NetWitness® Investigator is the award-winning interactive threat analysis application of the NetWitness enterprise network monitoring platform. Investigator provides security operations staff, auditors, and fraud and forensics investigators the power to perform unprecedented free-form contextual analysis of raw network data.

You need to know everything that is happening on your network and have the power to drill into network and application layer session attributes on the fly and get answers to any question that might arise regarding an emerging threat. NetWitness Investigator is the only product that gives you the deep knowledge contained in full packet capture and session analysis and the capability to move mountains of data and obtain actionable intelligence in just a few easy clicks.

Get started by viewing a [video introduction](#) to NetWitness Investigator.

Also view our [YouTube Channel](#) or a FREE Advanced Training Webcast to learn about the latest features and advanced capabilities like FlexParse. [Click here to watch the training Webcast.](#)

NetWitness Investigator supports [NetWitness® Live](#), an online, 24x7 data service that provides immediate access to real-time threat-intelligence. Freeware users are provided access to daily threat intelligence from the [SANS Internet Storm Center](#), the [Department of Treasury](#) and select NetWitness content helpful in identifying the latest network threats.

EULA Notice: NetWitness Investigator Freeware has an annual renewable license, as defined in the Investigator Freeware [EULA](#). One year from activation date, all users will be prompted through the application to login to the [registration portal](#) and validate registration information. Simply use your community user credentials (as existing account) and follow the on-screen instructions to continue to leverage the award-winning NetWitness Investigator that thousands of security professionals depend on every day.
