About Twitter Password Decryptor

Twitter Password Decryptor is the FREE software to instantly recover Twitter account passwords stored by **popular web browsers**.

Most web browsers store the **login passwords** for visited websites so that user don't have to remember and enter the password every time. Each of these web browsers use their own proprietary encryption mechanism to store the login passwords including Twitter account passwords. TwitterPasswordDecryptor automatically crawls through each of these browsers and instantly recovers all of the stored Twitter passwords.

It presents both GUI interface as well as command line version, the later is more helpful for **Penetration** testers in their work. Apart from normal users who can use it to recover their lost password, it can come in handy for **Forensic** officials who can get hold of any stored Twitter account passwords and then use that Twitter profile information to further extend their investigation.

It is fully **Portable** software which can be directly run anywhere without installing locally. It also comes with Installer for those who wants to install it locally and use it on regular basis. It works on wide range of platforms starting from Windows XP to latest operating system **Windows 7**.

Features of TwitterPasswordDecryptor

TwitterPasswordDecryptor currently supports recovering of the stored Twitter account password from following popular Internet browsers.

- ▶ **Internet Explorer**
- ▶ **Firefox**
- ▶ **Google Chrome**
- ▶ **Opera Browser**
- ▶ **Apple Safari**
- ▶ **Flock Browser**

Here are the highlights of top features of TwitterPasswordDecryptor which makes it stand apart from other similar tools including commercial ones.

- ▶ Instantly decrypt and recover stored encrypted Twitter account password from Popular Web browsers.
- ▶ Comes with both **GUI interface** as well as **Command-line** version.
- ▶ Automatically discovers the supported applications from their respective install location and recovers the password instantly.
- ▶ **Sort feature** to arrange the displayed password list by username and password which makes it easy to search through 100's of entries.
- ▶ Save the recovered Twitter password list to **HTML/XML/Text** file for transferring to other system or for future use.
- ▶ Easier and faster to use with its enhanced user friendly interface.
- ▶ It comes with **Installer** for helping you in local Installation & Uninstallation.

How it Works?

Each of the above mentioned Web browsers use their own encrypted format and storage location to securely store the Twitter account password. TwitterPasswordDecryptor uses different techniques to decrypt these passwords and present them in the clear text.

Here is the research article that throws light on the internal password storage and encryption mechanisms used for storing the Twitter account password by these Applications.. It also shows how to recover Twitter passwords from each of such applications.

'Exposing the Twitter Password Secrets'

Installation & Uninstallation

Though TwitterPasswordDecryptor is a Portable software, it comes with Installer so that you can install it locally on your system for regular usage. This installer has intuitive wizard (as shown in the screenshot below) which guides you through series of steps in completion of installation. At any point of time you can use Uninstaller to remove the software from the system.

At any point of time, you can uninstall the product using the **Uninstaller** located at following location (by default)

```
[Windows 32 bit]
C:\Program Files\SecurityXploded\TwitterPasswordDecryptor

[Windows 64 bit]
C:\Program Files (x86)\SecurityXploded\TwitterPasswordDecryptor
```

Using TwitterPasswordDecryptor

TwitterPasswordDecryptor is easy to use with its simple GUI interface. For advanced users & Penetration testers, it also comes with command line interface.

Here are the brief usage details for both GUI and command line version.

Using GUI Version

- ▶ Launch TwitterPasswordDecryptor on your system
- ▶ Next click on '**Start Recovery**' button and all stored passwords from various applications will be displayed in the list as shown in screenshot 1 below.
- ▶ By default passwords are not shown for security reasons as it is sensitive data. However you can click on '**Show Password**' button at the bottom to view these passwords.
- ▶ Finally you can save all recovered password list to **HTML/XML/Text** file by clicking on 'Export' button and then select the type of file from the drop down box of 'Save File Dialog'.

Using Command-line Version

Here is the typical usage of command line version

```
TwitterPasswordDecryptor.exe "<output_file path>"
```

Testimonials »

Here are some of the examples

```
//Writes recovered password to text file in current directory
TwitterPasswordDecryptor.exe  output.txt

//Writes recovered password to HTML file in current directory
TwitterPasswordDecryptor.exe  output.html

//Writes recovered password to XML file in current directory
TwitterPasswordDecryptor.exe  output.xml

//Writes recovered password to TEXT file
TwitterPasswordDecryptor.exe  "c:\my test\passlist"
```

It automatically detects the mode (**HTML or XML or Text**) by using the extension of the specified file (html or xml or txt). By default (or if no extension is specified) it uses the TEXT mode. For more examples refer to Screenshot 2 below.

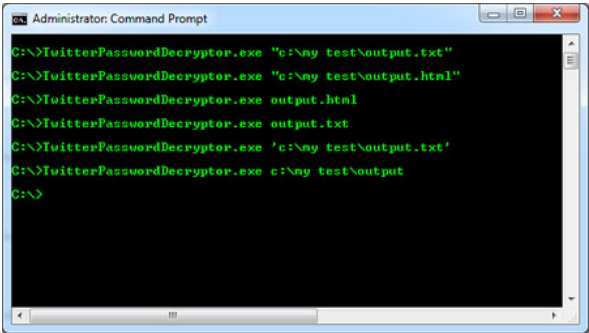

Screenshots

Here are the screenshots of TwitterPasswordDecryptor

Screenshot 1: TwitterPasswordDecryptor showing the recovered Twitter password accounts from various applications.

Screenshot 2: Command line usage of TwitterPasswordDecryptor showing various examples.

Screenshot 3: Exported Twitter account password list in HTML format by TwitterPasswordDecryptor.
