FindOnClick

✓ FindOnClick can search for files on any NTFS or FAT (FAT 12, 16, 32) partitions, including from hard drives (internal and external), floppy disks, flash cards, Smart Media (SM), SONY Memory Sticks, IBM Micro Drives, Multimedia Cards (MMC), Secure Digital Cards (SD), Zip disks, etc.

License: Commercial Software: 30 day fully functional trial

What FindOnClick can do

- Easy to use filters provide powerful ways that help reduce the number of search results.
- Can be powered from the command line or from an easy-to-use graphical interface.
- Choose whether FindOnClick minimizes to the tray or on close to reduce desktop clutter.
- Search results can be exported to .csv files for analysis in programs such as Microsoft Excel.
- View information about the version numbers of program files. Great for checking for updates.
- Quickly delete unwanted or duplicate files at the click of a button. No need for Explorer.
- Locate duplicate files quickly to better manage and organize your data.
- Advanced users make complex search queries using regular expressions.
- Quickly integrate the program with the click of a button with Windows Explorer.
- Confirm the contents of your files are identical to source files by using hash referencing.
- Extensive options to search MP3 music files. Displays MP3s by Title, Artist, Album etc. (ID3v1).
- Limit your search to a particular folder. This significantly speeds the search process.
- Evaluation version available for testing.

Program Controls, Options, and Features
