# EARTHQUAKE 3D

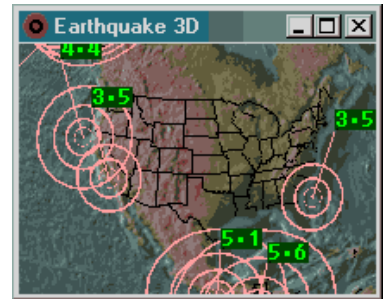

**WATCH EARTHQUAKES IN 3D...** Zoom and spin your way around the globe while viewing Earthquakes in three dimensions! Control how the Earthquakes and Earth are shown. See at a glance up to seven days of global Earthquake activity with this

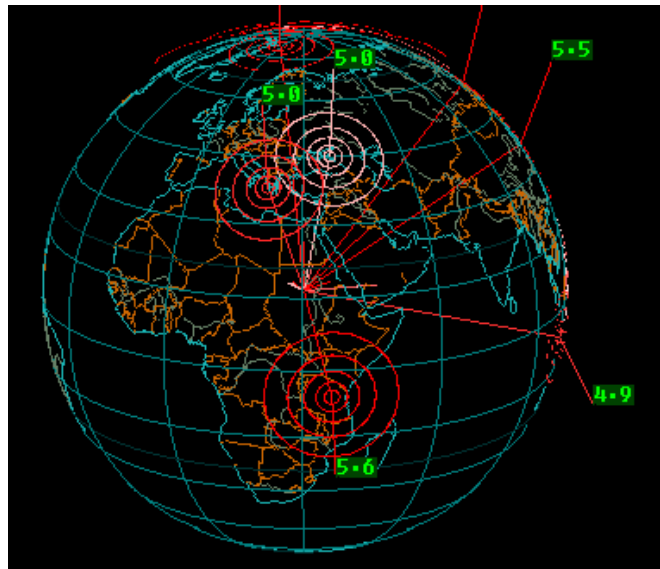

desktop Earthquake monitor.

## ANIMATE AND CONTROL...

Adjust and customize the display to see Earthquakes in a variety of different ways. Filter Earthquakes by size and time – then select from many display options that include quake indicators and map references. Earthquakes are shown in near real-time using the latest data from the USGS via the internet.

**Earthquake 3D is FREE!** Download it and use it NOW! No complicated setup or installation. Just unzip it and it's ready to go.

## PROGRAM REQUIREMENTS

For IBM compatible PCs with Windows 98 or better. Best results are obtained with a good graphics card.

**FREE EDITION**

This is a fully functional evaluation version of Earthquake 3D. There are no nag screens, adware, spyware, trial periods, or complicated user agreements. No pestware of any kind.

Version 2.7 – (1.1 Mbyte )
