BetterZip 2

> the next generation of archiving

Create

Create archives in most common formats and be in control of what goes in.

Update

Edit archived files in an external application and BetterZip can update your archive.

Preview

Preview files in your archives without extracting or use Quick Look.

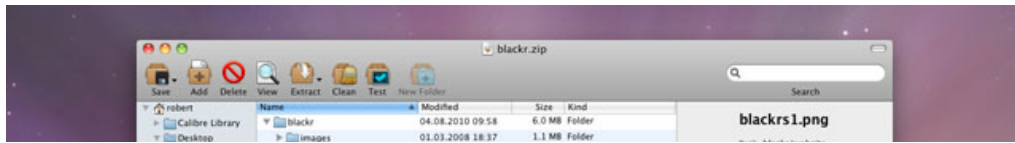

Protect

Protect your data with unbreakable AES-256 encryption.

BetterZip 2 Sports a Clean New User Interface

Similar to the Finder it has a sidebar on the left side into which you can drop your favorite folders for archives, e.g., your downloads folder. The main file list in the center shows the contents of the archive and on the right side is a sidebar which can display a preview of the selected file.

Other downloads: [BetterZip 1.8.3](#) (Mac OS X 10.4 and later) · [BetterZip Quick Look Generator](#) (Mac OS X 10.5 or later)
