Videokv DVD Ripper for Mac

Based on the Mac software program, **Videokv DVD Ripper for Mac is an all-in-one excellent DVD Ripper** primarily as to back up popular portable multimedia devices with **high speed and user-friendly interface**, such as iPod, iPad and iPhone.

Videokv Mac DVD Ripper is a powerful DVD ripping software to allow you to **rip DVD to AVI, MPEG, WMV, DivX, MP4, MOV, XviD, or 3GP video format**, and **rip DVD audio to MP3, WMA, WAV, RA, AC3, or OGG audio format** with perfect quality.

Additionally, under overall customized consideration, **Videokv Mac DVD Ripper provides the convenience to capture and extract images from DVD movie scenes**, merge and split various files, edit your videos by cropping the image size, applying artistic display effects (such as old film, snapshot, gray), adjusting subtitle font and position, and other personalized features.

In contrast to other Mac DVD softwares, **Videokv Mac DVD Ripper offers you to enjoy more flexible functions**, such as customized video/audio bitrate, video/audio resolution and frame size.

Key features:

- Genreally apply to popular portable commercial multimedia devices like iPod, iPhone, Apple TV, Archos, and 3GP phone, Videokv DVD Ripper for Mac serves as an efficient DVD ripper for mac users to experience the one-step DVD rip and transfer and the customized output settings.
- Rip DVDs to video, audio, and image files to be applied on a wide range of multimedia devices.
- Cut off your preferred video segments by accurate time length clips, and either output them individually or merge them together to create a new video.
- Provide more video and audio settings, such as Video Resolution, Audio Bitrate, Frame Rate, Encoder and Audio Channels; Save the personal settings for future-step use.
- Preview the original video with the edited version side-by-side in real-time; Take snapshots and form customized video images.

-----Videokv DVD Ripper for Mac offers you to enjoy more flexible functions.
