WinStart Manager

WinStart Manager is an easy to use **startup manager for Windows** which gives you a 360 degrees vision on what programs and applications run at windows start time.

You know that after using your computer for months and installing new applications all the time, the Windows startup time increases more and more to a stall and frustration is creeping in each time you just need your machine to boot up and run !

WinStart Manager brings back that "**new computer feeling**" by giving you the right tools to select which applications should start automatically when Windows starts.

There are many places where one should look for when trying to clean up the windows startup. WinStart Manager covers all these sources : **The StartUp Folder, The Windows Registry** : Run, Run Once, Run Once Ex, Userinit, Shell, BHO and **Win.ini** config file.

In a friendly GUI, one can easily select which applications should start or not by a single click. After all settings are made, one can simply ShutDown, PowerOff or Reboot the computer, all within WinStart Manager.

To conclude, WinStart Manager is the fastest way from a clogged, slow computer to a **clean and fast Windows** boot time. It's FREE, safe and reliable.

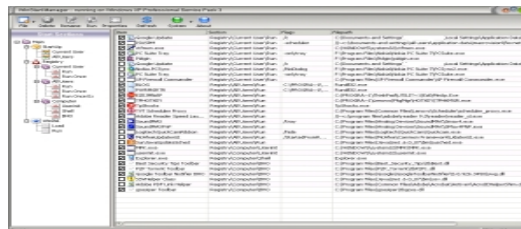

And the best: it's **FREE** and you have full access to its source code!
