Downloading OpenTTD

For OpenTTD you can use the original Transport Tycoon Deluxe data files (you need to own a Transport Tycoon Deluxe CD). There are also the free alternatives: [OpenGFX \(graphics\)](#), [OpenSFX \(sound\)](#) and [OpenMSX \(music\)](#). These can be installed automatically by the Windows and OS/2 installers. Please refer to the [readme](#) for more information.

You can download the free alternatives here: [download OpenGFX](#), [download OpenSFX](#) and [download OpenMSX](#).

For all binaries officially released by us we publish the MD5, SHA1, and SHA256 checksums. You can use these checksums to check whether the file you downloaded has been modified. All three checksums should match the file you downloaded; if this is not the case it means that either the file didn't come from us or that it got broken during transport. Either way it might possibly contain dangerous modifications and the file should therefore not be trusted!

Download stable

Latest release in stable is 1.2.1, released on 2012-05-31 20:55 UTC.

[Mac OS X 10.3.9-10.5 \(universal build\)](#)
