CrossOver Downloads

The files shown on this page are the latest versions you have access to. If you wish to download a newer version, then it means your support period has expired and you need to renew it from [Your Support Extensions](#) page. Read the [Upgrade and Support Policy](#) for more information on our upgrade policy.

If you would like to be notified via email when the next CrossOver version is available, please subscribe to our [announce mailing list](#).

 **Did you know** that the demo versions can be upgraded to the full version at any time. You can save yourself download time if you already have the demo installed. Simply choose to register the demo and it will become fully unlocked.

Name (click on name to download)	Size	md5sum 
 CrossOver Linux Standard 10.2.0
