GEUP 5

Plane geometry software for math, science and engineering calculation and visualization. The construction concept and the interactive visualization are the basis of the program. Designed to be easy-to-use, it provides a powerful mathematical platform with a wide range of uses.

 [Features](#)  [Download](#)  [Buy](#)

GEUP 3D 2

Solid geometry software for math, science and engineering calculation and visualization. GEUP 3D 2 is the equivalent of GEUP 5 in the 3D space.

 [Features](#)  [Download](#)  [Buy](#)

[Download](#) the demo versions to obtain an overview and try their capabilities through the included samples or create your own constructions.

Visit the [order page](#) for information about registration and purchase options.
