### About Browser Password Decryptor

**Browser Password Decryptor** is the FREE software to instantly recover website login passwords stored by **popular web browsers**.

All of these web browsers offer the feature store the login passwords so that user don't have to remember and enter the password every time. Each of these use their own local storage format and proprietary encryption mechanism to store the login passwords.

'Browser Password Decryptor' automatically crawls through each of these browsers and **instantly recovers** all of the stored website login passwords.

It presents both GUI interface as well as **command line** version, the later is more helpful for **Penetration** testers in their work. Apart from normal users who can use it to recover their lost password, it can come in handy for **Forensic** officials who can get hold of any stored website passwords by various browsers.

It works on most of the Windows platforms starting from Windows XP to latest operating system, **Windows 8**.

### Features

It supports recovery of website login passwords from following browsers.

- ▶ **Internet Explorer**
- ▶ **Google Chrome**
- ▶ **Google Chrome Canary**
- ▶ **Opera Browser**
- ▶ **Apple Safari**
- ▶ **Flock Browser**

Here are the top features of BrowserPasswordDecryptor

- ▶ Instantly decrypt and recover stored encrypted passwords from popular web browsers.
- ▶ Comes with both **GUI interface** as well as **Command-line** version.
- ▶ Right Click Context Menu to quickly copy the password
- ▶ Recover password of **any length and complexity**.
- ▶ Automatically discovers all supported Applications and recovers all the stored passwords.
- ▶ **Sort** feature to arrange the recovered passwords in various order to make it easier to search through 100's of entries.
- ▶ Save the recovered password list to **HTML/XML/Text file**
- ▶ Easier and faster to use with its enhanced user friendly GUI interface.
- ▶ Support for local Installation and uninstallation of the software.

## Installation & Uninstallation

Browser Password Decryptor comes with Installer so that you can install it locally on your system for regular usage. It has intuitive setup wizard (as shown in the screenshot below) which guides you through series of steps in completion of installation.

At any point of time, you can uninstall the product using the **Uninstaller** located at following location (by default)

```
[Windows 32 bit]
C:\Program Files\SecurityXploded\BrowserPasswordDecryptor

[Windows 64 bit]
C:\Program Files (x86)\SecurityXploded\BrowserPasswordDecryptor
```

## Using BrowserPasswordDecryptor

BrowserPasswordDecryptor is easy to use with its simple GUI interface.

Here are the brief usage details

### Using GUI Version

- ▶ Launch BrowserPasswordDecryptor on your system
- ▶ Next click on '**Start Recovery**' button and all website login passwords stored by web browsers will be recovered & displayed as shown in screenshot 1 below.
- ▶ By default passwords are not shown for security reasons as it is sensitive data. However you can click on '**Show Password**' button at the bottom to view these passwords.
- ▶ Finally you can save all recovered password list to **HTML/XML/Text** file by clicking on 'Export' button and then select the type of file from the drop down box of 'Save File Dialog'

### Using Command-line Version

Here is the typical usage of command line version

```
BrowserPasswordDecryptor.exe "<output_file path>"
```

Here are some of the examples

```
//Writes recovered password to text file in current directory
BrowserPasswordDecryptor.exe output.txt

//Writes recovered password to HTML file in current directory
BrowserPasswordDecryptor.exe output.html

//Writes recovered password to XML file in current directory
BrowserPasswordDecryptor.exe output.xml

//Writes recovered password to TEXT file
BrowserPasswordDecryptor.exe "c:\my test\passlist"
```

It automatically detects the mode (**HTML/XML/Text**) by using the extension of the specified file (html/xml/txt). By default (or if no extension is specified) it uses the TEXT mode. For more examples refer to Screenshot 2 below.

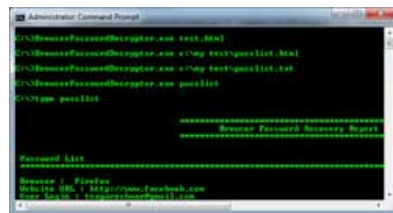

## Screenshots
