Wallix Pro Firewall

You Stay Online, Threats Stay Off Your Back!

Wallix Pro Firewall prevents intruders from accessing your computer and that's the main objective for a computer firewall. It automatically detects and blocks attacks through a comprehensive examination of all inbound and outbound information to your computer. Wallix Pro offers an easy interface, with clear details that present you a list with all installed programs from your computer. Unwanted programs can be uninstalled at any time by just a few clicks.

Wallix Pro Firewall has a simple and well organized control panel which allows you to monitor all your network activity, the number of ports open and the application accessing each port at that moment.

This program does more than protecting your computer from intruders and hackers; it is very efficient in blocking irritating spyware and adware as well. Wallix Pro Firewall comes with additional security specifications for those of you who also want their children safe from unwanted items online.

If you notice any unknown application in your ports, you can deal with it by simply right-clicking the application to block access immediately. Wallix Pro Firewall lets you set custom rules for applications as some of them require specific ports to be open and also to easily default to open necessary ports for a particular software application.

Although the program comes with high customization control, it still doesn't overwhelm even novice users (as it keeps some predefined rules that simplify your customization).

Why Wallix Pro Firewall is a great choice:

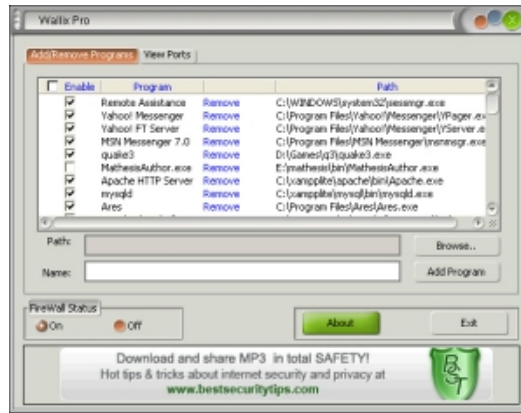

- The software is easy to install and use
- It offers clearly explained configuration options
- It hides all ports to keep your computer undetectable to scans
- It protects your system from various attacks
- It identifies all potential and actual threats
- It promptly alerts you in case of serious attacks
- Takes care that unauthorized content doesn't infiltrate your computer and
- Did we mention it is ABSOLUTELY FREE? Not only free of charge but also FREE of SPYWARE and ADWARE!
