1 SQL Server 2012 Express Install

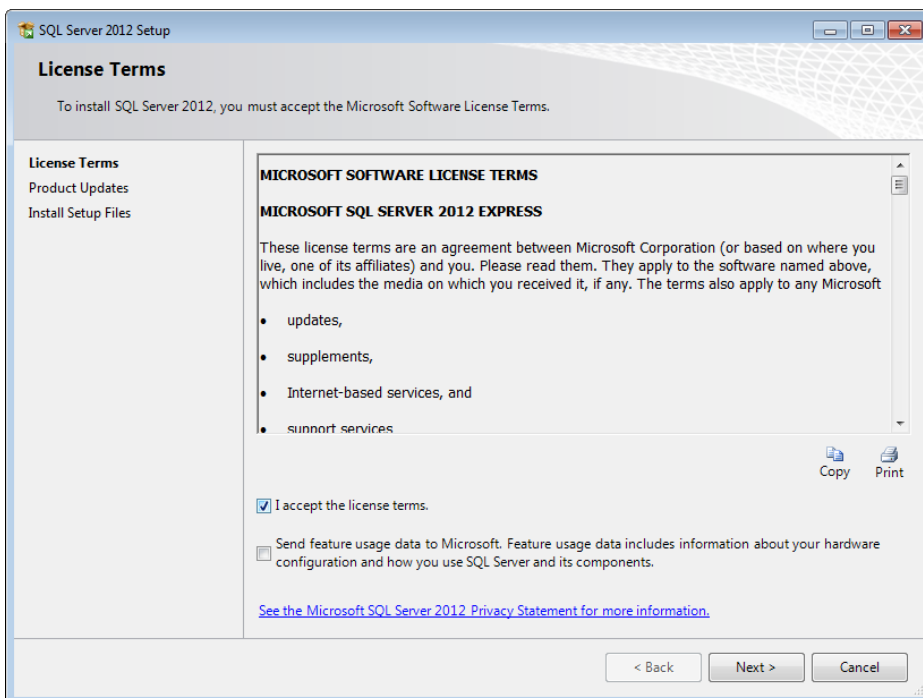

If you haven't done so already, please download SQL Server 2012 express from the following link - <http://www.microsoft.com/sqlserver/en/us/editions/2012-editions/express.aspx>. Ensure you download SQL Server Express with Tools, for your appropriate CPU architecture - x86 or x64 (the Tools for SQL Server Express are required so you can back up your databases).

Installation Instructions

- Run the SQL Server 2012 Express executable
- At the 'Installation' screen, select 'New SQL Server stand-alone installation'

