About

Facebook Password Decryptor is the FREE software to instantly recover Facebook account passwords stored by popular **Web Browsers and Messengers**.

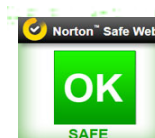

Most of the applications store the Login passwords to prevent hassle of entering the password everytime by the user. Often these applications use their own proprietary encryption mechanism to store the login passwords including Facebook account passwords. FacebookPasswordDecryptor **automatically** crawls through each of these applications and instantly recovers the encrypted Facebook account password.

It presents both GUI interface as well as command line version, the later is more helpful for **Penetration** testers in their work. Apart from normal users who can use it to recover their lost password, it can come in handy for **Forensic** officials who can get hold of any stored Facebook Login passwords which can give vital clue in their investigation.

It works on wide range of platforms starting from Windows XP to latest operating system **Windows 8**.

Features

FacebookPasswordDecryptor supports recovering of the stored Facebook account password from most of the popular Internet browsers and messengers. Here is the complete list of supported applications.

- ▶ **Internet Explorer**
- ▶ **Firefox**
- ▶ **Google Chrome**
- ▶ **Opera Browser**
- ▶ **Apple Safari**
- ▶ **Flock Browser**
- ▶ **Paltalk Messenger**
- ▶ **Miranda Messenger**

Here are the top features,

- ▶ Instantly decrypt and recover stored encrypted Facebook account password from Popular Web browsers and Messengers.
- ▶ Comes with both **GUI interface** as well as **Command-line** version.
- ▶ Support recovering multiple Facebook accounts stored with any of the supported applications.
- ▶ Automatically discovers the supported applications from their respective install location and recovers the password instantly.
- ▶ Sort feature to arrange the displayed password list by username and password which makes it easy to search through 100's of entries.
- ▶ Save the recovered Facebook password list to **HTML/XML/TEXT** file for transferring to other system or for future use.
- ▶ Easier and faster to use with its enhanced user friendly interface.
- ▶ Integrated **Installer** for assisting you in local Installation & Uninstallation.

How it works?

Each of the above mentioned applications use their own encrypted format and storage location to securely store the Facebook account password. FacebookPasswordDecryptor uses different techniques to decrypt these passwords and present them in the clear text.

Here is the research article that throws light on the internal password storage and encryption mechanisms used for storing the Facebook account password by some of the prominent applications. It also shows how to recover Facebook passwords from each of such applications.

```

Using FacebookPasswordDecryptor

FacebookPasswordDecryptor is easy to use with its simple GUI interface.

Here are the brief usage details

Using GUI Version

- ▶ Launch FacebookPasswordDecryptor on your system
- ▶ Next click on '**Start Recovery**' button and all stored Facebook Login passwords from various applications will be recovered & displayed as shown in screenshot 1 below.
- ▶ By default passwords are not shown for security reasons as it is sensitive data. However you can click on '**Show Password**' button at the bottom to view these passwords.
- ▶ Finally you can save all recovered password list to **HTML/XML/Text** file by clicking on 'Export' button and then select the type of file from the drop down box of 'Save File Dialog'.

Note that FacebookPasswordDecryptor recovers the stored Facebook password for currently logged on user only. If you want to recover the password for different user then you can right click and select '**Run as**' to run it as respective user.

Using Command-line Version

Here is the typical usage of command line version

```
FacebookPasswordDecryptor.exe "<output_file path>"
```

Here are some of the examples

```
//Writes recovered password to text file in current directory
FacebookPasswordDecryptor.exe output.txt

//Writes recovered password to HTML file in current directory
FacebookPasswordDecryptor.exe output.html

//Writes recovered password to XML file in current directory
FacebookPasswordDecryptor.exe output.xml

//Writes recovered password to TEXT file
FacebookPasswordDecryptor.exe "c:\my test\passlist"
```

It automatically detects the mode (**HTML/XML/Text**) by using the extension of the specified file (html/xml/txt). By default (or if no extension is specified) it uses the TEXT mode. For more examples refer to Screenshot 2 below.
