nload

Characteristics

name	<i>nload</i>
description	<i>monitors network traffic and bandwidth usage</i>
version	<i>0.7.3</i>
language	<i>English</i>
OS	<i>Linux, *BSD, Solaris, HP-UX</i>
license	<i>Open Source (GPL version 2)</i>

Description

nload is a console application which monitors network traffic and bandwidth usage in real time. It visualizes the in- and outgoing traffic using two graphs and provides additional info like total amount of transfered data and min/max network usage.
