## Product Spotlight

[Home](#) [Downloads](#)

Designer is a fast, intuitive and lightweight 3D modelling, viewing and assembly design tool.

Designer allows the user to open and edit over forty 3D file formats and thirty 2D image file formats, including Wavefront, Lightwave, 3DS max and CAD formats like STEP and IGES.

## Downloads Overview

### Free Trial Version / Free Viewer Downloads

We encourage you to download and try ThreeDify's [lightweight 3D design](#) and MS office add-on ([AsdGraph3D](#)) products for free. The trial period for each product is different. After the free trial period expires, you can still continue to use the product, but the functionality will be reduced to that of a free viewer. In addition, your 3D plotting results can be shared globally and opened anywhere in the world at no cost to the viewers. All they need to do is just install the free viewer.

To compare the the full and "Free Viewer" versions of a particular products, simply visit the [Feature List](#) page for that [product](#).

### Free Evaluation Package for Geological and Mining Solutions Are Available upon Request

Evaluation versions of our [geological modelling](#) and strategic [mine planning software](#) solutions are available upon request. If you are interested in evaluating our mining software products, please [contact us](#) so we can set a mutually agreeable evaluation period and create a build package that includes the most recent binaries and documentation.

## Products Available for Download

**ThreeDify Designer** (import over 40 3D formats; support for 10 materials, multi-texturing and shaders; true 3D perspective-correct zooming; and much more.)

**Office Designer** (include all the features from ThreeDify designer; support Office Live and all 3D instances are accessible from any Microsoft Office application.)

**ThreeDify Excel Grapher (AsdGraph3D)** (create true 3D charts and graphs within MS Excel; Animation export to AVI video formats; support for real-time data tracking, 3D polar and spherical plots.)

**ThreeDify Excel CoreViz** (3D drill hole visualization within MS Excel; ability to color-coding drill holes by lithology or assays; animation export to AVI video formats.)
