Conveniently Measure the Dimensions of Any Object on Your Mac

- Quickly and easily measure the length and width of any object on your Mac with Onde Screen Rulers for Mac.
- Measuring diagonals is easy too, just use the special diagonal ruler.
- Measure angles using the built-in protractor.
- Use the right angle ruler to assure objects and lines are perfectly perpendicular.
- Fully-customizable units allow you to change the units to tailor fit the job: choose from pixels, inches, centimeters, picas, or calibrate your own units.

Get All the Information You Need With the Detail Window

- The Detail Window provides an extremely helpful and unobtrusive magnified view of the area around your cursor to assist in selecting specific pixels and making accurate measurements.
- With an individual pixel selected, the Detail Window

Make the Logger Window Your Personal Notebook

- The Logger Window will log all of your measurements and displace them in a simple and straightforward list.
- Use the memo setting to add notes to any of your measurements, helping you remember all the details associated with your data.
- The Memorize Function within the Logger Window allows you to never lose your place by always restoring the rulers to their most recent position when the application was last closed.

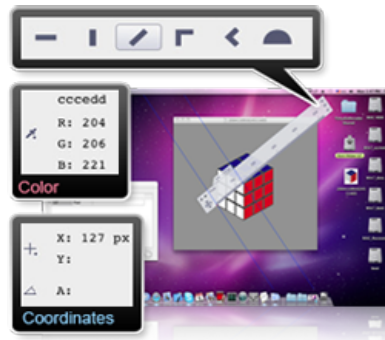

As a web designer, I can say that Onde screen rulers is by far the best measuring program I have ever found to measure objects or angles accurately and conveniently.
