## Detection of AKM Antivirus 2010 Pro (Recommended)

AKM Antivirus 2010 Pro is difficult to detect and remove. AKM Antivirus 2010 Pro is not likely to be removed through a convenient "uninstall" feature. AKM Antivirus 2010 Pro, as well as other spyware, can re-install itself even after it appears to have been removed.

You also run the risk of damaging your computer since you're required to find and delete sensitive files in your system

such as DLL files and registry keys. It is recommended you use a good spyware remover to remove AKM Antivirus 2010 Pro and other spyware, adware, trojans and viruses on your computer.

**[Run a AKM Antivirus 2010 Pro scan/check](#)** to successfully detect all AKM Antivirus 2010 Pro files with the SpyHunter Spyware Detection Tool. If you wish to remove AKM Antivirus 2010 Pro, you can either purchase the SpyHunter spyware removal tool to remove AKM Antivirus 2010 Pro or follow the AKM Antivirus 2010 Pro manual removal method provided in the "Remedies and Prevention" section.

## Method of Infection

There are many ways your computer could get infected with AKM Antivirus 2010 Pro. AKM Antivirus 2010 Pro can come bundled with shareware or other downloadable software.

Another method of distributing AKM Antivirus 2010 Pro involves tricking you by displaying deceptive pop-up ads that may appear as regular Windows notifications with links which look like buttons reading Yes and No. No matter which "button" that you click on, a download starts, installing AKM Antivirus 2010 Pro on your system. AKM Antivirus 2010 Pro installs on your computer through a trojan and may infect your system without your knowledge or consent.

If you think you may already be infected with AKM Antivirus 2010 Pro, use this **[SpyHunter Spyware detection tool](#)** to detect AKM Antivirus 2010 Pro and other common Spyware infections. After detection of AKM Antivirus 2010 Pro, the next advised step is to remove AKM Antivirus 2010 Pro with the purchase of the SpyHunter Spyware removal tool.

## Symptoms

AKM Antivirus 2010 Pro may attempt to change your computer's desktop, hijack your browser, monitor your Internet browsing activities, change system files, and can do this without your knowledge or permission. Therefore, it is strongly recommended to remove all traces of AKM Antivirus 2010 Pro from your computer.

## Remedies and Prevention

AKM Antivirus 2010 Pro, as well as other Spyware, are constantly evolving and becoming more advanced to avoid detection. AKM Antivirus 2010 Pro along with its variants can install in different locations and even when you try to uninstall it you find they reappear when you reboot your computer.

### Install a good anti-spyware software

When there's a large number of traces of Spyware, for example AKM Antivirus 2010 Pro, that have infected a computer, the only remedy may be to automatically run a Spyware scan from a good anti-spyware software designed to detect AKM Antivirus 2010 Pro and other types of spyware.

### Remove AKM Antivirus 2010 Pro manually

Another method to remove AKM Antivirus 2010 Pro is to manually delete AKM Antivirus 2010 Pro files in your system. Detect and remove the following AKM Antivirus 2010 Pro files:

#### Processes

- C:\Program Files\AKM Antivirus 2010 Pro\AKM Antivirus 2010 Pro.exe

#### Other Files

- C:\Program Files\AKM Antivirus 2010 Pro\

#### Registry Keys

- [HKEY\\_CURRENT\\_USER\Software\AKM Antivirus 2010 Pro](#)
- [HKEY\\_LOCAL\\_MACHINE\SOFTWARE\AKM Antivirus 2010 Pro](#)
- [HKEY\\_LOCAL\\_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Uninstall\AKM Antivirus 2010 Pro](#)