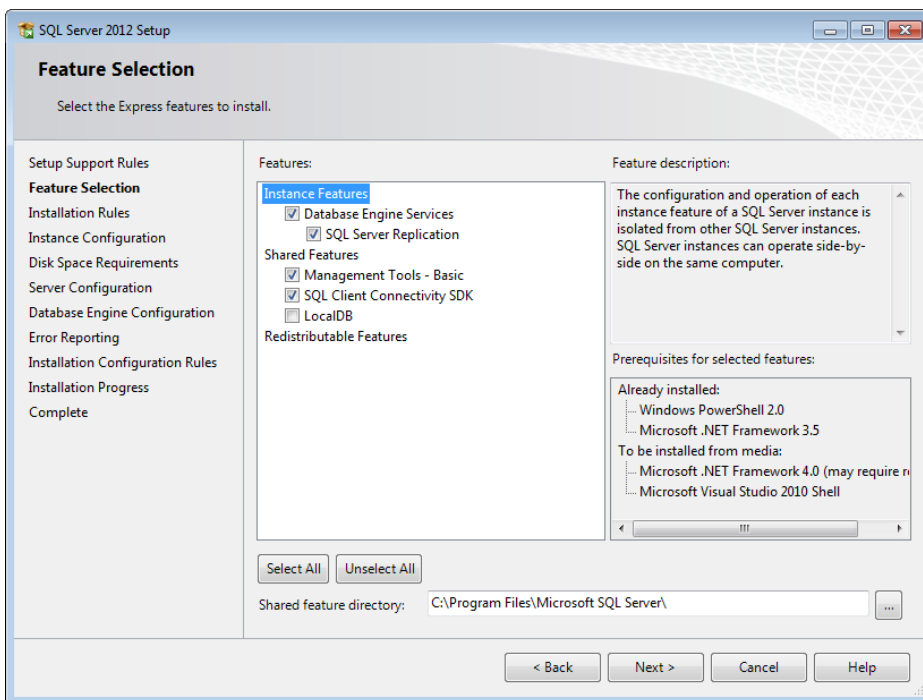

- At the 'License Terms' screen, check 'I accept the license terms' and then click on the 'Next' button

