Camera Control Pro - 2.8.0
Answer ID 17029 | Published 10/25/2010 04:37 PM | Updated 03/25/2011 08:56 AM

How can I update my Camera Control Pro 2 software?
This is **Camera Control Pro 2.8.0** full version installer for Windows and Macintosh systems.

Modifications enabled with this version

Modifications that apply to both the Windows and Macintosh versions

- Support for Nikon Message Center 2 has been added.
- The viewer built into Camera Control Pro 2 has been eliminated. Use ViewNX 2 to view images.
- Keyboard shortcuts can now be assigned to Shoot and AF and Shoot button functions.
- When the Show images captured by Camera Control Pro 2 option in the ViewNX 2 File menu is checked, photos taken using Camera Control Pro 2 are displayed in ViewNX 2 as they are taken.
- Support for the D7000 has been added.
- Movies can now be recorded with the D7000. Movies are recorded to the memory card inserted in the camera. Movie files can then be downloaded to the computer after recording.

Supported System Requirements

Windows:

- CPU: 1-GHz or better Intel Celeron / Pentium 4 / Core Series
- Microsoft Windows 7 Home Premium
- Microsoft Windows 7 Professional
- Microsoft Windows 7 Ultimate
- Microsoft Windows Vista Home Basic Service Pack 2*
