InfoHesiveEP is Free! [Click to Download or Update](#)

"I have been struggling for weeks with how to convert an EPUB file to a really well formatted MOBI file for Kindle. All the many converters I have tried are junk. InfoHesiveEP did the job so well I was astounded.

Thanks so much for making this resource available free of charge."

ePublishing Made Easy - for Everyone!

- Easily create professional level eBooks, Help Files, ePublications, and PDFs with the feature-rich editor.
- Import and Export to a wide range of formats including CHM, HTML, and ePub.
- Build trial versions & generate serial numbers so your ePublications are protected from piracy & illegal copying.
- Superb Outliner functions, and automated creation of Contents and Index pages.
- Repurpose existing content for your audience.
- Build eBooks that require no software to run.
- Produce high quality Help Files and support documentation for your products and services.
- Open Windows Help Files, or import & annotate.
- Import PDF, Rich Text, HTML, CHM, & TXT.

- Output to PDF, HTML, CHM, ePub to ensure your publication is delivered to Windows, Mac, iPhone, iPad, Kindle, Sony Reader, & Mobile Devices.

ePublishing has become an essential tool in communicating with an audience as ebooks, PDF and CHM help files are so easily distributed via email or over the Internet. As ebooks increasingly form part of the promotional strategy of businesses and organizations, and as hardware ebook readers like the Kindle and Sony Reader become commonplace, well authored ebooks, whether a stand-alone ebook like InfoHesiveEP builds, ePub e-books, or chm e books, all improve the connection between audience and business.

InfoHesiveEP ensures the authorship process is supported within a straightforward interface. Building e-books that can be read by ebook readers, pdf, html, rich text and chm programs, and exported to the standard .Mobi file which can be read by Kindle, Blackberry, Nokia, Samsung, and Sony Ericson devices make InfoHesive not only a great digital publisher, but also the perfect digital publishing conversion software.

Like InfoHesiveEP, Love SyncBackPro InfoHesiveEP has it's own version backup feature built in which is great, however if you need to backup all your important documents (including open & locked files) to hard drive, CD/DVD, FTP, Email, take a look at the best out there: [SyncBackPro](#).
