through the NTP Public Services Project [HTTP archive proxy](#) (IPv4/IPv6).

Source releases

The NTP project only produces source code releases of NTP. These releases may be installed using the standard Unix "make" command. Please contact your operating system vendor for binary packages or assistance with your package-management system. NTP users who wish to track the development version of NTP should see the [development page](#).

Release Notes and Version Numbering

The NTP release notes are available linked from [the NTP information page](#). Scroll to find a link.

The [Release Numbering Scheme](#) page, at the [NTP Public Services Project](#), explains the current

NTP version numbering scheme.

Third-party Implementations and ports

Third-party implementations and some ports of the NTP package are linked from the [NTP Public Services Project links page](#).
