Time is money, speed up your payroll processing now!

Easy To Use Payroll Software!  
Try PayWindow Payroll Today  
For a 30 Day FREE Trial!

## Download Our Software

### Dial-Up Connection Problems? We Have A Download Assistant Tool For You!

Dial-up connections may also cause problems with large downloads such as PayWindow by disconnecting you part way through.

We had a tool created for us that will keep trying until the entire download is completed. The Software Download Assistant is a small 336Kb file that when run will download and launch our software setup files for you. If you are disconnected, simply reconnect and the tool will resume where it left off at. It will also accelerate the download for even fast connections. If you want to use the download assistants use the links we have for each of our products below.

After clicking the Download Assistant link for one of our products farther down this page, use the instructions that you can view by clicking this next line:

**Click here to view Download Assistant Instructions - Click again to hide**

---

At ZPAY Payroll Systems, Inc., we believe in the try-before-you-buy method of marketing and as such, we encourage you to try our software before making a decision. We encourage you to look at others to see why we along with our present customers, feel we have the easiest to use payroll system there is.

#### **PayWindow to QuickBooks Posting!**

**Special Note:** We had this tool created for us but have found it to be slow and cumbersome to work with. Of course, Intuit wants to keep you captive

*to get that from \$200 to over \$2,000 plus each year (depending on how many employees you have) from you so they don't make it easy to get data from an outside payroll program. We here at ZPAY use QuickBooks ourselves but have never used the tool other than to test it. Since PayWindow has such thorough reporting, there is no need to post those individual transactions like the tool does. We simply post two general journal entries each month. One for total payroll and one for total payroll taxes and use PayWindow's reporting for tracking the payroll information. You can use the tool below or do what we do to do it faster and save on those high Intuit annual updates and use our affordable PayWindow payroll system. We intend to hold our low prices with no limit on number of employees nor number of company files that you support for as long as we can. But if you want, there is no extra charge so feel free to try it out and see if you may or may not want to use it.*

**New Improved PayWindow to QuickBooks data transfer tool. PayWindow users who use QuickBooks Pro or Premiere 2002 - 2012 can now use our transfer tool by downloading and installing the QuickBooks Foundation Classes from Intuit. You will find the tool itself in PayWindow under the Tools menu.**

**[QuickBooks Foundation Classes Installer](#) (For QuickBooks 2002 - 2005)**

**[QuickBooks Foundation Classes Installer](#) (for QuickBooks 2006 - 2008)**

**[QuickBooks Foundation Classes Installer](#) (for QuickBooks 2009 - 2012)**

---

#### **TAX TABLES**

##### **[PayWindow 2012 Tax Tables Download](#)**
