Onde ClipBuddy for Mac

A Mac clipboard manager and history app for Mac OS X - the original multiple clipboard display and editing software.

ClipBuddy does more than just copy and paste text – it organizes all of your copied text from any program in easy-to-navigate Text Trees automatically

Use ClipBuddy to copy images just like you would with text, it's that simple!

Paste your text with the original formatting or as plain text, so you can format it to suit your needs

Merge separate clips in to new clips effortlessly

Use the SuperPaste feature to paste multiple clippings in a row

Edit your clippings within the preview window any way you want: change the casing, delete the line breaks, or even use the find and replace feature to alter your text

SYSTEM REQUIREMENTS: Mac OS X 10.6.0 - 10.7.4

MORE THAN JUST A CLIPBOARD...

- **Pictures or Text** – It doesn't matter; ClipBuddy does it all
- **Multiple Clips** – Keep track of all your clippings from any program with the easy to navigate Text Trees
- **Text Trees** – organize your clippings in to simple stacks so all your clippings are just a few clicks away
- **Personalize your Clips** – Use ClipBuddy to change text case, remove unwanted punctuation, or even find and replace specific words
- **Super Paste** – allows you to paste multiple clippings in a loop, without any pesky punctuation
- **Search Feature** – allows you to search for clippings by name or by content, ensuring you never lose a clipping again
- **Customizable Views** – mean you can choose exactly how ClipBuddy looks, including adjusting the opacity of the program window or setting it to hide entirely
- **Recorded Metadata** – allows the user to see what

application the clipping came from, when it was made, and even the URL of the website it was taken from.

- **Clip History** – ClipBuddy automatically saves any clipping you make, ensuring that nothing gets lost in the shuffle of digital work

CLIPBUDDY ORGANIZES ALL YOUR DATA

- ClipBuddy automatically records all the essential data you never want to forget about your clipping, including:
 - * What program it came from
 - * When it was created
 - * The web URL where you found it
- Use ClipBuddy's naming feature to help identify and classify all of your clippings
- Search for clippings using titles, clipping content or the clipping's metadata to find the clip you need

BEHIND THE SCENES OR FRONT AND CENTER – YOU DECIDE

- A handful of display options allow you to decide where ClipBuddy does all its work:
 - * Keep the mini view always on top for when you always need to keep an eye on your clippings
 - * Set ClipBuddy to open minimized so it can do all the work backstage and leave your desktop free for other work
 - * Or simply turn on ClipBuddy's customizable transparency and enjoy the best of both worlds
- The convenient toolbar icon lets you control ClipBuddy from above, no matter how you choose to view the program