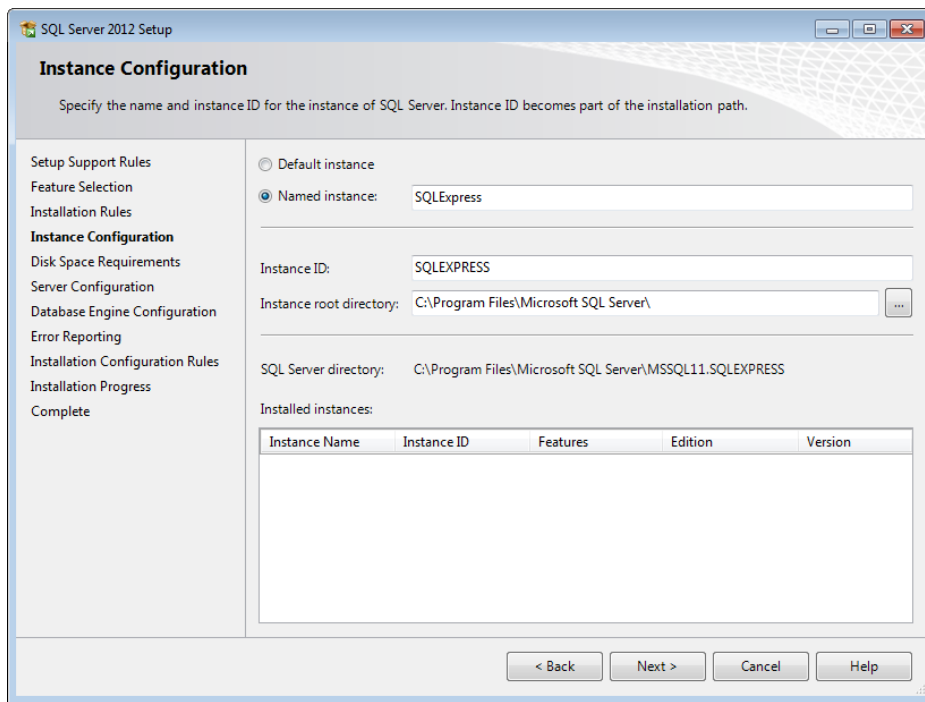

- At the 'Product Updates' screen, click on the 'Next' button

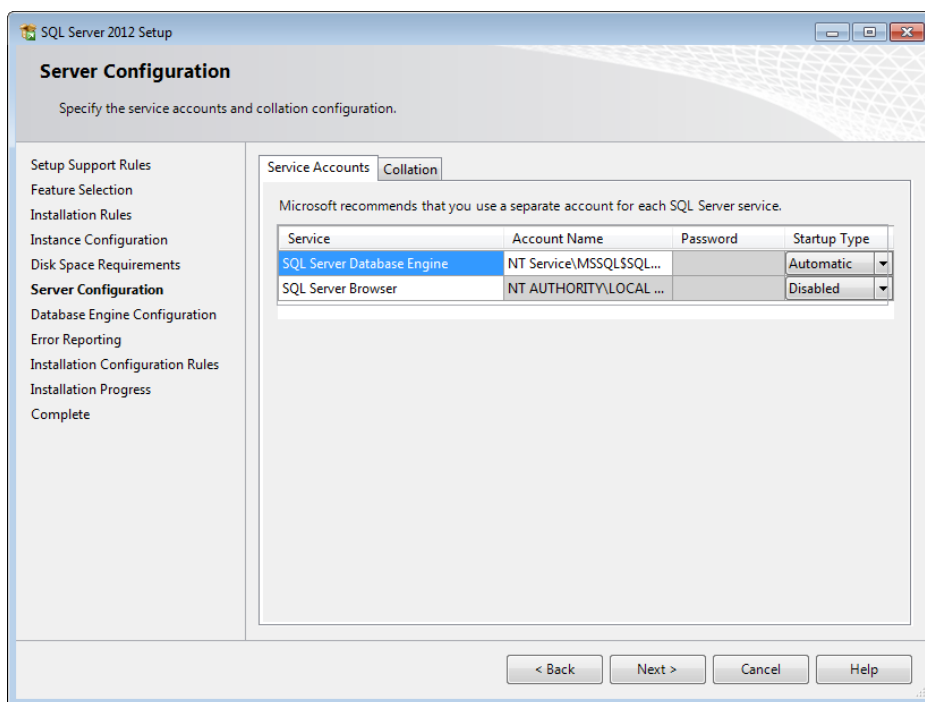

- At the 'Feature Selection' screen, accept the default checked options then click on the 'Next' button

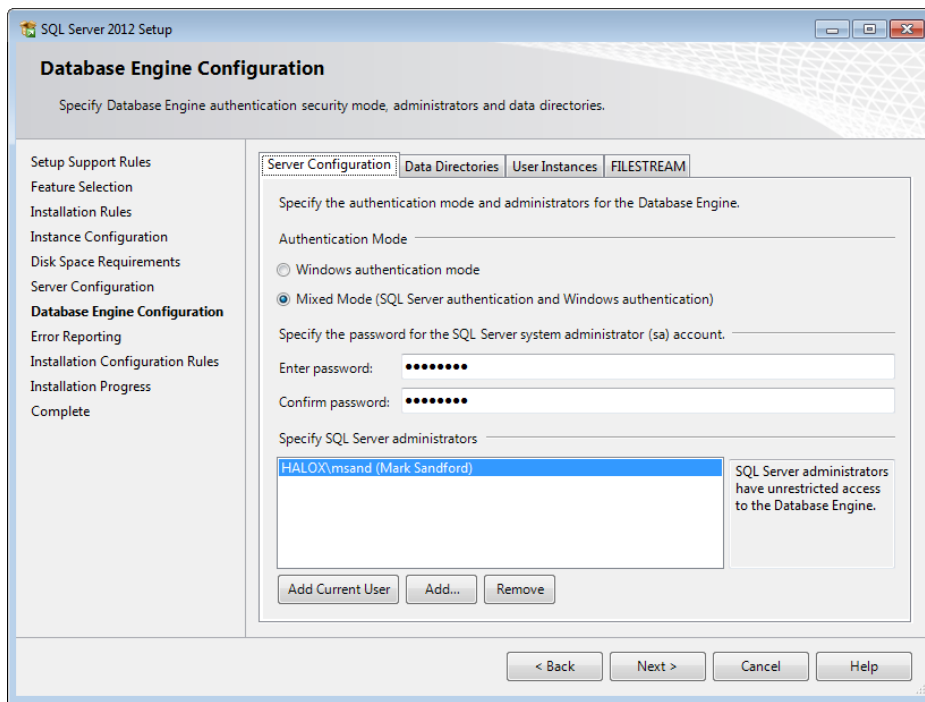

- At the 'Instance Configuration' screen, accept the default settings and click on the 'Next' button

