

Apache Tomcat

Apache Tomcat

Apache Tomcat is an open source software implementation of the Java Servlet and JavaServer Pages technologies. The Java Servlet and JavaServer Pages specifications are developed under the [Java Community Process](#).

Apache Tomcat is developed in an open and participatory environment and released under the [Apache License version 2](#). Apache Tomcat is intended to be a collaboration of the best-of-breed developers from around the world. We invite you to participate in this open development project. To learn more about getting involved, [click here](#).

Apache Tomcat powers numerous large-scale, mission-critical web applications across a diverse range of industries and organizations. Some of these users and their stories are listed on the [PoweredBy](#) wiki page.

Tomcat 7.0.22 Released

2011-10-01

The Apache Tomcat Project is proud to announce the release of version 7.0.22 of Apache Tomcat. This release includes bug fixes and new features compared to version 7.0.21 including:

- Further improvements to the memory leak detection and prevention features.
- Fix issue that prevented using SSL with the HTTP BIO connector and Java 7.
- Add support for controlling which session attributes are replicated when using session replication (a.k.a clustering).

Full details of these changes, and all the other changes, are available in the [Tomcat 7 changelog](#).
