Development snapshots

Daily snapshots of the main Git development branch are available at [codemonkey.org \(http://www.codemonkey.org.uk/projects/git-snapshots/git/\)](http://www.codemonkey.org.uk/projects/git-snapshots/git/)

(thanks to Dave Jones).

Git via Git

If you already have Git installed, you can get the latest development version via Git itself:

```
git clone git://github.com/gitster/git.git
```

If you have problems connecting (Git uses port 9418), you can try to access the repository over the HTTP protocol:

```
git clone http://github.com/gitster/git.git
```

(this method works even behind firewalls and such).

You can also always browse the current contents of the git repository using either the [gitweb \(http://repo.or.cz/w/git.git\)](http://repo.or.cz/w/git.git) or [GitHub \(http://github.com/gister/git/tree/master\)](http://github.com/gister/git/tree/master) web interface.

Git is a member of the [Software Freedom Conservancy \(/sfc\)](#)
