True and Accurate Reproductions with Mac Audio Recorder

- Records to all of the most popular audio file formats, including: MP3, WAV, AAC, AC3, AU, FLAC, M4A, M4R, MATROSK, and OGG format.
- Record at a wide range of sampling rates: anywhere

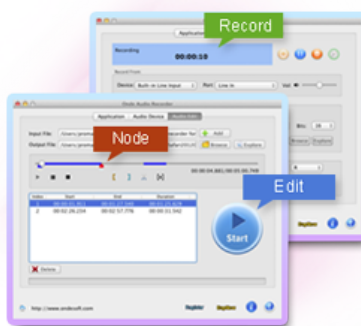

from 8,000 to 96,000 Hz.

- Record sound, voice, music or any other audio on Mac.
- Onde Audio Recorder Mac recordings achieve true lossless audio quality, meaning your recording and the original will sound precisely the same.
- Once your recording is finished, you can play your new audio file immediately within the Onde Audio Recorder in order to ensure quality and accuracy.

Fully Customizable Interface Lets You Record And Edit Audio on Mac Any Way You Want

- Get just what you need with the built-in Mac Audio Editor: cut down your recordings by setting the start and end points.
- Or use the editing functions to cut and splice audio clips on your Mac in to your own unique track.
- The easy-to-use interface reduces the most complicated tasks to just a few simple options that any user can readily understand.
- The built-in recording scheduler allows you to set start and end times for recording on a mac, perfect for band practice, lectures, or any other type of extended recording.
- Hotkey functionality allows users to assign hotkeys that can easily be used any time to start, pause, and stop recordings, making the recording process even faster and even easier.

Useful Tips

Record from web pages
Record from line-in device
