About

Safari Password Decryptor is the FREE software to instantly recover **website login passwords** from Safari browser.

Like other browsers, **Safari** also has built-in password manager which stores the login passwords for the visited websites so that user don't have to enter the password every time. Safari uses its own local storage format and **encryption** mechanism to securely store these login passwords. SafariPasswordDecryptor helps in automatically recovering all such website login passwords stored by Safari.

Safari Password Decryptor presents both GUI interface as well as command line version, the later is more helpful for **Penetration** testers in their work. Apart from normal users who can use it to recover their lost password, it can come in handy for **Forensic** officials who can get hold of any stored Website login passwords.

It works on most of the Windows platforms starting from Windows XP to latest operating system, **Windows 8**.

Features

Here are the top features of SafariPasswordDecryptor

- ▶ Instantly decrypt and recover all stored passwords from Safari..
- ▶ Comes with both **GUI interface** as well as **Command-line** version.
- ▶ Recover password of **any length and complexity**.
- ▶ **Sort** feature to arrange the recovered passwords in various order to make it easier to search through 100's of entries.
- ▶ Save the recovered password list to **HTML/XML/TEXT file**
- ▶ Easier and faster to use with its enhanced user friendly GUI interface.
- ▶ Support for local Installation and uninstallation of the software.

Internals of Safari Password Secrets

Safari Password Manager has a built in password manager for securely storing and managing the user's web login passwords. Safari uses it's own proprietary storage format and **encryption mechanism** to keep the passwords protected from prying eyes.

Here is the research paper - '[Exposing the Password Secrets of Safari](#)' - which exposes Safari stored password location, **encryption algorithm** and code for decryption of stored passwords !

Installation & Uninstallation

It comes with simple Installer that helps you to install it locally on your system for regular usage. It has intuitive setup wizard which guides you through series of steps in completion of installation.

At any point of time, you can uninstall the product using the **Uninstaller** located at following location (by default)

```
[Windows 32 bit]
C:\Program Files\SecurityXploded\SafariPasswordDecryptor

[Windows 64 bit]
C:\Program Files (x86)\SecurityXploded\SafariPasswordDecryptor
```

How to Use?

SafariPasswordDecryptor is easy to use with its simple GUI interface.

Here are the brief usage details

Using GUI Version

- ▶ Launch SafariPasswordDecryptor on your system
- ▶ Next click on '**Start Recovery**' button and all stored website login passwords will be recovered & displayed as shown in screenshot 1 below.
- ▶ By default passwords are not shown for security reasons as it is sensitive data. However you can click on '**Show Password**' button at the bottom to view these passwords.
- ▶ Finally you can save all recovered password list to **HTML/XML/Text** file by clicking on 'Export' button and then select the type of file from the drop down box of 'Save File Dialog'.

Using Command-line Version

Here is the typical usage of command line version

```
SafariPasswordDecryptor.exe "<output_file path>"
```

Here are some of the examples

```
//Writes recovered password to text file in current directory
SafariPasswordDecryptor.exe output.txt

//Writes recovered password to HTML file in current directory
SafariPasswordDecryptor.exe output.html

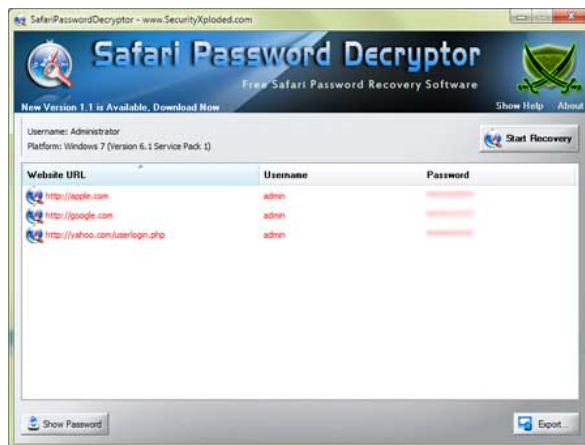

//Writes recovered password to TEXT file
SafariPasswordDecryptor.exe "c:\my test\passlist"
```

It automatically detects the mode (**text or html**) by using the extension of the specified file (**txt or html**). By default (or if no extension is specified) it uses the TEXT mode. For more examples refer to Screenshot 2 below.
