## Download

Registry Decoder contains two components.

The first component, online acquisition, can be downloaded from:

<http://code.google.com/p/regdecoderlive/> (<http://code.google.com/p/regdecoderlive/>)

The second component, offline analysis, can be downloaded from:

<http://code.google.com/p/registrydecoder/> (<http://code.google.com/p/registrydecoder/>)

Both of these code repositories contain the complete source code and documentation of the two tools. They also contain pre-compiled, standalone binaries for stable releases of each component.