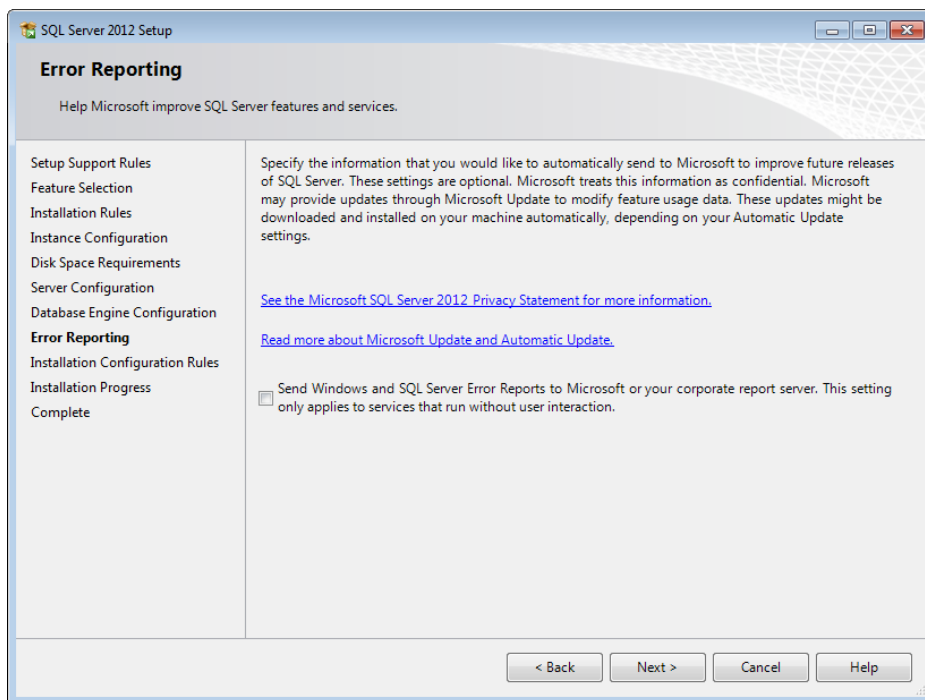

- At the 'Server Configuration' screen, accept the default settings and click on the 'Next' button

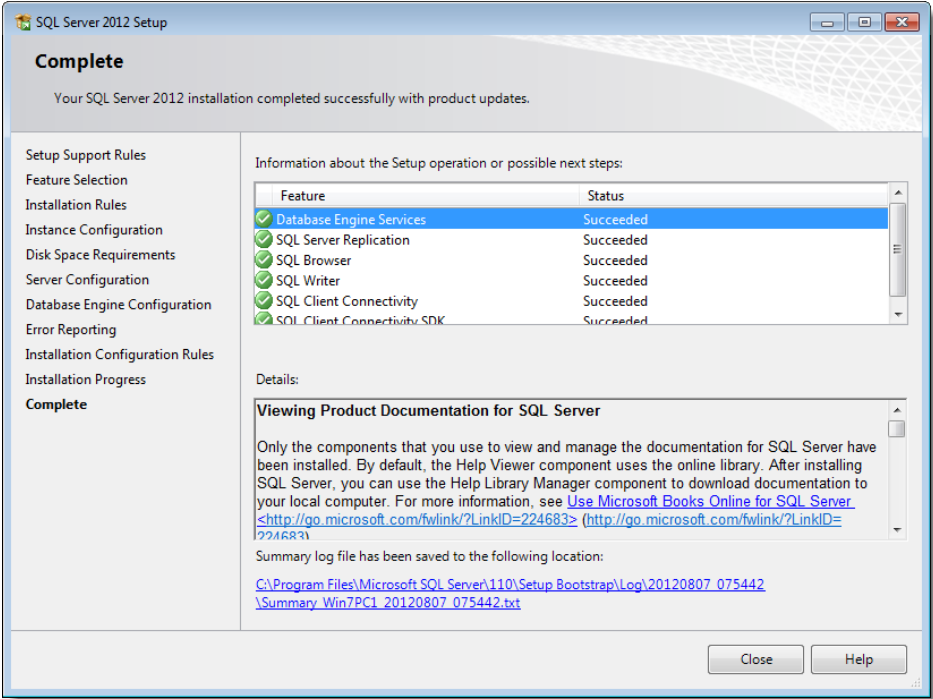

- At the 'Database Engine Configuration' screen, check 'Mixed Mode' authentication, specify a password for the 'sa' account, and then click on the 'Next' button

