Why choose miTracker Anti-Theft?

There is a data from FBI, 1 in 10 laptops purchased today will be stolen within one year. Sadly, only 3% will be returned. For most people, recovering the laptop is only one part of the process. To avoid the irreplaceable data leakage such as privacy photos, financial records, stored passwords may become more important for us. miTracker Anti-Theft is a unique laptop tracking software, not only can help you get back the stolen laptop, but also prevent unauthorized access into your laptop through its remote deletion and remote lockdown features.

How it works

This part is to tell you how miTracker works magically in protecting your laptop and data.

[CLICK HERE>>](#)

Geo-location track your stolen laptop

Use advanced WIFI and Internet Protocol Address positioning algorithms, it is shockingly accurate.

Detailed location information can be quickly displayed on Google maps in miTracker Anti-Theft account dashboard.

This important information can be passed to local law enforcement agency to assist them in the recovery of your laptop.

Tips to prevent data loss

Remotely wipe data on your stolen laptop

Remotely and selectively delete confidential files, business documents, private photos, financial data and stored passwords on your stolen laptop.

It is auto-delete that the deletion order can be processed immediately once the stolen laptop connects to the internet.

Easy to operate, just set the laptop to "Missing" status on miTracker online portal and select the files you want to erase, then the order can be processed automatically.

Remotely lock down your stolen laptop

Awards

Remotely block your laptop to prevent the thief get access into your computer, then your privacy information stay safe and in your control.

You can choose to display a message on the locked laptop screen. For example, you can display your contact information if your computer is lost and the good person who found it may return it to you.

One-click operation, just set the laptop to "lock" status on miTracker online portal, then the order will be processed automatically.

Testimonial

" Amazing laptop tracking software. I lost my laptop and I was so worried about the confidential files in my laptop. Thanks to miTracker, it helps me delete the file and then lockdown the computer totally. I don't have the data leakage concern any more "

— Ryan Smith
