## Complete Data Wipe

**Complete Data Wipe is a FREE file shredder with NO SPYWARE bundled in!**

When the average computer user wants to delete personal files the process usually involves or means deleting all e-mail, My Documents, and probably files on the desktop. This, however, is far from being the accomplishment of his/her intention. There's much more to securing your personal data and removing the unwanted files than you might think.

For example, deleting email from the inbox still involves messages left in sub folders, and also all the account information exposed. Just as well, emptying the recycle bin does not equal a total removal of data from the disk. When Windows performs the erasing of a file, it doesn't delete the data but only erases the file name from the directory tables. This means that an experienced user can resort to (easily available) tools to trace back your personal information, view the hard drive, simply put – undelete files you were sure to be gone for good.

### What is Complete Data Wipe ?

Complete Data Wipe is an advanced security software with full capabilities to erase entire hard disk drive partition, folders, subfolders and files you select, unused disk space and also records of your offline/online Internet activities including history folders, cookies, internet files temp folders, URL list. In addition, it removes passwords from computer drives and ensures a secured computer privacy.

This program means power and efficacy in deleting or cleaning the sensitive or unwanted data files permanently (using highly sophisticated wiping algorithms for total data deletion) so that there's no risk in having some recovery tool recuperate and expose your information again without your knowledge or consent.

### What can Complete Data Wipe do ?

This program packs in all the features and options the current technology provides with respect to a data erasing utility.

Complete Data Wipe also includes a very handy Scheduler, which allows you to run set time intervals for the tasks you choose the program to perform. The program displays under "Edit Properties" (which you can easily access with one click on the respective icon or by going to "Edit" and then "Preferences") detailed information regarding schedule tasks, files and valuable statistics. You can import/export files by clicking the "File" button but also submit new task and view log.

Going to "Preferences" (by clicking on the "Edit" button – top left) will enable you to configure general settings such as Erasing Report, Shell Extension Scheduler (add menu item to Explorer context menu), Pseudorandom Number Generation, Paging Files, Locked Files and other. You can also set password protection to the program to be in full control.

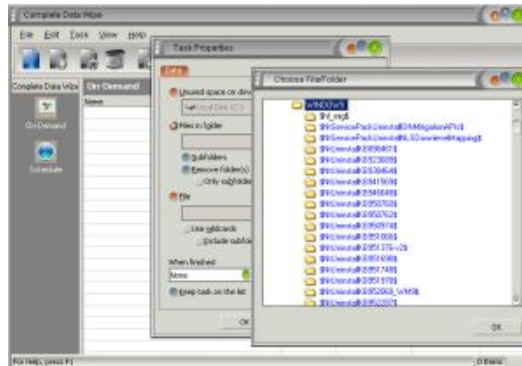

The software comes with online support so any question or need for further information you might have will be attended by our technical team.

NOTE: This utility is perfectly safe to use and is NOT associated with any adware, spyware or any other type of malware!