- At the 'Error Reporting' screen, click on the 'Next' button

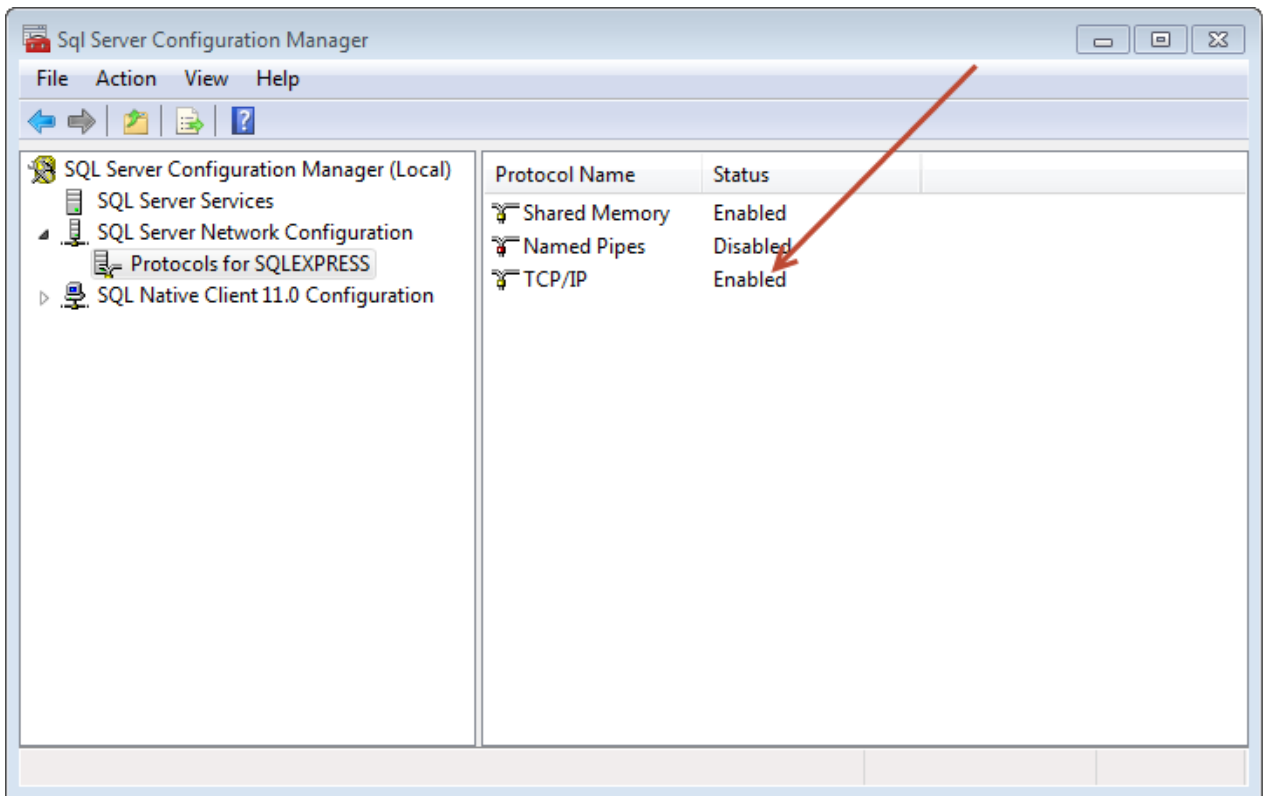

- SQL Server Express is now installed and you can close the open window

2 SQL Server Express Considerations

If you intend to use SQL Server Express to host your Passwordstate database, please consider the following before installing Passwordstate:

1. If you're using SQL Server Express on a different server to where you installed Passwordstate, you may need to check if the TCP/IP Protocol is enabled (use SQL Server Configuration Manager -> SQL Server Network Configuration), and also the Windows Service 'SQL Server Browser' is set to 'Automatic' Startup Type and has been started. You will need to restart SQL Server Express after changing these settings

2. By default, SQL Server Express installs with an 'instance' name of SQLEXPRESS. When you're configuring Passwordstate for first time use, specifically the 'Database Settings' page, please ensure you have specified the name of the instance correctly i.e. HostName\SQLEXPRESS
3. If you intend to also install the High Availability instance of Passwordstate, SQL Server Express can only be used as the Subscriber for data replication, not the Publisher or Distribution database.
