## Flash Decompiler Trillix for Windows

Decompile Flash, convert SWF to FLA, edit & extract SWF elements

[BUY NOW](#)[DOWNLOAD](#)

Eltima Software is a proud partner of Adobe. We are glad to provide the support for **Adobe Flash platform** in our solutions.

**SOLUTION PARTNER**

### SWF to FLA Converter

**Flash Decompiler** Trillix is a feature rich and powerful **SWF to FLA** converter, which will help you decompile Flash movies, convert SWF elements into multiple formats and edit SWF files (texts, hyperlinks and more) on the go without Adobe Flash installed. Since version 4.X you can also convert Flex files back into Flex projects in case your SWF files were built in Flex!

Moreover, you will be able to extract all elements from SWF files and save them to your hard drive in various formats.

Flash Decompiler is the only decompiler that supports Flash versions **up to CS 6** (with TLF texts) and Flex!

And last, but not least, is that **Flash Decompiler** supports batch conversion mode. You can simply leave several files to be converted and go have a cup of coffee while Flash Decompiler is working.

Flash Decompiler doesn't decompile Captivate projectors (EXE), projectors created outside of Adobe Flash.

#### Highlights

#### All Features

#### Corporate Offers

### With Flash Decompiler you can:

#### Convert SWF to FLA or Flex source code

Did you lose your original FLAs or Flex project files? Did your computer crash? Actually, it doesn't matter where your original FLAs now, but it is a great problem if you don't have them. Actually, the solution is right in front of you. Flash Decompiler by Eltima is able to **restore** your original **source code FLA or Flex** so you can edit and alter them in any way you want in the native Flash environment.

#### Edit SWF files

Unique Edit SWF capabilities of Flash Decompiler let you **edit** existing sounds, images, colors, gradients, lines, texts and static links even **without conversion to FLA or Flex source format**. A built-in explorer makes browsing your PC for Flash movies and adding them even for batch decompilation and conversion extremely simple. Intellectual item-by-item preview, user-friendly controls with fully-customizable interface make Flash Decompiler a feature-rich user-friendly environment for professional work.

Extract SWF elements

With Flash Decompiler you can easily **export SWF elements** to your hard drive: Flash Video to AVI, MPEG, FLV and FLA, save sounds as WAV or MP3, images - as PNG, JPEG and BMP, texts as RTF, TXT and HTML. Flash Decompiler Trillix lets you convert the whole SWF file into FLA, or export certain Flash resources into FLA format. Flash Player EXE files are decompiled the same easy way as common SWF files.

**PLUS!** Capture SWF movies from the Internet with Flash Decompiler! Now Flash Decompiler also features 2 web plug-ins for Internet Explorer and FireFox to save Flash movies online.
