Purchasing Manager - An easy to use and quick utility that eliminates repetitious entry of purchased items

Purchasing Manager is an easy to use and quick utility that eliminates repetitious entry of purchased items, builds databases of purchased items and vendors as you order, streamline creating purchase orders, save time ordering while generating purchasing histories, track inventories, track expenses, create custom categories for vendors and items.

Purchasing Manager will help control and analyze expenses by equipment, by department, or however you prefer

, one click / type in a name and you have a new category. Maintain purchasing consistency to help simplify routines for people using the items. View purchasing histories, show your vendors you are a valuable customer. Will create a PO with a few clicks, based on inventory and reorder levels. Great for buyers of heaters and other electrical supplies. Has many fields for heater and electrical specifications. Injection Molders, Maintenance, Setup, this program will run on the simplest of computers. Use this program to enhance programs already in use or use it to manage all your purchasing needs. Create new categories, add new vendors, add new purchased items from menus and buttons throughout the program. Enter as much or as little information as needed, the only required fields are the vendor name and item description. Give items user-friendly names, (call it what you really call it) but when you print it for the vendor it has the information they need to get the product you want.

Print complete inventory listings for auditing,

verifying on-hand quantities, use the inventory listings for on site tracking and reorder requisitions.

Post one at the tool crib, the maintenance office, supervisors desk, get everybody to help you maintain supplies needed.
