Disk Image Software

Keep Your Data Safe!

Active@ Disk Image is a disk image software that makes an exact copy of any PC disks (HDD, SSD, USB, CD, DVD, Blu-ray etc.) and stores it into a folder. The disk images may be used for backups, PC upgrades or disk duplication purposes.

In case of computer failure, a backup image may be used to recover your computer system or find & restore any necessary files from within an image.

Active@ Disk Image

Download

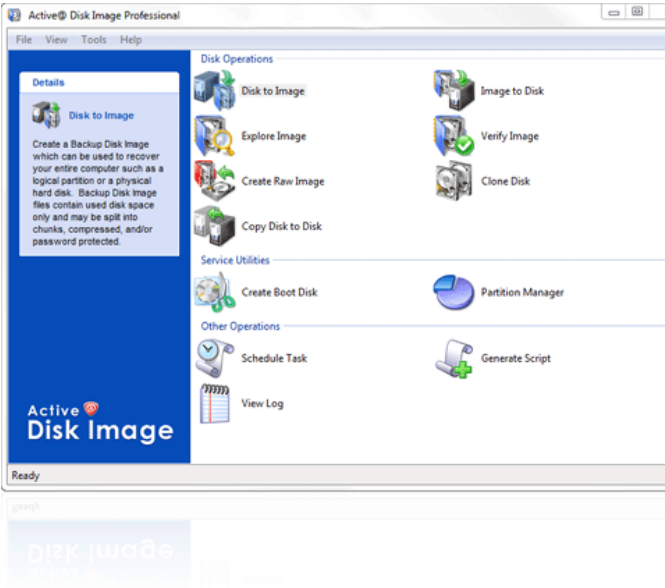

v.5.2.5 Size: 11.9 MB

Release Note: v.5.2.5 (Dec 22, 2011) Performance increased up to 150% on multi-core systems

Full version history

" Just a note to let you know that after a catastrophic failure of my XP machine, I was able to create a boot disk on my Windows 7 machine and successfully restore the complete drive from a previous backup on an external drive. Great program! Thanks very much. "

Bud Lorch St. Thomas ON
